From: Jake H
Topic: 12531 Message: 12531

I think this is a CDF SHU incident. SHF is assisting.

Turn IC

Fire southbound 5 south of Turntable in the Hirz Bay area.
Sounds like they may have the upper hand on it, but not sure with the
chaos on the live scanner. ;)

Caltrans live camera

From: Pamela Alley
Topic: 12533 Message: 12533

Vegetation, Stumps Field.

Circle IC says has 2 choppers working now and another tanker available and enroute, if I heard correctly.

Circle is just up the road from me, LOTS of fuel and dryer than dry. Not fun.

Stump IC on Tac 11

12542. Fire in the Grants Pass, OR area

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-07-26 00:16:26 UTC
From: scr5401
Topic: 12542 Message: 12542

I realize it's pretty busy here in NorCal, but I'm looking to see if anyone might have any info about a fire that is occurring in the Wolf Creek / Sunny Valley area, N. of Grants Pass, OR. I realize that this is pretty far north, but if anyone has any info I'd sure appreciate it. Used to be from there until I transplanted to NorCal.

Thanks.

Unfortunately no, it wasn't the same one. I read about this one, started on Sunday afternoon I think. Anyway, both the Medford and Grants Pass Units for ODF broke new fires yesterday, one along Hwy 62 out of Medford (found this one in media reports), and another one N. of Grants Pass near Wolf Creek. That Wolf Creek area there is a nasty place for a fire, heavy fuel loading, urban interface, etc.

I was just curious if anyone up towards the border had heard anything, no big deal, thanks for responding though, appreciate it.

To: norcalfire@yahoogroups.comFrom: rexr@...: Wed, 25 Jul 2007 19:02:36 -0700Subject: Re: [NorCalFire] Fire in the Grants Pass, OR area

I went snooping around and found this about the Humbug fire, is this the one you were talking about?http://www.kajo.com/news/local/stories.php?subaction=showfull&id=1185395095&archive=&start_from=&ucat=&Rex in Jamestown,formerly Portland, OR----- Original Message ----- From: scr5401 To: norcalfire@yahoogroups.com Sent: Wednesday, July 25, 2007 5:16 PMSubject: [NorCalFire] Fire in the Grants Pass, OR areaI realize it's pretty busy here in NorCal, but I'm looking to see if anyone might have any info about a fire that is occurring in the Wolf Creek / Sunny Valley area, N. of Grants Pass, OR. I realize that this is pretty far north, but if anyone has any info I'd sure appreciate it. Used to be from there until I transplanted to NorCal.Thanks.

10 acres and running. Second dozer requested; air tac en route. Mention made of hazarding high power lines...

149xOpenshaw is the location, augmenting assignment with transport/dozer, engines, watertender all-call.

I guess they'll get rid of a bit more of that medusahead grass than they planned, this year....

Don't have much more on this, just came inside and there it was.... :)

3 tankers, 1 helicopter.

I was in Ft Bragg for the weekend and heard all the goodies for this one, and it sure felt good knowing the Vina Rhinos were over here kicking butt. It was the Clark Ranch outside of Laytonville (a 101 town). Even 1168 out of Ft. Bragg responded code 3 past our lunch at a local humburger joint.

I am comfortable now with MEU's radio procedures now. Most fires will automatically be command on Command 8 151.445 which keeps MEU Local free for other incidents. Most medical aids and county calls dispatched over Local Net will then switch to county fire net instead.

Passed by 2 crew strike teams and a dozer around Willits and Hwy20 as MEU was moving equipment all over at 11pm for some out of county assignment to the north Friday night. So something is burning pretty good up there. The sky was black in smoke over Trinity area as we came home tonight.

12560. Red Bluff City Fire - political note

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-07-30 05:15:22 UTC
From: Jake H
Topic: 12553 Message: 12560

No politics? Ignore message then.

Otherwise RBFD has been ignored by the City Council for multiple years now in getting an acceptable contract/package with the City. The 30+ member Police Dept was given a very nice deal a few years ago and they are not giving the 9 Firefighters anything close to equal. The RBFD is asking if you can vote at a simple grassroots poll on the local newspaper website. Scroll to the very bottom for the poll. Lets see what 500 NorCalFire members think.

http://www.redbluffdailynews.com/

Thanks for your time.

They had 149 closed last night to work on the new overpass(es) at Wick's Corner.

Update: Remaining span of the bridge unstable. Confirmed multiple vehicles underneath the collapsed structure. (0735) Hard to hear the responders; a bit of a deadish radio area?

This could (and probably is) a real and royal mess. They were doing some significant I-beam work, I believe.

Sending best thoughts to all concerned, for sure. Don't know if they had begun allowing civilian traffic through as yet this morning, but I think it might be the case.

12579. Hwy 70&149 incident

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-01 01:40:15 UTC
From: nitrobear@comcast.net
Topic: 12579 Message: 12579

Local reports on this incident have the FedEx driver released from Enloe Medical Center with a few bruises and contusions and a severely sprained right ankle. They confirmed that there was a field amputation planned before they got the luck guy out! I say lucky because he was sandwiched between two 35 ton steel beams...one right in front of him and one right behind him, squashing his delivery van except for the area where he was sitting.
The next amazing story was the construction worker who works for FCI Constructors who was on the beam when it failed and he RODE THE THING TO THE GROUND! He is in Enloe tonight listed as severe but stable.
There was a third casualty that I missed detail on but someone ran into a Cal Trans vehicle at the scene during all the confusion and she was in Enloe with two broken legs but stable I guess. Geez.....what a morning!
Apparently the CDF and CHP had practiced this event almost to the exact occurance which is pretty scary and a darn good job of planning.
Apparently FCI is planning to re-build the false work again tonight. Hwy 149 is still closed along with a good deal of the Hwy 70 four lane section north of Oroville.

Well, I for one am going to go the long way 'round where I don't have to go under any of their stuff....for some reason I'm just a tad leery.

I was absolutely amazed at how coordinated everything wound up to be, even with a vegetation fire further up 70 that demanded resources at the same time as the collapse. When they said on the news video that they (CHP and CDF) had actually practiced for this specific situation, I was floored. Talk about contingency planning!! GOOD WORK, GUYS!!

Any word on what caused everything to fall down and go boom?

Sorry. Couldn't help it.

Anyway, KCRA looked into the history of the contractor and found that while they are no stranger to large projects (they are/were working on the new eastern span of the Bay Bridge), they have had some safety problems. On that Bay Bridge project they purposely did not report injuries (some serious) to OSHA. But, nothing in the way of shoddy work as far as I heard.

I think the Chico ER also said that the engineering plans had been approved by CalTrans so maybe one of the workers missed a step or something?

Off-topic but along the same lines, there was an OIS in Ridgecrest
yesterday that also was preceded just last weekend by a simulation of
a similar (to it) active-shooter incident:

http://ridgecrestca.com/articles/2007/07/31/news/news02.txt

Practice pays off.

12585. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-01 10:51:37 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 12585

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

12586. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-01 10:51:37 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 12586

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

Veg fire, 2 acres, rapic rate of spread near 290 Salmon Falls Rd, El Dorado Hills. BC asked for a high dispatch. Air ordered lots 6 or more engines, 2 crews, 2 dozers, etc. Fire is located just east of Folsom lake.

Call went out for all EDH personnel to "staff all stations."

This is an interesting comment that I received from a friend of mine that does a lot of Fly-over work like this. The "he" that is referred to is the contractor: "Guys: This is a falsework design utilizing pipe colums and cable x bracing. Although cheaper than conventional beam and angle bracing, there is no serious redundancy, hence when a cable is loosened or slips, bad shit happens fast. He refuses to use the system."

Apparently it is. According to Caltrans at dot.ca.gov, as of
Wednesday August 1, 2007 at 17:38, "no traffic restrictions are
reported for this route" (SR 149).

SR 70 has only its pre-existing construction delays 5 miles north of
Marysville and north of the Butte/Plumas County line and at other
locations forther northeast.

12596. E8211 & E8216 on Arcata Fire frequencies?

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-03 04:04:28 UTC
From: Mark Ward
Topic: 12596 Message: 12596

Does anyone know who engines 8211 and 8216 might be, that have been transmitting on the Arcata FPD 154.13 repeater and 154.145 "Tac 2" this evening?

Wondering if these could be the new engines they ordered, or perhaps they've changed their unit numbering, as their messages sound like typical AFPD transmissions

There hasn't been any activity I know of that would have brought in equipment from outside the area.

Hey Jake,

How about adding no "cross posting" to your rules. Most of us subscribe to several lists and hate to have to wade through the same stuff on several lists.

Also- how about a word on replies? Do not quote the entire 5 pages of text when replying.

Good list otherwise!

Jim

Thanks Jim. We've been very lucky with minimal cross-posting, and I haven't personally seen an issue with 5 pages of replies. Both would be rule-worthy in my insane-list-of-list-rules but I'll leave them out unless abused. For now the moderators will deal with it on a case-by-case basis.

The only list that could get a cross-post is our sister group ScanNorCal. Usually it's a single announcement there and states further info on NorCalFire. Sometimes a major incident like the bridge collapse in Butte belongs in both groups. Not quite a fire incident, but one heck of a scanning incident either way.

While I'm here, thanks everybody for such a great list. Great posts, great info, and lots of on-topic sharing this season. It ain't the rules or moderators, it's all of you that make it so easy here.

Jim,
Since you posted this on the list here's my two denarii worth in response.

No need to wade through cross-posts.
See a familiar thread title?
Use that 'ole delete button.
I do all the time for a whole assortment of different reasons.

The fact is there are folks who are not on all the groups.
When I cross-post it is not for guys like you and I who are on many/all the groups but for that guy who not only is on just one group but may not even know about more than one, esp. if he or she is new to Yahoo groups or at least to these scanner/fire-related groups.
Would you not agree that what is more problematic are posts about fires before we know if they will be interesting or not?

12600. CAL FIRE HT load

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-03 06:19:23 UTC
From: David Coursey
Topic: 12600 Message: 12600

I have posted to my tracyscanner.com site a reasonably current copy of the frequencies loaded into the new 500-channel BK Radio GPH-CMD radios that CAL FIRE has purchased. It is on the site as both a table and downloadable spreadsheet. It does not include PL tones on the Local Net outputs that we are likely to use on our own radios to reduce interference.

Remember, only you....

Cross-posting helps get the word out about a fire. I assume that part of the reason we listen and post fire information is to inform. I know that's not the only reason for listening to scanners, but it's certainly one benifit to those who frequent sites like this one and Wildlandfire.com.

While there are those individuals who seem to have a need to know every tactical net transmission at a fire 900 miles away from them, there is no need to post a fire size-up for a fire in Humboldt to some or all of the more than one dozen scanning lists in the state. The people who want to know what is going on around the state have already joined each of the lists. (Cross-posting an occasional between the geographic area's general list and the geographic area's fire list [SCANnorCAL and norcalfire, for example] is OK, as long as the fire list is indicated as being the place for follow-up information.)

Sure, it's easy to hit the delete key. But why make the average list member do it multiple times for stuff they don't want to see?

They sure are, Mike, (and red as God intended fire engines to be) and they went into service just yesterday. Saw one of them on a run late last night. They're "Ferrara Igniter" rescue/pumpers - http://snipurl.com/1p4s7

E8216 is at Mad River station, replacing Engine 1, which has been sold to Trinidad, and E8216 is at McKinleyville station replacing E6, which was perennially breaking-down and had literally spontaneously combusted on more than one occasion.

A third new engine hasn't arrived yet, but is supposedly going to be a "wildland" engine, but not sure if it will be another Igniter or one of these: http://snipurl.com/1p4sn

Yeah, kind of not being real clear on the concept? Their chassis is called the "Inferno," but at least they have a foam-pumper they call "The Inundator."

Reminds me of the scene in "Roxanne" where the new Chief (Steve Martin) walks in to the station to find a fire in a trash barrel in the apparatus room: "I have a dream. It's not a big dream, it's just a little dream. My dream - and I hope you don't find this too crazy - is that I would like the people of this community to feel that if, God forbid, there were a fire, calling the fire department would actually be a wise thing to do. You can't have people, if their houses are burning down, saying, "Whatever you do, don't call the fire department!" That would be bad."

Relaying this from Wildlandfire.com hotlist so I dont have much info..and CHP CAD surprisingly not listing a thing about this one...

But somewhere along hwy 32 with fire at 175 acres+ and a bunch of air resources requested and responding.

All I know right now...havent had a chance to turn on the Butte Public Safety feed yet....

From ChicoER.com:

As of 3 p.m., the fire was in excess of 200 acres and still spreading, although fire officials reported making good progress toward control. The fire was moving northeast, driven by shifting winds.

Some homes in the Canyon Oaks subdivision were threatened, but none had been damaged as of yet.

Chico Fire Department and Cal Fire-Butte County units have been positioned to protect homes and other structures, while others are actively fighting the flames.

Four air tankers and three firefighting helicopters are working the fire, along with convict hand crews from a camp in Glenn Counties.

Highway 32 has been closed, with traffic diverted to old Humboldt Road.

12612. Humboldt County Fire renumbering [was E8211 & E8216...]

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-04 07:11:45 UTC
From: Harry Marnell
Topic: 12612 Message: 12612

On 8/2/07, Mark Ward <markbackward@...> wrote:
> Wondering if these could be the new engines they ordered, or perhaps
> they've changed their unit numbering

You're right on both, Mark. The new Arcata engines info has already
been covered.

Fire agencies in Humboldt County will be going to a coordinated unit
numbering system over the next several months. Most units will have
4-digit numbers, with the first digit representing the geographic
region, next digit the department, and the last two digits the type
and specific ID of the unit. Here's a preliminary list (I hope the
formatting holds together).

Regions are:
5 - Southern Humboldt - South
6 - Southern Humboldt - North
7 - Eel River Valley
8 - Humboldt Bay
9 - Northern Humboldt

Department numbers are:

Southern Humb Technical Rescue - 50xx
Shelter Cove - 51xx
Palo Verde - 52xx
white thorn - 53xx
Beginnings - 54xx
Telegraph Ridge - 55xx
Nielson Ranch - 56xx
Garberville - 57xx
Redway - 58xx
Whale Gulch - 59xx

Miranda - 60xx
Salmon Creek - 61xx
Fruitland - 62xx
Phillipsville - 63xx
Prosper Ridge - 64xx
Honeydew - 65xx
Petrolia - 66xx
Redcrest - 67xx
Weott - 68xx
Myers Flat - 69xx

Scotia - 70xx
Rio Dell - 71xx

Carlotta - 72xx
Ferndale - 73xx
Fortuna - 74xx
Loleta - 75xx
Bridgeville - 76xx

Humboldt FPD #1 - 81xx
Arcata - 82xx
Eureka - 83xx
Westhaven - 84xx
Blue Lake - 85xx
Samoa - 86xx
Fieldbrook - 87xx
Korbel - 88xx
Kneeland - 89xx

Orick - 90xx
Big Lagoon - 91xx
Willow Creek - 92xx
Maple Creek - 93xx
Trinidad - 94xx
Hoopa BIA - 95xx
Hoopa Volunteer - 96xx
Orleans - 97xx
Yurok - 98xx

Unit types to include:

Staff/Command/Utility - __00 thru __09
Engines - __10 thru __49
Water Tenders - __50 thru __69
Rescue - __70 thru __79
Trucks - __80 thru __89
Hazmat - __90 thru __99

12613. Fire in Shasta Lake City on Friday, August 3, 2007 at 2:00 PM

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-04 12:08:20 UTC
From: jodschamber
Topic: 12613 Message: 12613

Sorry details so late getting posted on here, I was involved in trying to protect neighbors homes, my Mother's Home and rescue neighbors pets.

Just prior to 2:00 PM overheard male individual down our street at 4400 block of Fort Peck Street drop a Digger Pine branch with his chain saw.

Branch was long enough to cover all three neighbors back yards across the street.

Branch pulled down power lines which sparked 1st Grass Fire and Black Berry Bushes behind one house closest to the power poll on Hardenbrook Street, between 4400 block of Fort Peck Street and 4400 block of La Mesa Street.

Next when branch crashed into second back yard in between two homes on 4400 block of Fort Peck Street, Garage became fully engulfed in flames, including the whole back yard of the neighbors property.

Next Digger Pine, right next to the one inexperienced tree cutter was at the top of became fully engulfed in flames from the ground up.

The men working on trimming the Digger Pine telephoned 9-1-1 and reported unknown reason why Power transformer on pole blew up and sparked blaze (Not true)

Next someone telephoned 9-1-1 advising Shascom that a house was fully engulfed in flames.

About this time my older brother was able to reach Shascom on his cell phone and advise true circumstances of fire and back yards of all three homes across the street from our Mother's home was engulfed in flames towering above the neighbors roofs.

Meanwhile I ran and checked neighbors homes for home owners or renters , only one person home at one house and he was trying to put out fire to neighbors shed, when we were able to get his attention as flames were very high in his own back yard.

I next went and rescued dogs from neighbors home as fire department had arrived with four engines I personally saw, plus Shasta Lake Sheriff Department 3 cars to block entrances to neighborhood with total of 5 officers.

After retrieving dogs and puppies, I started wetting down our property as fire department was trying to contain fire in all three of neighbors back yards.

Garage in neighbors yard was totally destroyed, other wise brush was cleared from city property behind the three homes and brush in their back yards was burned up.

One fire engine and one Captains truck remained for over five hours as garage appeared to have been added on to several times, each time fire personnel would break apart a wall, they would find a new hot spot.

Great job by all fire crew in putting out fire before damage to any of the home structures.

12614. BUTTE: South of Oroville on Hwy 70

Vegetation with powerlines down after traffic collision. Contained but many spot fires in a neighborhood with palm trees and other fuels, especially near 2 fully involved structures.

Came in late on this one, I am not certain where this fire is, but access has been mentioned as being by way of Cox Lane.

Hwy 70 is closed at this time until powerlines are made safe.

TGU working veg fire I-5 at Hooker creek. Additional resources request,
4 additional engines for structure protection, 2 additional crews, 2 additional
water tender, 2 overhead. This is in addition to the 9 engines, 3 crews already
on scene. Winds are about 20 mph. Freeway air attch just requested 1 additional
AT and one helo. That would make 4 AT's and 2 total Helo's. Lassen crew
7 just stated they were in the area.

Per AA-
Fires looking better. No size update given at this time.

2 AT being released; 2 AT being held in orbit above the fire-possibly
be released shortly.

Very nice.

Jake H <yahoo@...> wrote: http://www.norcalscan.org/photo/hooker_creek/

Trying a new work flow with my photography. Seeing how fast I can get
decent stuff online from a fire. :)

Date: 2007-08-06 02:17:11 UTC
From: nitrobear@comcast.net
Topic: 12642 Message: 12642

Clark incident is rockin and rolling from what I can hear here in Chico.
Here is what I've got for tactical freqs...

Dispatch: 151.400
Clark IC Tactical;
Tac 11- 151.445
White 3- 154.295
Air tactical- 151.295...this is where the air show is and it sounds like 4-5 tankers and 3-4 copters
Air to Ground is 151.220.
There may be others that I haven't heard as just tuned in an hour ago. Everyone sounds pretty "stressed" except the tanker drivers of course. ;-)
Lots of structure protection needs and I did hear one call for 20 additional engines.
Tanker 89 just reported that it "looks like they have a lid on it" and they just had one tanker load and hold at Chico.
Winds are finally laying down a little here in NW Chico. Gusty from the SE all day.

12647. BUTTE: Watertender in trouble (Olive IC)

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-06 06:43:55 UTC
From: Pamela Alley
Topic: 12647 Message: 12647

Wow. This driver is GOOD, and I'm really, really glad he's okay.

One of the watertenders (I believe it's 61) lost multiple tires/wheels while traveling Olive Highway above Oroville. Per the description, the axle is on the ground and the tender is up against the guardrail.

On the other side of the guardrail? Residences and a steep downhill tumble, if I have the location correct (Heritage is the cross street).

Good going, guardian angels and one hell of a good driver!

12648. Scanning Butte County Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-06 06:47:22 UTC
From: Pamela Alley
Topic: 12648 Message: 12648

First of all, take a deep breath and start looking at some of the links.
The norcal site is great and fairly often Jake picks up a bit of our traffic
from Redding. He's also really good about grabbing up Butte frequencies
when something big goes on. :)

(We won't discuss my antenna envy vs. Jake, here. *grin*!)

Online scanning is the greatest thing to come along since the wooden match.
Dialup can make it...interesting...but I manage, when I have to.

I wound up with lots of command traffic today and very little details. When
the fire is up in the hills, it's like I have (almost) no scanner at all,
and I tune in online too.

Unfortunately, I rarely have success with the local scanner server--it's
always full!--but that's the way it goes. Other sites, starting with Jake's
(scannorcal), will help. Keep trying!

In other words, hang in there and don't let your frustration get to you.

Right-o Pam, except Jake is in Red Bluff. While his antenna situation might have improved recently, I don't think hes quiet *that* good. ;) Either way, his scanner did pick up quite a bit of the Butte traffic today, as it normally will.

12651. Hwy 32 fire and Clark fire photos

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-06 21:51:31 UTC
From: Larish, Michael
Topic: 12651 Message: 12651

I spent parts of Friday and Sunday responding to calls either for pure photography purposes (Friday) or professionally (Sunday) and also taking a few photos along the way...

They can be found in the Fire - Hwy 32/Canyon Oaks folder and the Fire - Clark Fire area. Friday, since I responded purely for photography reasons, I stayed outside the controlled fire perimeter so as not to interfere which meant the pictures I got were only of aircraft... Sunday, I responded professionally so managed to get a few shots within the fire perimeter...

http://new.photos.yahoo.com/butteemergservices@sbcglobal.net/albums

According to the Chico Enterprise Record regarding the Hwy 32 fire, "No homes were evacuated, but officials ordered players off the Canyon Oaks Golf Course about 4 p.m. An employee said the course would be closed the remainder of the day."

This occurred because Copter 205 and 505 were filling out of a pond on the golf course but were eventually diverted further away to fill out of California Park Lake due to golfers "shooting" golf balls at the copters while they were making their approaches and filling... Give me a break folks...

The golfers better be glad I didn't see them doing that... And if I had been the copter pilot, I would have "accidentally" dumped my bucket load on top of the golfers...

12669. Bangor IC: Shaky containment

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-07 23:35:50 UTC
From: Larish, Michael
Topic: 12669 Message: 12669

According to traffic over Butte LocalNet and Butte Support Net, they have shaky containment of the Bangor fires. Tanker 100 is on a load and hold at Chico per AA 210. One strike team released to respond back to their original assignment while another strike team arriving in Butte is being diverted from a coverage assignment to the fire for mop-up.

Last post on this unless it blows up. A tanker drop across the head has it stopped before it got into bad areas... They look to have it contained fairly quickly. Released some resources back to original assignments.

12672. Arsonists and NorCalFire posts

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-08 01:07:34 UTC
From: Jake H
Topic: 12670 Message: 12672

When arson fires are possibly occurring, please leave out any details related to "arsonist-hunting". Do NOT discuss frequencies, resources, tactics, etc. that may be involved in the hunt of an arsonist.

Moderators will take swift action if this occurs.

No this hasn't happened yet this year, just reminding the list now as I read BTU's incidents.

Thank you
Jake

That area has a history over the last couple of years (Hurleton-SwedesFlat, mostly) of apparent arson fires in high fire danger times.....

Per a friend who lives up there, all of these fires started in a very short amount of time, similar to past incidents. I don't have any more info (and per Jake, wouldn't share it if I did! LOL!).

I just hope that if it IS some idiot who likes watching fires, he is caught and dealt with appropriately, and soon.

Hey Girl! We saw tankers, helos, and a spotter from our property. Had my handheld scanner and listened to as much as we could. I guess we were 1 mile away over the ridge. Wow! Wondered how you were....well, I hope everything is ok. Talked to Melissa, our neighbor. She and her cousin were watching too, Her husband works for Granite construction and was not allowed home on Darby or Vierra. I'm glad we have lots of clearance all the way around us! We did see a news team go by. On RFDTV we saw a special on having a fire plan, especially so emergency crews will know what and who is on the property. We got ours in place. My sister-in-laws place is next door, she's in Reno so she was on pins and needles. It is different living up here! Is there a community volunteer fire department or something we could check into so we could donate time or something?

Update just came through via Butte Fire: about 70 acres, high spread potential, no aircraft available at Chico or Vina, requests being made.

Mutual aid has been sent to Deer Creek/Hwy 32 for this fire from Butte earlier.

All I've got...anyone else?

Fire name is actually the Colby fire...its right at Hwy 32 near Colby Mountain...your acreage is actually more up to date than other info I ve seen posted so far. Lots of resources in TGU responding....some of it monitorable on Jakes feed, although the Redding and Red bluff are set to higher priority on the feed than LNF (logical) so they get covered at times...

CHP has 32 closed between Butte Meadows and Hwy 36...

Online scanner at norcalscan.org has been updated with LNF Forest Net on priority 2, TGU Local on Priority 1. I told my wife many people will be happy with her for doing that. (she would rather throw the scanner out the window if she could ;)

If anybody has the air tactical or ground tactical handy I'll punch those in tonight when I get home shortly after 5. I'll probably find the air on my way home. Ground should be (typically is) 168.2 for Lassen. I should have direct line-of-sight to the fire.

all on live scanner
LNF Forest 172.225 (priority 2 online scanner)
Colby Air 166.675 (priority 3 online scanner)
Colby Ground 168.200
Colby Air to Ground 170.000

Unfortunately air tactical will most likely change to some random narrowband federal air freq for tomorrow's shift once the management team comes in. I will not be able to make any scanner changes this weekend.

Jake et al,
I just have tried several times to connect to Jake's live feed and it says not available. Maybe a full house? Any updates on the Colby? I heard the lookout evacuation announcement this afternoon from Colby. I have also heard from a friend that they evacuated Potato Patch camp ground.
He and I went up to Almanor last week and I remarked to him how bad the forest floor looked up there. Lots of very small trees, close together and the floor was deep with pine needles. Just a disaster waiting to happen. The campground was basically empty which surprised both of us.

I can connect to Jake's feed fine. There are currently 17 out of 60 listeners on it so it's far from full. Last I heard they had established a trigger line (didn't catch where) but they were confident that they would not need it. I guess if we hear a huge dispatch, the trigger line was breached.

They have set up camp just west of 36 on 32 at Deer Creek Meadows. They plan for the fire getting much larger with the winds that we have had in the area which are expected to last at least through the weekend. I also heard that the ops group of the teams should be at the ICP this evening but I am not sure if that was for the type one or the type two team. They have ordered up a lot more resources for tomorrow. I did see Modoc Hotshots going through Chester about an hour ago. Tankers will be reloading out of Chester tomorrow as well. Chico is a lot further to go for reload than Chester is. It will be interesting to see all the activity in out and out of the airport. Pretty good column seen from Chester in the beginning and just before sunset it looked like it wasn't as active as it was earlier. Plumas SO had a couple of units that went to assist in road closures and evacs. I hope this info is helpful and will send more when I hear it.

12689. Dome Fire-Calaveras County

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-11 20:17:58 UTC
From: jerry.tannhauser@us.army.mil
Topic: 12689 Message: 12689

Firefighters Make Progress Suppressing the Dome Fire
Sonora, CA (August 11, 2007)…The Forest Service today announced that firefighters are making excellent progress in constructing fire lines to check the spread and contain the 75-acre Dome Fire, currently burning in a rugged, remote area of the Stanislaus National Forest.

The fire is located approximately one and a half miles southwest of the Salt Springs Reservoir, and 13 miles northeast of the small community of Dorrington. Smoke is clearly visible in the area. The fire was initially reported on Friday, August 10 at approximately 3:35 p.m., and the cause of the fire is currently under investigation.

The fire is burning in steep terrain and is not currently threatening any improvements, structures, or communities. Approximately 725 firefighters are committed to the fire suppression effort, including three air tankers, three helicopters, four water tenders, two dozers, 22 fire engines, 28 twenty-person hand crews, and 20 supervisory overhead and support personnel.

Although access to the fire is difficult, firefighters are making excellent progress, while at the same time, providing for safety first. Hand crews are cutting fire line through flammable forest vegetation in very steep, rugged terrain. Engine crews are utilizing existing roads as fire breaks, and in the more accessible areas, dozers are working on those portions of the fire.

Retardant-dropping fixed wing air tankers and water-dropping helicopters are being utilized to cool, check, and slow the fire’s spread. Together, they are providing coordinated air attack support for firefighters’ fire line construction efforts on the ground

From: Kevin
Topic: 12690 Message: 12690

For the second year in a row, on the same weekend and day as last year there was a fire at the mill in Quincy. Last year it was the chip pile this year it was the debarking building. Quincy units reponded with mutual help from Meadow Valley and Long Valley Fire at about 05:30pm and had the fire knocked down in about an hour and a half. Mop up and reracking our engines just finished at about 09:00pm. Two firefighters suffered from dehydration, but the were threated at scene. That is what happened in Quincy this evening. (I know this I was there fighting the fire)

Just checked the web page for the Colby Fire and Hwy 32 is opened back up with controlled trafffic. The fire is 260 acres and is 90 percent contained. There is Red Flag warnings for today but the wind has been light as of yet. Just heard an ambulance is responding to the ICP for an injury not sure at this time what it is but will update when I hear more.

SKU - Bear Fire

Approximately 20 miles east of McCloud. 35+ acres. Numerous ground
and air resources ordered and on scene.

BTU has also dispatched a Stike Team of Engines to SHU.

From wildlandfire.com:

This is the Bear Fire. Big timber country. First report at approx
15:00 reported crowning in timber. Several air tankers and copters
assigned. At approx 16:00 it was reported as 35 acres and moving.

I keep thinking "Pondosa" is missing a couple of letters.

From: nitrobear@comcast.net
Topic: 12692 Message: 12699

I heard copter 205 dispatched to the Hatched incident aroung 1500 this afternoon. I've heard nothing since.

--
Nitrobear

---------- Original message ----------
From: "sh9730" <johnmsandiego@...>

Hwy 299E at the Hatchet summit. Wasnt gonna post here cuz it seemed like they were gonna catch it at under 5 acres, but now fire has spotted across Hwy 299 from the west to the east so they have a bunch of additional equipment enroute.

LPF was just doing the weather synopsis and mentioned the East Bay would be receiving some easterly winds later today.
I don't see anything on NWS so this must be falling under the minimum requirements to trigger a red flag warning or fire weather watch.
Anybody else read/hear anything about this?

http://redbluffdailynews.com/ci_6639738

This is the primary reason we have zero tolerance for discussion of arson-related activities on this list, or any other California fire list. Arson investigation is painstaking and quite different than other crimes. Among many differences, they must allow the arsonist to continue to set fires, while under surveillance etc. in order to build a solid enough case against them. This was a popular topic last year in the Redding Record Searchlight newspaper about an arsonist there, who set fires while investigators had to sit and watch.

Surveillance methods are very secretive, and they rarely discuss evidence and methodology so that future arsonists cannot improve their technique in avoiding detecting. They have access to cool toys, GPS trackers etc. Radio communications are primarily encrypted P25 digital, especially if the case becomes large/federal or suspected of monitoring normal fire radio channels.

2-3 years ago a small-time convicted arsonist I found out was a member of this list. It was a reason why I kept the messages private and only members have access. However with the onslaught of anonymous free emailers, it is a moot point and I have opened up the reading of messages to the public to better serve everyone. This means anyone can read norcalfire emails online, without being a member of the group. You never know who is gleaning the information.

Thanks for your continued support.

One of the OES full-time staff was involved in catching the arsonist that was running around in Yolo County, and he told us about the painstaking effort that went into capturing him, including setting up an encrypted P25 repeater so that the investigation team could have unmonitorable communications to catch this character. The investigation team was able to put together a case to charge the suspect with 7 counts of arson, with the possibility of more.

I personally have been involved in the gathering of evidence on several arson-caused fires, and I understand the need for limiting the information to the public regarding the investigation before an arrest is made.

I don't understand couple of things about this issue. First, I would hope that anyone who is connected to an active investigation wouldn't be stupid enough to come in here and say anything about it. The same goes for anyone who has an "inside" to a department who is doing an investigation. It seems outrageous to me that anyone would do that. Second, if the first holds true and the only comments here about it are pure speculation on the part of the disconnected parties then what is the harm? I mean, when the Mythbusters perform an experiment on the air that combines two chemicals that produce a reaction, at least one of the chemicals is kept "secret." But let's face it, anyone who really wants to know what the other chemical was can just look it up online or, *GASP*, read a book. Any arsonist, unless he is a very dumb arsonist, already knows what the police do to catch arsonists from many other sources besides fire fighting enthusiast mailing lists.

I suppose that there are those out there that simply have to tell any secret they know because they just have to feel cool and get information out into the wild before anyone else. Therefore, if one of those people were connected to an investigation they could be tempted to post information that should not be made public. So, if that is the issue, then I understand the need for the rule. But if it's just because the conversation of fire enthusiasts would somehow tell the arsonist how arson investigations are conducted, there are far better places to get that information than this list.

What am I missing?

On this list, it's more about the containment of a post that is similar to "I'm hearing prevention units on such and such frequency and they're sounding pretty agitated, can anybody else hear this where they're at?" Or "wow, there's a lot of prevention units running up Honcut Rd for some reason."

Common kind of post. The frequency in this case isn't a "regular" frequency if you catch my drift. Innocent posts that mean nothing to many, but to some could be a great tip-off. Hey, I find stuff that surprises me even, and I've enjoyed listening to all aspects of CDF radio for years. So for those of us who LOVE doing this stuff, there are surprises every day. Let's not hand the play book over so easily.

As for arsonists already knowing everything - fine. Lets discuss our burglar alarm codes on the list, since a true burglar would have already staked out the house and used binoculars to see us enter the code from 30ft away. Lets just not make it easy for them. Make them work harder at it, more chances for them to slip up, creating more chances for the good guys to catch them.

Lets start wrapping this discussion up - not intended to be a discussion, more a soft-handed laying down of a "list rule"

Thanks all!
Jake

12712. TGU: Fire in eastern Tehama foothills

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-17 21:18:10 UTC
From: Jake H
Topic: 12712 Message: 12712

Lyman Springs @ at the 210N line

unknown size up but it's viewable from Red Bluff. Watertender all call.

Lassen Forest says it's a couple miles from Forest with a clearcut to
get through.

151.370 TGU Local
151.295 Lyman Air Attack

Jake 2:18pm

12713. SHF: Delta Incident - Vollmers at I5

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-17 22:12:50 UTC
From: Jake H
Topic: 12713 Message: 12713

Barker Creek Drainage near Vollmers at I5. They just diverted 2 of the 3 tankers from TGU Lyman Springs. Delta IC is at 2 acres, one edge contained against I5.

171.575 SHF Forest
168.200 Barker Tactical

unknown air tactical

Looks like Caltrans cam has it here
http://www.dot.ca.gov/dist2/cctv/sm_lakehead.shtml

Vollmers cam doesn't show anything yet
http://www.dot.ca.gov/dist2/rwis/sm_vollmers.php

12714. Re: TGU: Fire in eastern Tehama foothills - final

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-08-17 23:49:18 UTC
From: Jake H
Topic: 12712 Message: 12714

After a full assault from the air the fire stayed around 3 acres and right on the edge of the timber line. Had some spots but the copter worked those. It's in mopup stages now. Any more wind or no cdf lookout and we would be listening to a 200acre timber fire instead.

Inskip Peak lookout was the first call on this fire. Awesome job!

Jake

August 20, 2007

California Sends 10 Fire Engines to Idaho Blaze

SACRAMENTO – The Governor's Office of Emergency Services (OES) has ordered fire crews from 10 Northern California and Sacramento-area fire departments to deploy tomorrow morning to the Castle Rock Fire in North Eastern Idaho at the request of the United States Forest Service. The local crews will staff 10 OES fire engines and depart from Rocklin at 9 a.m. The teams will depart from a shopping center off Granite Dr. (Directions: Rocklin exit off I-80, travel under freeway, turn right on Granite Drive and travel to shopping center on right hand side.)

"California is fortunate to have the resources available to fight wildfires within our borders while still helping our neighbors to the north," said OES Director Henry Renteria. "I'm certain that our firefighters will make a major difference in helping protect the homes and property of Idaho's residents."

The 10 engines are being deployed from the following fire departments: Yuba City Fire, Susanville Fire, Redding Fire, Butte County Fire, Tehema County Fire, So. Placer Fire Protection District (FPD), Consumnes Fire, Sacramento Metropolitan FPD, Woodbridge FPD, and Folsom Fire.

The Castle Rock Fire began on August 16 near Ketchum, Idaho. The blaze has burned more than 12,000 acres, is 6 percent contained, and is currently threatening 750 homes and 78 commercial buildings.

OES has a fleet of 110 engines statewide that are provided under agreement to local government fire departments for use in their daily operations and available to be deployed by OES at any time to major wild land fires or natural disasters.

Per the Sierra Sun newspaper:
http://www.sierrasun.com/article/200...73291053011519

A vegetation fire has been reported off westbound Interstate 80 near the Donner Lake interchange.

Dispatchers have called in air tankers and helicopters and numerous ground fire crews. Power lines have been reported down in the area forcing the closure of at least westbound Interstate 80.

Initial reports from the scene were two spot fires approximately two acres in size. Strong winds are reported. The Tahoe Donner subdivision is located above the fire.

Subject: [NorCalFire] Re: CA-NEU-I80 (Interchange Fire)

North Ops is currently putting this fire at between 80 and 100 acres.

Heavy resource response in route. Placer Co. launched at local gov

strike team a little while ago. Also, fire name has been changed to

the "80 Fire".

New start off Mooney Flat road, Penn Valley area, Nevada Co. Initial report: 4-5 acres of oak woodland and brush moving uphill with rapid ROS. Lookouts advise of heavy build to fire. Additional tankers, copters and crews being requested.

Air Attack just requested 10 additional engines, 2 dozers, and 2 additional crews. Fire is burning toward Lake Wildwood. Now states fire is 25+ acres

Yankee Hill Fire Near Columbia Is Now 100 Acres
Thursday, August 23, 2007 - 01:20 PM

Columbia, Ca -- CAL Fire's Lisa Williams says that the Yankee Hill Fire near Italian Bar Rd. is now 60% contained, and estimated at 100 acres.

Initially CAL Fire was hoping for a noontime containment. That, however, has been pushed to 3pm.

“The reason for that is because there is steep terrain, heavy fuels and mine shafts in the area that has slowed the progress,” says Williams.

The fire broke out near an illegal marijuana grow. The circumstances surrounding the cause are still under investigation. Two firefighters have reported minor injuries while fighting the blaze.

Pam,
His suicide strikes me as defiance and/or despair in the face of a guilty conscience and/or getting caught.
Not exactly the actions of an innocent man. If I were innocent in the face of such charges I'd be trying to clear my name, not stretch my neck.

CalFire Grass Valley dispatching West side Units to a report of a structure fire with spread to wildland on Luken Way cross of Hampshire Rocks Road in Norden. This is on the Place/Nevada County line and is just North of I-80. Initial report is 1 acre crowning with three structures involved and power lines down. Multiple move ups from West side to cover Truckee and CalFire East side stations. Operations on White 3. If you know where Cisco Grove is it's just East of there. Should be visible from I-80

Tophead lookout still reporting multiple downstrikes. Resources from MNF and SHU CalFire responding to the Wallow fire in the Hayfork area. Tophead has at least 4-5 smokes going. One reported on the Trinity/Tehama boundry in the forest. Tophead also reporting some precip with the lightning activity.

That should be Tomhead. MNF not sending any resources to Wallow Fire. 7 new Starts from lighting on the MNF so far, most in the Yolly Bolly Wilderness. All with various amounts of precip. None staffed at this time due to weather in area.

One fire outside the wilderness is the spanish Fire reported at 2 acres. IC thinhks they have it stopped.

Date: 2007-09-01 10:36:52 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 12785

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

12786. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-01 10:36:51 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 12786

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

With two scanners now covering Butte CDF, I will be taking Butte CDF off of my norcalscan.org scanner since that past couple of weeks it has been received poorly for some odd reason and making the rest of the scanner feed annoying to listen to. North county tone comes in fine but when they switch to south county tones, I get multipath and the quality just stinks.

I'll be paying more attention to everything above the Tehama/Butte county line; except AEU and MEU, which I inadvertently get (pretty clean too) for scanning Tac 4 and 9.

12789. SHF - Lazy Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-03 17:32:24 UTC
From: Jake H
Topic: 12789 Message: 12789

The 60acre Lazy fire has been separated from the Yolla Bolla Complex, a series of lightning fires in the very northern Tehama County portion of Mendocino Forest and southern tip of Shasta/Trinity Forest. These fires are on the Tehama/Trinity county line. The Yolla Bolla Complex is managed by MNF with command on forest net 169.175. There is no forest net coverage on the fire so Tomhead lookout has to relay any traffic out of dispatch to the fire.

The Lazy fire will transition to a Type 2 Management team and become SHF's fire this evening. Unsure of the frequencies involved with that move but I expect command to go to District net 172.275, if not SHF Forest 171.575

Air Tactical for Lazy is 166.275 and at 7000ft elevation will provide excellent reception. Air Attack (Bravo 59) is also acting as lead plane and they'll disappear when dropping into canyons for drops. According to this morning's traffic, it sounds like the drops are pretty precarious with 180degree turns after drops to get out etc. It sounds like they'll be slowing air attack after 11am-ish due to smoke, wind and not really anything else the tankers can effectively do. Load and Hold at Redding.

Air to Ground is 166.6875. Victor yesterday was 122.925

All this and more on norcalscan.org live scanner
Jake

12790. SCU - MAJOR NEW FIRE

12795. Moonlight Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-03 23:56:48 UTC
From: T Sharp
Topic: 12795 Message: 12795

My friend just sent me a couple of pictures that his wife took from their front porch of the Moonlight Fire. I was gonna post one of the pics here but didn't know if that was allowed or not. Huge column and his wife says she can see the torching and spotting from across the valley they live on. Pretty spectacular photos.

The fire is actually now on both the Lassen and the Plumas NF. It is 250 plus acres with rapid rates of spread. Been busy in my neck of the woods today. Type 1 team is on order and expected to be arriving around 1400hours tomorrow. It is being called the Moonlight fire and I have been on a fire in that area a few years ago when I worked on the Lassen NF. Lots of heavy fuel loading and very steep terrain.

Hi David

DC10 Tanker 910 is on scene making sizeups and drops as I type this.
If you would like to listen in its CDF AIRTACT5 or tune into my
internet CALFIRE stream (shoutcast mp3, Realplayer may not work) at:

910 is on scene sizing up how to make the drops.
CDF AIRTACT5 is the channel.

If you would like to listen via the internet, direct your browser or
mp3 player (this is a shoutcast stream, Realplayer will most likely
not work)

http://railaudio2.railroadradio.net:2006

We're listening to AIRTACTS currently from a high elevation point in
the So San Francisco with a commercial radio and high gain antenna.

Jim Groenke

Currently reporting heavy spotting out ahead of the main fire up to one mile with wind picking up in the canyons. Fire is now well established across the original line of containment. Moving additional strike teams into place to attempt a stand.

Off to sleep for a long, long day tomorrow.

12804. Lick IC: Hiker in fire area

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-04 06:10:16 UTC
From: David Coursey
Topic: 12804 Message: 12804

IC reports that a hiker is in the fire area and has been visualized from aircraft using forward-looking infrared (FLIR). They are planning to send someone/something down to get the hiker and bring him/her to out of the fire area. Not sure if the hiker is in actual danger, doesn't sound like it, but it can't be a safe place for someone to be moving around.

This mornings 209 shows the fire at 5000 acres with 10% contained. Fire is burning within the Henry Coe State Park. Having problems making access and the east part of the park has been evacuated. CAL-FIRE IMT #2 assumed command at 0600 today. Fire is currently burning in heavy brush and oak woodland

Fire continued to burn well through the night with spotting up to 1/4 mile out in front of the main fire. Fire is expected to double in size during the next burning period. Tanker 910 is expected to fly the fire today.

This morning on the news radio that the fire is at 1200 acres. Last night I could see flames from the fire in Chester, pretty impressive. Winds are expected to be high again today which is really driving the fire along with the heavy fuel loading in the area. I have been listening but I haven't heard all that much so far. The Type 1 team is planned to take over at 1400 hours today. Helicopter 901 is back on the fire along with the lead plane but I still haven't heard on the radio or in the air any airtankers not sure if that is because of an inversion on the fire this morning or not. Also the Lassen NF is sending to engines up to Hamilton Mtn near Fredonyer summit for some prep work for the radio towers up there. The fire is kind of pushing towards highway 36. That is all I got so far but when I get more I will post it up for everyone.

Got a little couch potato?

No. As the statewide command pairs, they do not follow the local unit
tone convention.

As I recall, the common output tone is Tone 8 (103.5 Hz). The full list of 16 tones can be used on the input.

So we should be "testing" for a 103.5 tone on the outputs of CMD
3-10? Or are we certain this is really used all the time?

That "official" position is the LAT/LONG of Lick Observatory itself, atop Mount Hamilton, due to an early report to CAL FIRE. The fire was _named_ Lick after the Lick Observatory up there too, but the fire has not reached that location (yet). Basically, the fire is still in the mountains to the north-east of the City of Morgan Hill (Bollinger Ridge, Blue Ridge, et cetera).

The most important "real" position seems to be the park HQ, which
appears on a number of maps.

The LICK BASE is at Christmas Hill Park in the City of Gilroy. The Henry Coe State Park Headquarters is near a high point on one access route into the fire and the LICK COMMUNICATIONS mobile unit (CAL FIRE Comm 1629) is staged there now, but AFAIK that location hasn't burned yet either. <grin>
From there, they have a view of the fire to their northeast.

No, the question was about tones on the outputs of CMD-1 and CMD-2.
They use a common tone statewide on the output.

The pairs used for Local nets and secondary CMD nets (CMD-3 through
CMD-10) use (or will be using) the tone assigned to that administrative
unit (Tones 1-7), as signified by the second digit of the unit numbers
in that unit (Santa Clara [16xx units] using Tone 6, for example).

Don

The LICK BASE is at Christmas Hill Park in the City of Gilroy. The Henry Coe State Park Headquarters is near a high point on one access route into the fire and the LICK COMMUNICATIONS mobile unit (CAL FIRE Comm 1629) is staged there now, but AFAIK that location hasn't burned yet either. <grin>
From there, they have a view of the fire to their northeast.

Yep, and some fond memories too, Gary! That country is absolutely gorgeous in springtime, with the wildflowers often best around the last two weeks of April! I managed the CDF station out there for five years until 1985 and after that my handcrews were re-assigned back out there (most summers) until I retired 5 years ago.

It's amazing, and generally unknown, that there are _so many acres_ of that wild land so close to San Jose and Silicon Valley.

Don, I thought CMD 3-10 have a common tone out of 103.5. Those command repeaters don't belong to an "administrative unit" since they are wide-area, usually covering 2-4 Units.

Local Nets I understand have the output tone matching their second digit (but not all local nets are utilizing a tone on the output yet)

Any idea how many acres? I'm in the TNF Grass Valley Command Center and the Truckee fire chief wants to know! We can see the header from the air attack base landing strip here in Grass Valley.

Hey guys, I just arrived back home from the Lick Fire about an hour ago. Latest news from Coe Park is that the fire has a good shot of burning southeast all the way to Highway 152. The winds today were gusting to 30 MPH and the forecast for tomorrow is not promising. We had one FF injury - succumbed to heat and suffered smoke in inhalation and was airlifted out and sent to Regional for care.

Today crews from State Parks worked to clear grass away from the visitor center, while numerous additional strike teams arrived at the incident. Tanker 910 dropped in again today for a late day run.

910 Tanker pulling up from his run on one of the flanks of the Lick Fire

http://i13.photobucket.com/albums/a266/carosephoto/IMG_7688.jpg

Column of smoke from the Lick Fire - note pyro cumulus clouds forming at the top.

http://i13.photobucket.com/albums/a266/carosephoto/IMG_7688.jpg

Another dozer transport arrives at Coe Park HQ

http://i13.photobucket.com/albums/a266/carosephoto/IMG_7976.jpg

Dinner is served!

http://i13.photobucket.com/albums/a266/carosephoto/IMG_8009.jpg

So small compared to 910.

http://i13.photobucket.com/albums/a266/carosephoto/IMG_7398.jpg

Fire update from inciweb has the fire ranging from approx 3-5000 acres and 15 percent contained. Type 1 Team is in place, 6 air tankers were on the fire all day, 1000 firefighters, 68 engines, 20 dozers, many handcrews, and the good thing so far is that there is no communities in the path. Fire camp is in Pine town just outside of Westwood. The fire is spotting up to 3 miles out in front of the fire and the fire is burning in the Indicator Peak area. Red Rock lookout was evacuated as a precautionary. Red yesterday reported winds gusting up to 50 mph just before the fire was reported. The fire also had ice capped and there were thunder clouds in the vicinity of the fire. That is all I got at this time will post when I get more.

12836. CDF "on duty until further notice"

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-05 05:03:49 UTC
From: Mark Ward
Topic: 12836 Message: 12836

CDF Fortuna Command Center just broadcast over all their repeaters a message, with some sort of code or incident ID number that I didn't catch, stating that "as of 22:00 hours this evening all personnel are to remain on duty until further notice."

This probably isn't terribly unusual during conditions such as we have across the state, but I don't remember hearing such a broadcast before in the 15 years I've been listening to them.

Does anyone know if this is local to HUU or the north state, or is statewide?

Harry,
This will be the third fire in this area in week. There was
mentioned on this group last week of a fire west of Weitchpec
and Martins Ferry, then over weekend and still working is a fire on
Hwy 96 between Hoopa and Weitchpec.

Yeah, Joe, I saw those. AA just requested some type 2 helicopters, but Fortuna's saying "North Ops says the chances for them are between slim and none, would you like additional air tankers instead?"

AA's reply was "No, the fire's in heavy timber and burning right through the retardant lines. How about type 1 OR type 2 copters?" So they're sending copter 512(?) out of Chester, no ETA. And AA will now take them up on that offer of more air tankers. :)

Decent relief map of this area at http://harrymarnell.com/hoopa.pdf Fire area is in the northwest quadrant n/of the town of Hoopa. Also http://301url.com/Hoopa-topozone

From the Plumas County newspaper
http://www.plumasnews.com/index.edi
September 5, 2007

2 p.m. update: More information about the six Hat Creek loggers surviving a night of fire. They were totally surrounded, but everyone is safe, including the equipment. They used their logging equipment including dozers and water tenders to make a 100 ft. wide by 400 ft. long safe area. Lost all of the timber including log decks. despite "scaring their wives to death."

12854. HUU "Cappel 2" incident - sounds messy

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-06 00:37:19 UTC
From: Harry Marnell
Topic: 12854 Message: 12854

New start, Hwy 169 @ Cappell Rd, Pecwan area, southwest side of the river, no road access
http://snipurl.com/cappel2 - looks like sections 24 and 25 at far n/w carner of map at http://harrymarnell.com/hoopa.pdf

Units to stage at Martins Ferry bridge until some kind of access is figured out.

Command is HUU Local, Tone 2 - 151.25
Tactical is Tac 3 - 151.175
Air Tactics for now is CDF Air Tac 6 - 151.31
Victor is 128.25

CDF B1215
Arcata E8212
Blue Lake WT 8561
CDF E1290, E1265, DozerTender 1240, Prevention 1221
High Rock Crews 2 & 4
Yurok Fire
Tanker 96
Helo 503, Helo 102

SRF E23 is at the bridge, looking for a staging location, will be attempting to get a boat to ferry personnel across the river.

Copter 510 is overhead (came from the Milepost fire) and advises they're going to need more crews, and jumpers due to access problem, and need tankers and more copters. CDF Fortuna advises that's going to be hard to fill. Contacting Green Diamond Lumber to try to get help with access.

Cappel AA requesting another AA out of Ukiah due to all the aircraft already strung along the river on the other fires.

Green Diamond is flagging one access with four pink flags, from Williams Ridge Rd gate (which nobody seems to know where it is)

You're getting the Vina helitack copter too. It should be Copter 901.
(205 is in Idaho)

Copter 101 enroute from Vina, ETA 18:45; Air Attack 110 from Ukiah ETA 18:30, Air Attack 120 just now lifting off from Redding. Two loads of 10 jumpers each enroute, no ETA.

Possible crew access from the coast via Hwy 101, over Bald Hills Rd to William Ridge Rd. And Yurok Fire reports there's a cable across the river at MP 22.27 on Hwy 169, may be usable for ground crews to sling across, Battalion 1215(?) responding to assess it.

AirAttack's report on conditions at 17:55 is 5-6 acres currently, with potential for "much larger" if they can't get on top of it before dark.

Thanks Jake. I'm only hearing bits and pieces when they use (the right) repeaters, but it sounds like they're having a heck of a time getting anybody into the fire. Sunset there is at 19:44, and Air Attack's size-up seemed to be putting a lot of emphasis on getting people in from the air before dark.

Yurok Fire is bringing their rescue boat to ferry people across the (Klamath) river, and Green Diamond Lumber has some water tenders and dozers out in the hills that they're trying to contact and get over there to try to carve out a landing spot from a logging helispot.

At 18:23, B1215 just said they've got the first jump ship just about overhead now, and they may have them drop in to that helispot and prepare it before going down to the fire itself

They should be using 151.250 local tone 4, which is on Red Mtn.
north of the Klamath River, almost line of sight from fires.
Problem is they are in canyon.

We dodged the bullet, with a veg fire approx 18:00, Low Divide Road
under power lines Del Norte County. Cal Fire and Forest Service
resorces about tapped out. Locals responded, abandoned auto, small
spread extingushed. Good potentional in area, Bisquet fire was
within one mile.

With no lightning or other adverse conditions, strange all these
starts in same area, in close time span.

The Moonlight fire is still running N.E. of Greenville in Plumas County. Here is an update. I've heard that schools in Greenville are closed. This area has a lot of really heavy fuels and has difficult terrain.
Moonlight Fire
Moonlight Fire Incident Information:
Last Updated: September 6, 2007 6:00 am
Date/Time Started: September 3, 2007 2:25 pm
Administrative Unit:Plumas National Forest
County:Plumas County
Location:Six miles Northeast of Greenville
Acres Burned: 28,000 acres
Containment8% contained - 28,000 acres
Six miles Northeast of Greenville
Structures Destroyed:0
Threatened: 500 residences, 90 outbuildings
Evacuations: For current evacuation information, call (530) 238-7744 (Moonlight Fire Information)
Injuries: 0
Cause: Under Investigation
Cooperating Agencies: CAL FIRE, California Highway Patrol, Plumas County Sheriff
Total Fire Personnel: 1,650 (633 CAL FIRE)
Fire crews: 64 (54 CAL FIRE)
Engines: 101 (40 CAL FIRE)
Helicopters: 7 (2 CAL FIRE)
Dozers: 11
Water tenders: 15
Costs to date: $1.25 million
Conditions: Steep, rocky terrain, heavy fuel loading, long range spotting, erratic high winds, extremely low live and dead full moisture levels all are contributing to extreme fire behavior.
Phone Numbers (530) 238-7744 (Moonlight Fire Information)

Here is the afternoon update on the Moonlight incident on the Plumas. I'm not hearing anything here on any frequencies. Is anyone hearing traffic somewhere? That area is pretty well blocked from the valley by terrain but I don't even hear Plumas talking much about the fire.
This update is off INCIWEB rather than the Cal Fire site just for a different look.
The fire near Susanville isn't reported from what I can find on the web.
Weather guys here in Chico say smoke will continue to drift over us for a couple of days +/- the seasonal wind shifts. The winds probably won't scour out the valley much. If you all smell like smoke...we understand! :-)

--

Here is the latest update off INCIWEB.

INCIDENT UPDATED 1:01 HRS. AGO
ANNOUNCEMENT
Evacuation contact information
Lare animal evacuations: Plumas-Sierra Co. Fairgrounds, contact Dennis Miller 283-6211 or 394-7762 Domestic animals can be taken to the Animal Shelter in Quincy, contact Lisa McKee 927-7714Red... more
Summary
The Moonlight Fire has grown to 28,000 acres. The fire is located in the Northeastern Sierra Nevada, along the boundary between Plumas and Lassen counties, predominately on the Plumas National Forest. Containment is 8%.
Fueled by winds from the north, the fire moved south yesterday, triggering mandatory and voluntary evacuations. Under the leadership of Plumas County Sheriff, evacuations have been instituted for the North Arm of Indian Valley and for small, isolated parcesl to the east, including Taylor Lake, Wilcox Valley, and Franks Valley. Precautionary alerts have been delivered to residents of Taylorsville and Genesee Valley, North Valley Rd to Pecks Valley.
Winds today are predicted to be out of the east, then moving from the south later today.
Informational public meetings will held today at Greenville High School Cafeteria at 6 pm and at the Taylorsville Grange at 8 pm.
Basic Information
Incident TypeWildland Fire

I'm hearing nothing either from base setup in Tehama or mobile in Shasta; even with a larger antenna 50ft up a mast. Plumas has always been an issue for monitoring from Red Bluff. If I wasn't so busy I'd go plant myself a few ridgelines away this weekend and take some pictures and monitor.

The DC-10 (Tanker 910) made a few drops today on the southeast flank of the fire. What I understand, it doesn't fly federal fires, but this is a joint fire with CalFire and the DC-10 drops were protecting state land. :) Way to sneak it in there.

Fire activity is the same at night as it is in day so that's making it miserable and fast-spreading. They're begging for tankers as early in the morning as possible to make a hit on it.

Jake et al,
Well, it's not just my location I guess. I hear Plumas HQ very well here so I'm not sure why we aren't hearing more. This fire caught me napping as I've been pinned here with a couple of projects and have had the scanner down to eliminate that distraction.
That area East of Greenville is a hole although it probably is starting to crawl/run up one of the ridges that surround the hole. I would think we would hear some Air Tactical but as you say, they probably have moved off to one of those discreet frequencies that the Feds love.
The fire looks like it has good/bad potential as that area is nasty low canopy and very, very rugged and way too steep for jumpers to make any difference.
I may take a drive up that way Saturday and see if I can find some frequencies. I've sent a friend who is a radio tech for the Lassen NF to see if he knows where the action is.

We were supposed to get Tanker 910 at the Lick Fire on Wednesday.
They had it enroute from Mather, once with a 1230 ETA and again with
"left 5 minutes ago." But we never saw it....I am imagining it went
north.

Did get to see it earlier, from my home here in Tracy. It's the big
jet that is lower than it should be, flying an unusual route, and has
that telltale red belly. :>

I think they've been using Dixie Mtn lookout repeater for most of
the comm's. I too thought of driving up to the top of Smith Pk lookout
with my new toy (Icom IC-PCR2500) and see what I could catch.
But that won't workout as CDF&G has most of the area around
Lake Davis closed off due to the Pike eradication...Bummer!

Maybe later this weekend I'll try to get up to Mt Ingalls (8370+)
and get some spinning and grinning in with the new toy ;-)

Later,
Todd KH2TJ

12875. Moolight fire update

Here is an update posted about 11:30 today, 9-7-2007. Sounds like there has been little progress on the fire but I was a bit amazed that it hasn't grown more since yesterday. Cal Fire is reporting acerage at 28,520 at 07:00 this morning. The following is from InciWeb.

http://inciweb.org/incident/978/

or the Cal Fire site
http://cdfdata.fire.ca.gov/incidents/incidents_details_info?incident_id=216

Summary
The Moonlight Fire has grown to 28,000 acres. The fire is located in the Northeastern Sierra Nevada, along the boundary between Plumas and Lassen counties, predominately on the Plumas National Forest. Containment is 8%.
Fueled by winds from the north, the fire moved south yesterday, triggering mandatory and voluntary evacuations. Under the leadership of Plumas County Sheriff, evacuations have been instituted for the North Arm of Indian Valley and for small, isolated parcesl to the east, including Taylor Lake, Wilcox Valley, and Franks Valley. Precautionary alerts have been delivered to residents of Taylorsville and Genesee Valley, North Valley Rd to Pecks Valley.
Winds today are predicted to be out of the east, then moving from the south later today. Informational public meetings will held today at Greenville High School Cafeteria at 6 pm and at the Taylorsville Grange at 8 pm.
Basic Information
Incident TypeWildland Fire
CauseUnder Investigation
Date of Origin09/03/2007 at 1424 hrs.

12876. RE: [NorCalFire] CDF "on duty until further notice"

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-07 19:50:13 UTC
From: Glenn S. Jenkins
Topic: 12836 Message: 12876

North Ops and South Ops both had a "hold all personnel on duty" order

South Ops released theirs this morning.

Some units choose to just forward the email from the GACC to the stations email, while others forwarded it and also go over the air so they don't miss anybody.

Hey folks,

Just dropping by to offer a link to day one photos from the Lick Fire. None of these shots are from within the perimeter. Intention was to document the ramp up of forces as they arrived and deployed. Plus there was a serious bottle neck getting in and out of the fire on a single dirt road!

http://tinyurl.com/397f48

Hope you find these of interest. Day two coming soon.

Cheers!

Wasn't there a plan to make Dunne one-way into the fire and use some dirt road/trail out to 152 (?) as the departure route at some point early in the fire? I understand that was changed because of the damage being done to the trail/road going out. Ingress to the fire, though the park HQ, would be a real issue if anyone were coming the other way. There are places (many) not wide enough to get a Type III and a car through side-by-side.

12880. Re: [NorCalFire] Lick Fire Photos - Day 1

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-08 17:14:03 UTC
From: Craig Rose
Topic: 12878 Message: 12880

There was a discussion, but I don't think it got very far. There were several times throughout day one when equipment was unable to move due to traffic coming in and attempting to exit the fire via the park HQ. I think it was mainly a matter of time for the movement of equipment to be regulated thus reducing congestion.

Honestly, I wasn't willing to risk heading in there and getting stuck under any circumstances, and it was clear that getting stuck was a better than 50/50 chance.

Moonlight Fire
Moonlight Fire Incident Information:
Last Updated: September 8, 2007 8:00 am
Date/Time Started: September 3, 2007 2:25 pm
Administrative Unit:Plumas National Forest
County:Plumas County
Location:Six miles Northeast of Greenville
Acres Burned: 34,100 acres
Containment16% contained - 34,100 acres
Six miles Northeast of Greenville
Structures Destroyed:1 residence and 1 outbuilding have been destroyed and 1 outbuilding has been damaged
Threatened: 500 residences, 100 outbuildings
Evacuations: For current evacuation information, call (530) 238-7744 (Moonlight Fire Information)
Injuries: 5
Cause: Under Investigation
Cooperating Agencies: CAL FIRE, California Highway Patrol, Plumas County Sheriff
Total Fire Personnel: 2,476 (832 CAL FIRE)
Fire crews: 86 (34 CAL FIRE)
Engines: 137 (41 CAL FIRE)
Helicopters: 10 (2 CAL FIRE)
Dozers: 30 (4 CAL FIRE)
Water tenders: 20
Costs to date: $4.2 million
Conditions: Steep, rocky terrain, heavy fuel loading, long range spotting, erratic high winds, extremely low live and dead full moisture levels all are contributing to extreme fire behavior.
Phone Numbers (530) 283-7882 (Moonlight Fire Information)

USFS and Cal-Fire are "partners". We own aircraft, they either rent them from us or use them on a case-by-case basis. The Moonlight is in both of our DPA's, that is the only reason it is being used. Even with a 1 1/2 hour load and return time to Sac, it's a pretty cool thing. I think USFS is a bit over cautious about planes after our recent bad experiences and rightly so. I hope the DC-10 works out; it does an amazing job. Last word I had, Moonlight was at 42,000 acres and had gone from being fuels driven to plume dominated. Just overheard from the Cal-Fire side of the room, nothing official.

Jake H <yahoo@...> wrote: I'm hearing nothing either from base setup in Tehama or mobile in Shasta; even with a larger antenna 50ft up a mast. Plumas has always
been an issue for monitoring from Red Bluff. If I wasn't so busy I'd go
plant myself a few ridgelines away this weekend and take some pictures
and monitor.

The DC-10 (Tanker 910) made a few drops today on the southeast flank of
the fire. What I understand, it doesn't fly federal fires, but this is a
joint fire with CalFire and the DC-10 drops were protecting state land.
:) Way to sneak it in there.

Fire activity is the same at night as it is in day so that's making it
miserable and fast-spreading. They're begging for tankers as early in
the morning as possible to make a hit on it.
Jake

There is a great update of info on Plumas county news website. A few maps from Geomac in there even though the maps are not the most current ones for the fire. Just do a search for plumas county news. Currently not many tanker drops on the fire due to the smoke and rotor wing was also shut down for some time for the same reasons.

12885. CDF leased repeater sites?

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-08 21:13:10 UTC
From: ba_crash
Topic: 12885 Message: 12885

I'm trying to plot/understand coverage of CDF repeaters in my area, using GIS and radio propagation tools. I've found GIS data for the location of CDF-owned comm sites but the data/maps all state specifically that they do not include leased/colo facilities.

Does anyone here have info they can share about the leased sites? At minimum, I'm looking for the sites around the SF Bay Area (within range of, say, Oakland).

Thanks.

Great work as usual, Craig! I'd been monitoring since the
initial over-the-ear reports from CDF personell in the area,
and these shots really fill in the blanks in all the
maps, satellite photos, and GIS data I've been looking at
all week. And put some faces behind the voices on the
radio.

Thanks!

Plumas news is great, if you are willing to wade through all the personal posts. However, if you are a firefighter, it is nice to hear some of the things people have to say about us. A little embarrassing, but its nice to be appreciated. Wildlandfire.com is another great source.

Hey guy just got home this morning. I was at the fire on Quincy's OES engine. We switched out crews. The fire is a crazy one. It's making crowning run at night that you would normally see in the day and even wityh pretty good humidity back fires we set took off like there was very low humidity. Even this morning when we were switching crews at 6:00am it was starting to making a run. The fire is burning in all direction mostly toward Susanville. But a good run toward taylorville is still going. I may go back on weds so i will let you know any question about what i did and saw post them and i will try to get the pics my captian took posted.

Hi Dave,

Glad you found the shots to be of interest. Hopefully this was our "big one" for the season, but considering the level of intelligence out there, you just never know.

I have just uploaded another set of images - really just more of the same, but you might find them of interest.

Thanks again for your kind words!

Craig

Conflicting reports that T910 paid a visit to Redding, either for fuel or retardant. If anybody knows of 910 stopping in Redding, and/or this becomes a habit for its work on the Moonlight in Plumas please let me know. I will run out and grab pictures for everybody. ;)

Thanks
Jake

During the Lick Fire they seemed to be flying out of Mather. Stockton
was opened for reload, which is an interesting prospect since they
have jet-length runways but few jets to use them.

Yep, you did!
This from INCIWEB this morning:

"DC-10 Air Tanker made several drops yestorday on Wildcat Ridge and in the Hungary Creek drainage in support of firefighters on the ground. Hand and dozer lines have been completed in the southwest, west and the northwest portions of the fire and crews are engaged in moppin gup and improving lines in those areas. On the east and south side of the fire, the areas of Wildcat Ridge and Taylor Lake above Beardsly Grade remain areas of concern and firefighters will focus efforts there today."

12897. TGU - Multiple fires east side

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-12 19:36:36 UTC
From: Jake H
Topic: 12897 Message: 12897

What a mess over the radio.

36 IC is a fire that Lassen E14 is on. Small 100 by 100ft spot.
Powerlines down across a Caltrans fence, preventing any access to the
fire. PGE ETA is 1 hour. Tact 4 151.190

Ponderosa IC is a fire in Battle Creek Canyon - access from Manton Rd.
15-30 acres.
Tankers 94 95 48 100 and a 5th I didn't catch number
Tact 3 151.175
Air Tactics 5 151.295

new smoke on Turner Mtn - Colby and Inskip can't get a reading due to
heavy drift from Moonlight. TGU REscue 21 noticed the new smoke.
Lassen Forest is working on getting something up there to take a look.

151.370 TGU Local
172.225 Lassen Forest

Jake

From: Jake H
Topic: 12897 Message: 12899

They're finally figuring out what fire is what. For a while Air Attack thought the 36 fire was the Ponderosa fire and vice versa. These fires are right next to each other.

36 IC is still a little scary because no ground access until PGE gets on scene. Free burning, 1 acre and slow spread, lots of potential on the east side if it gets in the brush though - potential into Ponderosa Sky Ranch. Copter 205 is working that fire trying to keep it in check. Requesting additional Type 3 Engine and a crew. CHP CAD has other info.

Ponderosa IC is a huge air show right now. Ground resources have to divert around the canyon to the other side via Manton. Long response. 5 tankers and lead B56 on scene. Right flank held by retardant drops, 25 acres. There is a vista point right above this fire that would be an awesome viewing spot.

Lassen/Modoc now working a new fire in Janesville, southeast of Susanville, east of Moonlight.
S18 T28N 13E
151.280 for Air

The Turner Mtn smoke never became anything, Recon from Lassen flew over and found nothing.

Live scanner has all traffic, with TGU Local on Priority1, MNF on P2, LNF on P3 and all air and ground tacticals hearing the Ponderosa IC.

Couple of neat pictures posted today on PCN news online.

Heard some traffic today on 163.100 but not enough to tell if it was from the Moonlight fire.
Also heard PNF dispatch 170.550 tell an aircraft to go to the command freq of 168.475 receive, and 173.8125 transmit. Didn't have either of those freqs listed and not able to hear anything from my location here in Plumas county... Fire comm's been rather slow today, so went looking for the Dpt of Fish and Mame's Tac freqs while they kill of the Pike!

Later,
Todd...

I haven't heard any others, but 2675 was on the radio in or enroute to Crescent City about 30 minutes ago.

And Fortuna just told somebody that a helicopter was on its way to HUU from Yreka to check out a smoke. I didn't catch the details on either message.

Twobells,
I suppose the Zaca Fire will still have interior burning until it rains but it is 100% contained and for all intents and purposes "over with".

As for your catty remark about my posting CDF or INCIWEB reports I do that for the many folks on the fire and scanning lists who are not as adept and adroit as you and I at navigating through the various websites due to their lack of web-savy as they are often new to the "internets" or they know how to find the info but don't wish to have to take the time to hunt it down given their busy schedules.
How do I know this?
Because some of them contact me to thank me for doing that.
There are other people out there with needs other than your own I hope you realize.

12911. back from Moonlight

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-18 16:23:14 UTC
From: Brian Verhalen
Topic: 12911 Message: 12911

Got home last night after 12 days at the Moonlight Incident. I work communications as a RADO (radio operator). And since I live close by it was not a very long drive to get there (75 mile drive from home). Very interesting assignment.
We had to re-clone radios part way into the fire from the original list into 2 groups due to extra TAC ch's having to be added. Made for an interesting morning.
When the camp hit around 3000 people the first week it got a little bit crazy at the kitchen line until they opened the spike camp at Murdock Crossing, moving around 1000 to it. They closed that camp after breakfast Sat 9/16. The incident peaked out somewhere around 3400+ people.
The type 2 team was doing their shadow Mon & the type 1 is departing today. Also, a lot of engines rolling into camp on Mon for relief of the ones that are hitting 14 days there.

Brian

12912. Major hazmat, I5 at Orland

Yahoo group: norcalfire (2005 — 2016)

Topic: 12912 Message: 12912

Hazmat on Interstate 5 in Orland, near County Road 7 in Glenn County.
The interstate is completely shut down. Traffic mess all over old Hwy 99
etc.

On norcalscan.org live scanner now

154.400 Glenn County Fire
42.500 Butte/Glenn/Colusa CHP
154.340 Orland Fire Net (command)
154.265 White 2 (used for caravan)
151.370 Tehama/Glenn CDF

I'm working on gathering some 800Mhz Caltrans freqs for that area too.

Jake

Command Post was moved further east and is now at Hwy 99 at County Road
7. Numerous residences are being evacuated. Fire and decon units are
staging at Orland Fire Hall.

Added to live scanner
155.550 Glenn Sheriff
860.9875 Caltrans - Vina
858.9875 Caltrans - Willows
47.100 Caltrans lowband
122.875 CHP Air

Google Maps
http://tinyurl.com/yv564f

CHP CAD just shows sigalerts on the road closures.

Live scanner will be this incident only until Wed morning. This will be
my last update - bedtime.

Response info on Sodium Hydroxide

This material is regulated as a DOT Hazardous material
DOT Description from the Hazardous Materials table 49 CFR 172.101

Land (US DOT): Sodium Hydroxide Solution, 8, UN 1824, PKG III
Water (IMO): Same as above
Air (IATA/ICAO): Same as above
Hazard Label/Placard: Corrosive
Reportable Quantity: 1000 lbs. (Per 49 CFR 172.101, Appendix)
Emergency Guide #: 60

Spill and Leakage Procedure

Spill Mitigation Procedures: Evacuation procedures must be placed into effect. Evacuate all non-essential personnel. Hazardous concentrations in air may be found in local spill area and immediately downwind. Utilize emergency response personal protective equipment prior to the start of any response. Stop source of spill as soon as possible and notify appropriate personnel.
Air Release: Vapors may be suppressed by the use of water fog or spray. Contain all liquid for treatment and/or disposal as a (potential) hazardous waste.
Water Release: This material is heavier than and soluble in water. Notify all downstream users of possible contamination. Divert water flow around spill if possible and safe to do so. If unable to divert, create an overflow dam to contain material. Continue to handle as described in land spill.
Land Spill: Create a dike or trench to contain materials. Spill materials may be absorbed using sand, clay or commercial absorbent. Do not place spill materials back in their original containers. Containerize and label all spill materials properly. Decontaminate all clothing and the spill area using soap solution and flush with large amounts of water.
Spill Residues: Dispose of per guidelines under Section XII, Waste Disposal.**

**
Personal Protection for Emergency Spill and Fire-Fighting Situations
Response to this material requires the use of a full encapsulated suit and self-contained breathing apparatus (SCBA). Additional protective clothing must be worn to prevent personal contact with this material. Those items include but are not limited to: boots, gloves, hard hat, splash-proof goggles and impervious clothing, i.e., chemically impermeable suit. Compatible materials for response to this material are neoprene, saranex, chlorinated polythylene, butyl rubber and polyvinyl

alcohol.

Thanks Everyone for the info. We spent approx. 12 hrs on the clean-up. 1 Problem was the cocktail load in the truck. If 1 mixed with another etc. The other problem was a 4500 lb. package that had to be removed to safely facilitate the clean-up. Everything went well and I'm glad it was a cool evening.

From: Jake H
Topic: 12920 Message: 12920

Air Attack 210 and Copter 205 working a small fire on Ponderosa Way around Panther Springs. Air Attack in sight of the garden and person and quad near the garden. All units are
advised.

151.370 TGU Local
151.175 Tact 3
151.295 Air

CDF Admin seems not too happy fighting the fire near the active garden.
Jake

Somebody needs to warn the choppers not to linger over the fire too much and
if they do to bring plenty of snacks and wear a beany hats. ;-p

From: Kim Noyes
Topic: 12922 Message: 12922

I suspect most of you did not know that there is a relatively new Yahoo Group devoted to rockhounding in California's Central Coast and the name of that group is CentralCoastRockhounds.
This group is not in competition with such wonderful Yahoo Groups as LA-Rocks but is a niche group that both serves the three clubs of the Central Coast, namely, the Santa Lucia Rockhounds, the San Luis Obispo Gem & Mineral Club and the Orcutt Mineral Society AND is a forum for more specific and prolonged discussion of rockhounding issues pertaining to the Central Coast for listmembers regardless if they are actually members of those clubs and/or are regional residents or not.
Recently, we discussed biconoids, Atascadero-area brecciated jasper, La Panza placer platinum, the Honda Point Disaster of 1923 (from which I have artifacts for sale), and finally the contents of an old list of collecting sites for various material that we wondered how accurate that list still was.
We would like more input from more people on these topics.
I invite everybody, but particularly members of the three aforementioned clubs to join this group and use it as a forum for communicating and sharing betwixt to three clubs.

CentralCoastRockhounds is found at:
http://groups.yahoo.com/group/centralcoastrockhounds/.

Can we get further OFF TOPIC than this disaster. Promoting this subject on norcalfire group is way off subject and should be censured as is done on the above groups by the rock group owner.

Oh, and while we are way off topic don't forget my group, CALIFORNIA JAIL BREAKS. No news to report today.

12925. mp17 fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-09-30 20:01:29 UTC
From: twobells2001
Topic: 12925 Message: 12925

Harry and all,

I spoke too soon about the series of fires on highway 169 in Hoopa being over. Sat evening the milepost 17 fire , one acre slow rate of spread, Cal Fire, Alder camp crews, Hoopa WT and Yurok Engine worked late 3am, to return Sunday morning. Rain in area Sun am.

Joe Lacey

12926. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-10-01 10:41:17 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 12926

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

12927. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)

From: norcalfire@yahoogroups.com
Topic: 12013 Message: 12927

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

This is what I could find from the Monterey County Herald, I am presuming this is the incident that resulted in the death.

Palo Colorado fire 80 percent contained
The Monterey County Herald
Article Last Updated: 10/09/2007 10:56:31 AM PDT

A fire that spread through more than 50 acres of wildland off Palo Colorado Road is now 80 percent contained, according to representatives from the state Department of Forestry and Fire Protection.

A Cal Fire heavy equipment operator was listed in serious condition after his bulldozer overturned during the firefighting operations, according to Jan Bray, information officer for the department.

The identity of the equipment operator was not released.

The fire started about 12:45 p.m. Monday. Bray said the fire apparently originated iin a burning structure and spread quickly through brushland.

A precautionary evacuation was issued temporarily, but the advisement was later canceled.

About 270 firefighters are still at the fire site. Full containment is expected by 6 p.m. today.

The following information comes from a post on the Wildlandfire.com Hotlist -

A Message From the Director

It is with heartfelt sympathy that I send this message -

CAL FIRE Line of Duty Death -

Matthew Richard Will, a heavy fire equipment operator with the California Department of Forestry and Fire Protection (CAL FIRE), died this morning as the result of a bulldozer rollover in Monterey County yesterday afternoon.Will, 30, was battling the Colorado Fire in Monterey County on Monday, Oct. 8, 2007, when his bulldozer overturned. He was airlifted to San Jose Regional Medical Center for treatment and died this morning from injuries sustained in the rollover.

Will, a resident of Hollister, was assigned to Hollister Air Attack Base in the San Benito Monterey Unit. He started with CAL FIRE, then known as CDF, on May 19, 2003, as a heavy fire equipment operator. He recently graduated from the department's fire academy in Ione.

Immediate survivors include his wife, Diana Will, his son Trysten, 10, and daughter Elsie, 8.

Authorization is granted for shrouding of all badges for uniform personnel and the continuance of flags at half staff at all department facilities in remembrance of Matthew Will.

Additional information will be forthcoming from CAL FIRE as it develops.

Only real problem is it doesn't wash off afterwards. On the moonlight fire, it was used on several historic structures, and would not come off at all afterwards. Don't really know if it helped save the structures, but does not come off easily afterwards.

Code 1 means take your time. Usually used when not a 'official'
request, ie one officer asking another to "10-21 code 1" meaning
whenever you get a chance. I can't recall hearing a response being
dispatched "Code 1".

At 04:10 PM 10/12/2007, Gene wrote:

Long ago, at least in Dallas:

Code 1 -- Normal driving
Code 2 -- Lights, no siren
Code 3 -- Lights and siren

Here in San Joaquin County, Code 2 is the former Code 1 -- and represents normal driving. Code 3 means emergency driving, with lights/siren used as necessary.

In other places, like Santa Clara, I think they have a Priority System in which Priority 1 is most serious. But in other places, Priority 3 is most serious (to match Code 3, I suppose). Or, I've heard "we're running Priority 1, Code 3."

This is why the feds remind us that plain language makes interoperability work.

In the past, code 1 would be sometime during this shift, code 2
response would be immediate but no lights and siren, and code 3, well....
the book says lights and siren.

Thank you all for the prompt response.

It was an MVA, and so I am guessing the code 1 was a non priority response.

Got to agree with the idea that interoperability, and plain language, or at least "standardized" communication would be a good thing, but hopefully at least the agencies involved will know what they are talking about at the time.

Now I can sleep tonight.

Thanks

According to http://tuolumneradio.com/misccodes.html "Code 1" for Tuolumne County is "At your convenience," which is pretty typical throughout California, but by no means universal.

At LAPD for certain, and perhaps LASD also (per http://bassbinboy.junglescene.com/codes.htm) , "Code 1" means "Acknowledge your call." Usually used when a unit fails to ack a dispatch or other message.

"David Coursey" wrote:

Absolutely right. Although plain language still requires specific, unambiguous, and standardized words and meanings.

"Which do you want: backup, assistance, help, roll-by, or cover?"

A rerun, but the first paragraph here is a perfect example: http://www.militarymuseum.org/LARiots1.html

Code 1 is used routinely by many law enforcement agencies and for most areas means, "at your leisure..." vs. Code 2 meaning it's important and should be done soon vs. Code 3 meaning immediate with an emergency response (lights/sirens).

To be legal driving in an emergency response, in California you just employ both lights and siren all the time. While it is common to see cops and even EMS and Fire occasionally responding with lights but no siren, if they were ever in an accident driving outside the normal CVC laws, they're in deep do-do legally.

Code 1 - at your leisure
Code 2 - Important and needs to be done soon or get there soon but still gotta obey all CVC traffic laws
Code 3 - Emergency - lights & siren

My wife, who works for AMR, has been trained in occasions not to run the siren (like on the freeway, where you are outrunning it) and times when you just turn everything off and wait -- rather than push people through the intersection. They also are required to stop/ almost stop before every intersection they need to clear. I need to take a look at the CVC. :>

I'm not saying that a lot of folks don't turn off the siren... I do myself under some circumstances but to be strictly legal, California law states that lights AND siren have to be operating. You are essentially betting on the odds that nothing bad will happen that will put you in court.

As for stopping at intersections to clear before you go through, that's an agency policy, not CVC. Basically, lights and sirens do not give you free reign on speed or blowing red lights/stop signs nor do they automatically give you the right of way. They are essentially a form of asking permission. Since code 3 driving is such a high liability issue, most agencies set policies they feel follow due dilligence such as stopping at all red lights and ensuring you have eye contact with everybody before you go through or setting code 3 speed limits above and beyond the posted limit, etc.

The vehicle code requires the red light to the front of the vehicle in order to exempt it from specified rules of the road, but the siren need be used only "as may be reasonably necessary."

21055. The driver of an authorized emergency vehicle is exempt from Chapter 2 (commencing with Section 21350), Chapter 3 (commencing with Section 21650), Chapter 4 (commencing with Section 21800), Chapter 5 (commencing with Section 21950), Chapter 6 (commencing with 22100), Chapter 7 (commencing with Section 22348), Chapter 8 (commencing with Section 22450), Chapter 9 (commencing with Section 22500), and Chapter 10 (commencing with Section 22650) of this division, and Article 3 (commencing with Section 38305) and Article 4 (commencing with Section 38312) of Chapter 5 of Division 16.5, under all of the following conditions:

"(a) If the vehicle is being driven in response to an emergency call or while engaged in rescue operations or is being used in the immediate pursuit of an actual or suspected violator of the law or is responding to, but not returning from, a fire alarm, except that fire department vehicles are exempt whether directly responding to an emergency call or operated from one place to another as rendered desirable or necessary by reason of an emergency call and operated to the scene of the emergency or operated from one fire station to another or to some other location by reason of the emergency call.

"(b) If the driver of the vehicle *sounds a siren as may be reasonably necessary* and the vehicle displays a lighted red lamp visible from the front as a warning to other drivers and pedestrians.

"A siren shall not be sounded by an authorized emergency vehicle except when required under this section."

And that's followed by the "warning" that

"21056. Section 21055 does not relieve the driver of a vehicle from the duty to drive with due regard for the safety of all persons using the highway, nor protect him from the consequences of an arbitrary exercise of the privileges granted in that section."

Also, even when running "Code 3" (which is never mentioned in the CVC) an emergency vehicle does not automatically have the right of way. The right of way is obtained only when other drivers and pedestrians yield it (21806). Nowhere in the vehicle code is any vehicle or pedestrian GIVEN the right of way, but it is always stated in terms of who is required to yield the right of way.

That is a common misconception, but is not correct under the vehicle code, although it may well be many agencies' policy. Forward-facing red light is required, siren only as "reasonably necessary."

As I just noted in post http://groups.yahoo.com/group/norcalfire/message/12956 CVC 21055 (b) requires that "the driver of the vehicle sounds a siren as may be reasonably necessary and the vehicle displays a lighted red lamp visible from the front as a warning to other drivers and pedestrians."

Here is the practical legal skinny on this. Running with lights and siren entitles an emergency vehicle operator, when actually engaged in an emergency response, to violate the usual traffic laws, such as speeding, red lights, lanes, and such like that, but the driver must still drive carefully and be certain that the intersections are safe to proceed through and must also maintain the same standard of care as other drivers and maybe even higher, as negligent driving is not ever permitted.

I learned this from first hand experience as an attorney in a case that went to trial involving a motorcycle police officer who ran over a woman crossing the street. I was also involved as an attorney in another case that settled involving a police officer in a patrol car that blew through an intersection without properly clearing it first and caused an accident, even though he allegedly had his lights and siren on.

The case law developed to its current state after two fire engines responding lights and siren to the same fire on different routes collided in an intersection.

I was living in a very rural area on the north coast, and noticed that the private ambulances here would run with their sirens on even at 4 am out on nothing-dirt roads where there weren't even any animals for miles, much less vehicles.

I stopped by the ambulance base and asked them about it, and the manager told me that their insurance company required continuous siren, even though the vehicle code didn't. They had gone so far as to install an extra electromechanical siren just in case their electronic sirens pooped out on their VERY long runs.

I don't get what that means. Why are fire engines given that
exemption when they're being operated from one place to another but
not to the emergency call?

Move ups. Get a number of calls going in a given area and you want
additional resources in that area fast.

That would be for "move ups," when engines are sent to cover stations that have been emptied due to a fire. When there's a significant fire, they try to spread the remaining equipment such that no areas are completely stripped of engines.

Depending on the circumstances and their procedures, sometimes they'll be sent Code 3, and sometimes not. LAFD, for instance will say either "Engine 13 move up emergency to Fire Station 11" or "..move up non-emergency to Fire Station 11."

Here in Humboldt, which you're familiar with, when there's a fire that uses up Eureka's resources, you'll often hear them send a Humboldt Fire Dist engine to "Move up to Carson for coverage" - That's Carson Park at Harris and J, which gives them pretty good response to any part of the city.

From: nitrobear@comcast.net
Topic: 12937 Message: 12964

Granzella's is pretty much destroyed from what I've heard on the drive by media and one friend who was there. I heard that they managed to save the
1K LB Polar bear mount and some of the other mounts in the sports bar.
God, what a shame. This is really going to piss off a whole bunch of water foul hunter folks, not to mention a lot of us who visit it on a regular basis. They are going to rebuild thank God.
Granzella's is a Major employer in Williams so this is bound to hurt in that little burg.
I've always bugged them to put a branch in Chico...Great Deli!

What's burning in Williams? Willows just responded with Truck 4 (Ladder Truck). The directions given could put it at Granzella's. I sure hope not! There are other structures in that area, so it could be something else.

12965. So Cal Fires

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-10-21 20:46:15 UTC
From: twobells2001
Topic: 12965 Message: 12965

Sunday 11:30 am, HUU committed ST 9126 Golf to So Cal, also 1 crew from each camp in unit.

After 11 inches of rain in last month, seems we could committ more resorces.

Also Cal Fire must have more money, seems stations are open longer, and seasonals on longer. Cal Fire is responding with locals to every cough and ache, and burn barrel smoke. Seems a waste of resources.

In past years CDF had a fight just to open some stations for the summer season. Now there open year round.

Mr Lacey,

If you were in Southern Cal today, you would know why their season goes longer. Approx. 8 new starts in the last 45 min. all with 25 to 35 mph winds pushing them. Fuel is so dry, burns pretty good against the wind also.

Also as a heads up to the group here, Fox News Channel has shown several AMAZING shots of the DC10 tanker with video of it and full drops that seem to go on forever!! What an amazing tool that thing is.
Fox is providing a lot of live, real time coverage along with CNN.

Butte County Public Safety Scanner should be relaying this shortly
today. I've been maxed out at 60 listeners all day today. :)

Check it out at:

12982. San Diego live scanner update

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-10-24 01:53:56 UTC
From: Jake H
Topic: 12982 Message: 12982

The new link for Nick's shoutcast scanner out of San Diego is now at
http://www.shoutcast.com/sbin/shoutcast-playlist.pls?rn=5559&file=filename.pls

Instead of trying to hunt for a free opening on one of the contributing
relays such as norcalscan.org or thenet411.net we have combined all of
our resources into a giant pool so listeners just click one link and it
will automatically find an open spot on one of the relay servers. I
think the pool is currently capable of supporting 450 listeners and
growing?!

Now lets hope that the host scanner doesn't have to evacuate too soon...

You have to download Winamp or one of the other programs listed along the left side of that page below the "Listen" link. I tried one of the other players, but didn't work for me so downloaded Winamp and it opens the link right up!

Do you know if these resources are going to the fires, or moving up to unstaffed stations such as in NorCal? For instance, CDF Humboldt has reportedly sent *all* of their engines, plus both of their dozers, their helo, and 12 fire crews.

12990. RE: [NorCalFire] NW Mutual aid to California

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-10-24 21:10:01 UTC
From: Larish, Michael
Topic: 12987 Message: 12990

According to today's newspaper article, Butte County (between County resources, Cities of Chico, Paradise and Oroville), has sent 80+ fire personnel south along with dozens of apparatus and a large number of the battalion and division chiefs. That's a large slice of the county's total resources.

From: Steve
Topic: 12992 Message: 12992

Fire crews from the Seattle area are being sent to Southern
California to assist crews already on the scene.

http://www.kirotv.com/news/14412059/detail.html

We all know this is a mutual aide effort from various agencies. Are
crews that are working the same incidents able to communicate with
each other even tho they're not from the same agencies? How are
communications being handled?

Greetings from Bainbridge island Washington
Steve

12993. NorCal fire season re-activated

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-10-26 05:48:18 UTC
From: Jake H
Topic: 12991 Message: 12993

Earlier this week fire season was reactivated for most of the Northern Region. We are stretched thin, grasses already dry from the last major storm, and tonight into Friday some gusty dry north winds picking up. Talked with a CDF Asst Region Chf and while he says our northern guys are kicking serious butt down south, we're starting to get a little worried up here.

The trick to keep people from burning after all the newspapers said to burn? Strike a deal with Air Pollution to make it no-burn days until further notice. :)

My online scanner will be devoted to fire still until this second round is put to sleep. No rain in the north valley 10 day forecast. SHU dispatching a veg fire in Burney as I type...

Jake

From: Cap Pennell
Topic: 12991 Message: 12995

Of course anything will burn with enough oxygen, wind, but the days are getting shorter. Without enough daily fuel heating, as the sun is lower in the sky and days shorter, wildfires are more likely to slow down even when the fuel is dry.
That said, a few of the Santa Cruz Mountains' biggest fires historically have been in January, when the heaviest (Coast Redwood, Douglas Fir) forest fuels have been still dry inside from long Summer combined with one of California's gradient wind (offshore flow) incidents drying and warming the lighter fuels from the skyline to the sea.
Happy Halloween!

Cap

13002. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-11-01 10:31:00 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13002

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

13003. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-11-01 10:31:00 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13003

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

Does anyone here know what "mutual aid" frequencies the Contra Costa "Con Fire" units have available. I know they have CALCORD but I wonder if they have the OES, CDF, FIREMARS and the like?

Anyone?

Neil

Neil -

Con Fire, like most CA fire agencies, has the California Fire Service
standard load of 155+ standard channels in their rigs.
To my knowledge they do not carry 800 MHz radios, so no FIREMARS.

Fire is still holding at 5 acres with spotting outside the lines. 3
additional engines and a water tender. Tanker 05 has done at least 3
full drops and is on another load and return. Copter 510 still working,
should be getting fuel at Benton Airpark shortly.

I've driven through this area and along Chaparral drive south and it's
ugly IZone, no clearance. But this is on the north side of Placer around
the water tower. North and west of the water tower is wide open wildland.

2nd Type1 copter out of Chester now responding.
Engines keep arriving at scene from various areas of Shasta. TGU just
sent engine (request echo 11) and hand crew (request charlie 5) up to
the fire.

Apparently it was a permissive burn day in Shasta county? Whoops

13011. Re: [NorCalFire] SHU - Chapparal IC Redding (was Igo)

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-11-03 23:13:32 UTC
From: Jake H
Topic: 13005 Message: 13011

Air Attack is very happy with the last few tanker drops from the heavy 05. He's on load and return but air attack thinks that will be his last drop. Getting upper hand on spotting. If you load the link I sent earlier into Google Earth, you can see the terrain and ridge they're working on, with the water tower and houses all around.

Chester copter still responding. Now Air attack holding Tanker 05 at base so retardant isn't wasted.

Should be my last post unless something pops loose.

Shasta working a fully involved mobile home, was able to get a person out - person in critical condition, requesting 3 additional engines, fire moving up the hill.

Rock Creek Road at Stardust - just north of the town of Shasta on 299W. This can be scary if the wildland gets loose. Hasn't burned in my memory.

From: Jake H
Topic: 13017 Message: 13017

This is Little Giant Mill Road 2 miles past pavement, the N line and the 90N line, east of town of Paynes Creek.

20 acres, light wind, no torching or spotting at this time. TGU has water tender all call, all 3 dozers, and at least 10 engines rolling. 3 or 4 Ishi crews also rolling.

Copter 205 working it with Air Attack 240 and Tanker 91 out of Redding. Copter 510 enroute and a Type 1 copter out of Chester is 15 minute delayed response, but will be cancelled depending on fire behaviour in 15 minutes.

Nice straight column seen from the valley floor.
On norcalscan.org live scanner. This will be my only update.

13028. Eureka & HUU Firefighters headed south again

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-11-20 17:36:28 UTC
From: Mark Ward
Topic: 13028 Message: 13028

http://www.eurekareporter.com/ArticleDisplay.aspx?ArticleID=30879

"Operations Chief Jim Yarnall from the Eureka Fire Department said the department's Office of Emergency Services engine was recalled to the south state, not long after its return from the fires in late October.

"The state engine, with four EFD firefighters aboard, left Eureka early Monday, and will rendezvous with other OES resources in Yuba City before heading for Madera ? and then possibly to San Bernardino, Yarnall said.

"...Cal Fire's Humboldt-Del Norte Unit sent numerous resources down Saturday, including four strike teams of hand crews and one strike team of five engines. Helicopter 102, which hadn't yet returned from its firefighting assignment in October, would continue on in Southern California."

13029. OT Fire alarm boxes in Grass Valley / Nevada City ?

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-11-25 05:58:26 UTC
From: Harry Marnell
Topic: 13029 Message: 13029

When I dispatched for Grass Valley PD in the early 80s, both Grass Valley and Nevada City still had fire alarm "pull" box systems in service. Are they still in use? I think I saw an article a couple years ago that GV's were being removed.

Thanks,

Harry Marnell

Still there as far as I know, haven't been downtown in a while but will check next time I am. Man, if they rip them out I'd sure like to get my hands on one.

Thanks very much, Ray. From the 3rd article, it looks like Nevada City decided to keep theirs in 2002... "council members opted to spend the money to fix them..

"This amounted to about $70,000, said Nevada City firefighter Kevin Cartzdafner. Since then, while the maintenance costs for the system remain low each year, "we haven't had one fire call yet," he said."

13040. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-12-01 11:26:00 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13040

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

13041. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2007-12-01 11:26:00 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13041

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

13042. Another Fire List - Dramatic Narration from Oct 2007

MVA - Hwy 70 at Golden Eagle Drive, just west of Quincy. Fuel tanker off road against embankment, attached fuel trailer over turned and ruptured leaking a diesel fuel / gasoline blend. Potential spill could be 1500+ gals. Spanish Cr. threatened.

Hwy 70 reported closed at that location. Extremely icy conditions reported in the local area.

Quincy Fire, PCSO, CHP, OES, F&G, Plumas Cnty Haz-mat all responding, along with other resources.

The fuel tanker has been righted, remaining fuel removed, and vehicle
rmoved from the scene without incident.

Hwy 70 has now been reopened.

That sounds like a lawsuit waiting to happen. Woman calls 911 for medical. Asks for silent approach. FD Chief says no siren, no response. Woman has some reason for wanting a silent approach. FD doesn't respond. Woman dies.

Family member comes by later that night to visit, finds woman DOA.

Calls 911. "Oh.. uhhh... yeah, sorry about that, she called a few hours ago, but wanted the fire department to come with their siren off, but they Chief said no, so no one responded."

Out in the civilized world this is handled as "silent approach" in which you run Code III until you get close to the incident and then handle the last X of the run Code II. Where X is enough that the neighbors don't notice the lights and siren as you come on-scene.

While I agree that if you have an "emergency" you should expect Code III, there are lots of people who find an ambulance embarrassing. I think most of these are older folks who have needed the ambulance on multiple occasions. I can appreciate their not wanted to wake up the whole neighborhood at 2am because they have chest pain and the nitro isn't working as well as it ought to.

Topic: 13046 Message: 13050

Since several years ago when fire started being dispatched with ALL private ambulance calls. There has tended to be, in my opinion, a abuse of the fire and ambulance service. People are using it for a taxi service.

Instead of going to the emergency room on your own, for non emergency issues when there could be a 3 hour wait, call an ambulance. You get to the hospital and get to "cut in line" in front of all the people in the waiting room. Unfortinately the fire depts get called out on these calls also. Many calls are non emergency issues, but add the kicker, oh and ugh, difficulty breathing, this gets the services moving.

I recall one recent case of a "regular" who the first officer on scene reported "you can reduce code, I can see her through the window playing cards with a friend".

Some years ago CDF had a policy of responding to life threating calls only. I think this is the policy our local fire services are going to have to adopt. The ambulance will still respond to ALL CALLS with their full time paid staff.

13051. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-01-01 11:27:36 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13051

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

I can appreciate their not wanted to wake up the whole neighborhood at 2am because they have chest pain and the nitro isn't working as well as it ought to...

On medical calls at 2 am, I usually find that having a Type I fire engine, ambulance, and police car parked and idling in front of the incident address is enough to arouse the neighbors' interest.

Yes, but they don't wake the whole neighborhood. I am not saying this is a good thing, I am merely reporting what I understand the facts to be based on my experience as a reporter attending incidents and my wife's driving one of those noisy diesel ambulances. In reality, they don't generally run the siren once they enter a residential area anyway, except for a quick blast if required to get someone's attention.

I'm with a volunteer fire department, and obviously we respond in our own personal vehicles generally right to the scene for the most part (at least once we've heard one of the engines responding).

Since not all the volunteers respond on the air, often at a medical call, the IC or chief has often put out an additional page telling the volunteers to stop responding.

Lots of people is good if you've got a person thrown from a horse, and you're getting ready to call in a air ambulance, but when you've got a elderly lady who fell out of bed, and maybe just needs some O2, and you've got 12 volunteers showing up... it's overkill :)

I thought I heard they had been closed down.

That was a great two day school, and they had a great facility. Taught about two hundred firefighters a year. Tremendous confidance builder You left that course and could direct and face a gasoline tanker fire on the highway, auto or propane tank.

How in the heck do they expect firefighters to gain experience without a hands on real deal training. It would probably save air quality and the other concerns in the long run. By addressing and controling the situation quickly by trained personel.

Although in Central California and not Northern California, there was a vegetation fire on one of the ranges at Fort Hunter Liggett in Southern Monterey County earlier today.
Wildfire is quite nearly a year-around phenomenon here in California as you well know although less so the further north one gets.

This past weekend I have heard wildlands/vegetation fires in San Joaquin, Mariposa, Stanislaus, Tuolumne and Lake counties...It may be the brush, it may be the people in it doing foolish things, but it burns when fire is applied.

When you consider the fine weather, and the movement of people on holidays, along with all last years unburned fuel....it's no surprise.

With cutbacks in fire staff, and budget shortfalls, I don't doubt 2008 will be another wild ride too.

From: nitrobear@comcast.net
Topic: 13066 Message: 13071

Thanks all,
I may not have emphasized that I heard this coming from REDDING which has had more rain, maybe even some show...more than Chico. It's not unusual to see some wildland fires this time of year, just not when it's this wet. I've reset my shop scanner, just in case! :-)
I have installed a personal weather station here at my location in NW Chico. The wind values may not reflect Chico as I have a sheltered location. I have calibrated the other sensors accuratly.
You can access it at the Weatherunderground, (WU) Personal Weather Stations site at:
http://www.wunderground.com/weatherstation/WXDailyHistory.asp?ID=KCACHICO9

It will be up as much as I can keep it up when I'm here. You can send me a message or suggestion at te WU statuion site.. It's been up for three or four weeks...I'm amazed at the hits on it so far!
If you have comments or suggestions, please keep them off this reflector and I'll do my best to sort them out. Patience please...WIP

Chico Rain as of 06:40 PM tonight is YTD 18.23" since July 01, 07. A Lot more coming this weekend "they" say.
Nitrobear

---------- Original message ----------
From: Gene Salvetti <apollosfyre@...>
This past weekend I have heard wildlands/vegetation fires in San Joaquin, Mariposa, Stanislaus, Tuolumne and Lake counties...It may be the brush, it may be the people in it doing foolish things, but it burns when fire is applied.

When you consider the fine weather, and the movement of people on holidays, along with all last years unburned fuel....it's no surprise.

With cutbacks in fire staff, and budget shortfalls, I don't doubt 2008 will be another wild ride too.

Gene

13080. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-01 12:19:44 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13080

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

13081. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-01 12:19:44 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13081

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

13082. New Tac frequencies for Arcata Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-06 07:24:28 UTC
From: Harry Marnell
Topic: 13082 Message: 13082

Today the FCC approved two new tactical frequencies on the Arcata Fire Protection District's KAR819 license:

151.1225
155.7675

These are "narrowband" frequencies and many scanners won't display the four decimal places correctly, but round them off to something like 151.125 and 155.77. You should still hear them OK if you're in range. No repeaters on these freqs.

I don't know how soon they will go into service, nor which of their current (shared) tactical frequencies they'll be replacing.

Harry

13083. CA-Quincy Fire Protection District-Explosives Call

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-13 00:38:23 UTC
From: engine242
Topic: 13083 Message: 13083

Local fire and law enforcement are out on an explosives call on the west side of Quincy. Fifty (50) sticks of sweating dynamite was found in a residence in a local trailer park.

Evacuations of the immediate surrounding area have taken place, evac shelter located at the local Veterans hall in Quincy. Hwy. 70 closed at a half mile either side of the incident.

Bomb Squad has been requested for explosives removal, enroute from either Sacramento or Stockton (unknown which one at this point).

Quincy Fire, Plumas County S.O., CHP, PDH Ambulance on scene. USFS-PNF and CalFire BTU had been assisting.

The scene is basically under control at this time (as much as it can be anyway), awaiting arrival of explosives disposal personnel.

I just heard about it on the local radio, but didn't know what exactly was going on over there. I only heard that Hwy 70 was closed and diverting traffic onto Chandler Road. You guys get the interesting calls over there. I remember the same thing happened a few years ago just behind the courthouse. Keep safe out there

13086. Re: CA-Quincy Fire Protection District-Explosives Call

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-13 17:02:11 UTC
From: engine242
Topic: 13083 Message: 13086

This situation has been dealt with. The bomb squad arrived yesterday evening and spent the night transporting the explosives from the residence where found across Hwy 70 to the far side (NNE side) of the Quincy Airport. Once there the dynamite was burned, and the other explosives (fireworks) were detonated (I'm unclear on how they disposed of the chemical explosives found). Several explosions could be heard in the Quincy area this morning from the disposal operations.

It should be noted that the explosives found were not "planted". It appears that they were found near a residence where the previous occupant (who had passed away approximately a year ago) had apparently had them stored, and they weren't known of until found yesterday. Fortunately they were found prior to a disasterous event occurring. Local officials have said that had those explosives detonated where found, considering the amount found, it could have conceivably leveled everything in a 1/4-1/2 mile radius.

More information is provided with the link I included in my previous post on this incident.

13088. Potential large aircaft down incidend...man!

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-23 01:12:47 UTC
From: nitrobear@comcast.net
Topic: 13088 Message: 13088

Hi All,
I walked in from a road trip and fired up my scanner yesterday just before the dispatches started for the "Potential large aircraft down". I couldn't believe what I was hearing! A C-130 down in the Magalia area? Holey ****!
I sat down and opened up the scanner. Darn near everything was moving up that way in a real "chaotic" hurry. Nobody know for sure if this was real. Apparently, the C-130 had, for some unknown reason been making low passes during the day in Chico. The RP in the Magalia area was damn adamant that it had gone down as she saw it clipping the trees!
The BCSO fired up the chopper and went to have a look. I heard the chopper pilot report a "broken tree top" but that the tree that was broken was dead. He surmised that maybe the "prop wash" could have broken the top off. (prop wash, AKA Jet blast from the 4 engine C-130!)
Here is what amazed me. If a C-130 had crashed, you gotta believe that the United States Air Force would be ALL OVER IT and that they would be swarming to Butte county to find and secure the crash site, wouldn't you? (black helicopter, black SUV's, guys with machine guns)
I think I heard thd dispatcher comment that they were looking for the Air Force phone number but they didn't have it to check with them..GROAN
I guess the Major who was driving the C-130, went up and landed safely in Reno. Apparently he and the BC dispatcher "talked" and he was "adamant that he didn't hit any **** trees"!--
I'm just reporting this as a bit of "Gallos humer" as we approach the busy season. This one was a great hoot, once I realied that a C-130 hadn't actually crashed on the ridge.
I would have thunk that if it had, there would be a bit off smoke? Unless he ran out of fuel of course.
:-)

13089. LAFD LODD

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-27 01:55:04 UTC
From: castriketeam
Topic: 13089 Message: 13089

Dear Friend of the LAFD,

It is with great sadness that the men and women of the Los Angeles Fire Department share word of one City of Los Angeles Firefighter dying this afternoon in the line of duty.

On Wednesday, March 26, 2008 at 1:57 PM Los Angeles Firefighters were summoned to investigate smoke in the 8800 block of South Sepulveda Boulevard in the Westchester area of Los Angeles - not far from Los Angeles International Aiport.

While Firefighters were performing their sworn duties, an explosion occurred, causing injury to two male Firefighters and one civilian.

One of the injured Firefighters later died at the Centinela Freeman Regional Medical Center, Marina Campus.

The other Firefighter and civilian are being treated at area hospitals.

As dictated by Fire Department policy, a formal and detailed multi-agency investigation is underway to determine the exact nature of the explosion, as well as the precise cause and manner of the Firefighters death.

The men and women of the Los Angeles Fire Department thank you for your kind words and sentiment at this time of overwhelming sorrow and immense loss.

13090. BUTTE: Multiple incidents

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-03-29 07:46:30 UTC
From: Pamela Alley
Topic: 4919 Message: 13090

Traffic collision, Hwy 99; requesting two air ambulances; upgrading patients from moderate to major.

Multiple structure fire on Colusa Highway, water tender all call and second alarm sent.

Live wires down over Hwy 70, between Palermo and Grover Roads, Hwy 70 closed.

And just to make life REALLY interesting for a few minutes, there was a report of an additional structure fire on Coulter Rd up in Paradise--a false alarm, thank Heaven.

Question for the firehounds: Why are water tenders so difficult to get out and hauling ASAP when a call goes out?

It takes an engineer to drive the watertender and many of the smaller stations don't have many engineers. You may have 10 firefighters and 3 engineers to a small station. When the pager goes off, maybe 1 or 2 engineers respond and they pick up the engines. That is why you sometimes can hear an engineer get on and ask dispatch if they should respond with the second engine or grab the watertender.

Plus in Butte, most watertenders are driven by the "company"... so it takes a volunteer, who is also an engineer, to leave his/her house, drive to the station, and pick up the rig.

Also water Tenders have air brakes, which takes time to build up the air to a operating pressure. It's mading sitting there for the 2 minitutes or so waiting to go.

Pam,

An Engineer is a firefighter who has received extra training in the operation of Fire Apparatus. This includes pumping water, aerial operations, and Emergency Vehicle Operations. They are responsible for the apparatus they are assigned to on their shift. Some departments take this as far as having two classifications, one for engines and one for aerials. They have a Commercial Driver's License (CDL) equal to the apparatus they operate. Most Fire Engines and some Water Tenders require a class "B" license. Aerial Trucks and some Water Tenders require a class "A" license. There is also a restricted license for each class that restricts the licensee to Fire Vehicles Only.

Tim

I am a volunteer in Tehama county...and I can drive an Engine, but not a Water Tender, because on my Class B I can only drive an Automatic...If a Water Tender is a manual transmission, I am not license to drive it.

13104. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-04-01 12:48:52 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13104

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

13105. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-04-01 12:48:52 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13105

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

13110. Vegetation fire-Plumas N.F.-Forgay Pt. area

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-04-04 02:15:57 UTC
From: engine242
Topic: 13110 Message: 13110

At approximately 1800hrs, the PNF and Indian Valley Fire responded to, and are on scene of, a vegetation fire off of Pioneer Rd, near Forgay Pt., in the Greenville / Indian Valley area.

PNF DV2 arrived on scene along with local fire personnel and reported a 1/2 acre fire with slow ROS, burning in grass and Oak litter, and underneath some high tension powerlines. DV2 anticipated few problems with containment, however, there will be extensive mop-up.

PNF DV2 & DV5, Batt. 21 & Batt. 25 responded and two PNF engines (I believe 1 each from the Mt. Hough RD and Greenville RD) were being put together and crewed to respond. 1 engine requested was to be a 4x4)also responded or were enroute. Indian Valley fire responded with equipment, personnel, and at least 1 engine & 1 water tender, I believe.

This sounded like it was going to be one of those spring, warm-up type incidents, quick knock down & lots of mop-up.

Also, on a side note, at approximately 1900hrs, Quincy Fire was dispatched to reported lines down and burning on the west end of Quincy. Upon arrival Quincy fire discovered an underground electrical fire burning through the underground lines. Quincy Fire is staging on scene and awaiting arrival of PG&E before suppression action can be taken. CHP & PCSO are also on scene assisting with traffic control and keeping the general area clear. Power is out in that area of town, which has also caused at least one bank / business alarm system to activate and add a little more confusion to the evening.

As a old smoke, I can't tell you how many springs, I've heard the same words, "Gonna be the worst season ever."
It's part of getting the gear out and ready for the upcomming summer.

Right, no news this time of year.

Real dry? Big season due to extreme low fuel moisture.
Real wet, or late rain? Big season due to extra load of flashy fine fuels (tall thick grass and more small leaves).

Any way, big season coming, so be extra careful and safely prepare!

13117. Northern California Ghost Town Destroyed By Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-04-09 20:08:26 UTC
From: Kim Noyes
Topic: 13117 Message: 13117

*Kim's note: I was unaware there even was a ghost town called Janesville/Gas Point.
Does anybody know how this place out in the middle of nowhere burned?
Being a history buff and lover of ruins these sorts of incidents make me sick.

Northern California ghost town destroyed by fire

*Associated Press - April 9, 2008 2:14 PM ET *

REDDING, Calif. (AP) - The last five buildings in a California ghost town have burned to the ground.

The buildings in Gas Point, in southwestern Shasta County, were engulfed in flames when firefighters arrived early Tuesday. Investigators don't know what caused the fire.

Sorry Kim,

No word on what happened as far as I have found. I found a clip about it in the news the morning it happened, and they were no yet called "historic" or termed a "ghost town". It just said "several dilapidated buildings were destroyed on Old Gas Point Rd." Since then it's become a history thing, but I guess the local news didn't see it as much of a loss at the time.

Just goes to show, one guys party shack is another guys treasure. It's a shame. There has been some talk of the state closing up some of the "living" ghost towns like old Columbia, and Coloma...costs too much to keep em' on life support.

Hope they don't see a similar future.

I wonder how much of that talk is designed to simply extort more tax money
out of us so we can keep our beloved parks open.

This is a few miles past my office on the other side of the creek. ;) It has plenty of historical value, and the shasta historical society I think was working on a local designation or something, but it was definitely very dilapidated and nowhere safe to be around. Way out west in the far southwestern tip of Shasta County at the base of the foothills and Cottonwood Creek watershed. Fire at 1130pm on a Monday night. Too far out for bums, too late on a school night for kids (and most kids out here respect this kind of stuff), no natural source of ignition. Who knows. I've been out there taking some pictures years ago. Gotta go find them now. It wasn't really anything special to anybody except local people.

13121. California Ghost Town-Natural Fire?

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-04-10 20:48:03 UTC
From: Jim
Topic: 13121 Message: 13121

Destroyed by a "natural" cause of fire?

I can only think of a few natural causes: Lightning, volcanic, geothermic. I'm sure that there are a couple of others but none come to mind at the moment. Given the place was abandonned, I'll put my money on the most common cause. Man.

Jim

Topic: 13133 Message: 13137

This morning Salt Creek crew and at least two Lake/Napa Unit engines went up. Tehama ECC gave it as CDF Command 2 (151.265), with numerous tacticals but to show up SHF Forest Net 171.575 for further. Kinda interesting to have a CDF command repeater on a forest fire.

I was watching a lot of smoke in that area over the past week with some prescribed burns.

We're getting intermittent showers and even a little snow at about 1500' here in Humboldt, so hopefully you'll get some moisture from us within a few hours.

Other than a few CalFire messages, I'm not hearing any traffic about it, not that I'd expect to.

I've got a question I hope someone has an answer for...

Harry gave a command freq of 151.265 for the incident.

Is there a breakdown on what agencies use what command channels in Calfire?

I would love to be able to set those up in their applicable areas, but radioreference gives a very general listing.

From another group, I stole some photos I thought would be of interest to this group. I posted them in the photos section under tanker 910.

The photos are of CDF/CalFire contract tanker 910, in action and some close ups of the left wing after a close encounter with some tall vegetation!!!

Also I can post a pdf if requested of the details of the contract of 910, dates of availability, use, costs, etc. In case your Department needs to request it, mutual aid, from Cal Fire of course for the cost.

Shameless plug but norcalscan.org has had the command repeaters and
their service areas listed for quite a few years.
http://fire.norcalscan.org/cdf/cdfuse.htm

The only agency to use/authorize those command channels is CalFire. Of
course any agency responding mutual aid to a state incident that has
that command channel activated can use it also. Let me know if that
doesn't answer your question.

Look on about page 96 of the manual:

Selecting CTCSS/DCS Tones

MENU > Program System > F
* Select the conventional system > F
* Edit Group > F
* Select the group or New Group > F
* Edit Channel > F
* Select the channel or New Channel > F
* Set CTCSS/DCS > F

At this point you can scroll to Off, Search, CTCSS, DCS, or Set Lockout.
and
select the subaudible frequency in the CTCSS range or the DCS code.

* CTCSS or DCS > F

This setting controls how a sub audible CTCSS or DCS is used for the
channel.
Select your setting, then press F.

Off - any signal opens squelch. The default setting is Off.

And you would use this to "get" the tone, if there is one:

*Search - the scanner searches for and displays any CTCSS or DCS tone
that accompanies the transmission*

13153. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-01 11:52:57 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13153

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

13154. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-01 11:52:57 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13154

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

13155. Fuel vs response

PA

Gas Cost Spike Has Firefighters Changing Response
Big Fire Trucks Won't Roll On Every Call
VISTA (AP) ?
Spiking fuel costs will soon change firefighter responses in the San Diego County community of Vista, where huge fire trucks will stop rolling on every emergency call.

A new "priority dispatch system" will determine if those big engines are needed on calls. Fire Chief Gary Fisher says dispatchers at the North County Dispatch Joint Powers Authority are now being trained.

Currently, firefighter and paramedics crews respond to all emergency 911 medical-aid calls. The priority system has dispatchers asking 911 callers a series of questions to determine the amount of emergency personnel needed.

Sounds like they're just doing regular EMD. CCEMSA has been doing that
for years. Fire only rolls on "Priority 1 Medical" calls, which are
any compromise to the ABCs, i.e. Cardiac, Difficulty Breathing,
Choking, severe bleeding, etc. or if the EMS unit has an extended ETA.

Fire is at SR 96 postmile 24.50, which is about 1 1/2 miles north of
the Hwy 169 junction. The CDF units have quite a drive, as it's
roughly 60 miles from the 101/299 interchange in Arcata, plus their
drive to that point. I heard some traffic about crews from High Rock
and another camp, but didn't pick up the details.

Anybody know the weather up there? It's all fog/clouds in Eureka.

13160. Re HUU Vegetation fire - Weitchpec "Bridge IC"

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-06 05:22:04 UTC
From: Harry Marnell
Topic: 13160 Message: 13160

Yurok's utility is still the only person onscene at 22:12, but HIA E564 just now reported enroute, plus Alder Crew 5 and High Rock Crew 1 responding, probably at least 2 hours ETA.

Jake just posted the current weather obs, and at Orleans the high today was 85? no precip.

> awaiting delivery of the brush engine, E8239.

Sorry for the delay in replying, Mark. Yes, all three Ferraras are in service. Type-3 "Brush" engine 8239 (2007 Ferrara, 4x4, International chassis) is at Mad River Station. That "benefit assessment" vote was the best thing that's happened for them in a long, long time, three new engines and 24/7 staffing at Mad River and McKinleyville stations

The new narrowband tac frequencies, 151.1225 and 155.7675, are scheduled to go into service next Monday, May 12. They will replace the tac frequencies they've been sharing using until now: Willow Creek's 153.83 and 154.31, and Petrolia's 154.145.

Also, Eureka FD and Humboldt Fire District #1 will be going to the countywide numbering system soon, EFD will be 8300s and Humboldt #1 will be 8100 series. A number of departments are using the system already, but I haven't kept track. Has anyone?

Harry

13162. TGU Veg with torching - Colyear Springs

Yahoo group: norcalfire (2005 — 2016)

Topic: 13162 Message: 13162

Colyear Springs Road at Raglin Ridge. Staging at the Burroughs Ranch
which is just west of Lowery Road on Colyear Springs.
http://maps.google.com/?ie=UTF8&ll=40.033989,-122.638021&spn=0.023231,0.03974&t=h&z=15

TGU Local 151.370, Colyear IC 151.175 (on live scanner norcalscan.org)

Control burn on private property has been burning since Sunday. Putting
up a lot of good smoke. It finally went berserk tonight when the winds
picked up. TGU response with 3 Salt Creek crews, multiple local gov
engines from the west side, some Type 3's and a couple of dozers. This
is in addition to the private dozers that belong to the property (who
happen to be Ehire dozers and have fire radios in them). Total of 6 dozers?

At 2215, winds on the ridge are gusting ENE at 18 with RH of 56. Valley
winds peaking at 27 out of the NW. Good glow and flame lengths seen from
the west edge of Red Bluff. Extreme torching of some trees that
practically triples the glow intensity once every minute or so.

AA 410 and Tanker 82 out of Columbia, as well as Tanker 76 diverted
from the air attack "class" taking place in Redding this week. I just
saw AA returning back to Redding out of my office window 20 minutes
ago. I believe Copter 205 and its crew is working it as well. It is
terrain that I wouldn't want to be driving a dozer through at night.
Very steep canyon walls and gullies everywhere.

Winds picking up again in Cottonwood for the afternoon.
Jake

13168. BUTTE: Vegetation in Feather Falls area of Oroville

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-15 16:18:12 UTC
From: Butte County Public Safety Scanner
Topic: 13168 Message: 13168

There is presently a wildfire burning above Oroville in the Feather Falls area. It had been contained but the winds last night kicked up a bit and now it's making runs and showing increased torching and crowning. There has been talk of closing the Feather Falls recreation area due to blowing embers. On site commanders are requesting air resources but are being given extended ETAs due to other area fires. Two tankers and two helicopters are on order. The fire is presently making major runs in every direction and the radio reports by scene commanders are growing more and more concerned. This is definately something to keep an eye on. More info as it becomes available.

Scene commander reported in with approximately 20 acres and concern for the increased winds from the east that are forecast to start very soon. More resources are being called for. Can sort of be heard on the Butte County Public Safety Scanner but it doesn't appear to be on a repeating freq so it fades in and out. Sorry.

I just received a call from the PIO of Butte County Fire and the fire has blown up to 50 acres and the winds are howling. More and more resources are being requested and a third tanker is on order. It sounds like this is going to be the first big one in Butte County this year. Fortunately, the area is pretty remote and there are no structure threats at this time but if this can't be knocked down soon, it could be trouble.

Extra engines responding are reducing to code 2 or canceling. The
school shelter-in-place should be for smoke only. Sounds like the
structure fire portion is knocked down now. Quite the little chaos
call for the city. I'm stuck at work out of town.

And now S&R is performing a TR at the Kelly Ridge Visitor's Center for a patient complaining of heat exhaustion and chest pains. When it rains, it pours. Good luck, Mike.

Tom - you should be able to hear the command on Butte Support 154.415. They're using the Sunset Hills tone though and I've heard that's hard to hear from anywhere in the north.

Butte SAR doing the evacuations on and around the trailhead. They're anticipating lots of hikers due to the amount of cars at the trailhead. 155.940, 155.160

>
> I just received a call from the PIO of Butte County Fire and the fire has blown up to 50 acres and the winds are howling. More and more resources are being requested and a third tanker is on order. It sounds like this is going to be the first big one in Butte County this year. Fortunately, the area is pretty remote and there are no structure threats at this time but if this can't be knocked down soon, it could be trouble.

I was up in Hangtown for a seminar, and we could smell the smoke and hear the radio traffic on all the command channels. It was about 10 acres when they got in with a hot wind feeding it. They immediately started calling for all kind of resources including crews, engines and aircraft. I'm not sure what's going on now, but I did see ST9410C headed north as I was heading south through Livingston.

13189. Firefighter down posts

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-19 03:35:39 UTC
From: Jake H
Topic: 13189 Message: 13189

Please do not post firefighter-down messages to NorCalFire. This probably needs to include fire shelter-deployments. I know I haven't made it part of the "long list of fun rules" but it'll be on the revamped version shortly. (even I have been guilty of this, as recent as last week on another list.)

Reason being, we have countless families/friends to firefighters on this list related to all sorts of fire departments. Hearing a message of "fire fighter down, helicopter requested" with no other info makes all of those people worry sick. For an example of that stomach-sick feeling, imagine hearing a rumor of a disaster at your child's school or spouse's employment, but not being able to get any more info from anybody, and not being able to respond.

The potential anguish for those people far outweighs any benefit to our fire-radio hobby. Thanks for your understanding.

Jake

13193. Google earth users: CDF admin areas

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-19 04:40:32 UTC
From: Dave
Topic: 13193 Message: 13193

Google Earth users might be interested in a file I just posted showing the CDF/CALFIRE administrative areas:

http://bbs.keyhole.com/ubb/showflat.php/Cat/0/Number/1172851/an/0/page/0#1172851

Unfortunately, at over 6MB, the file is too large to display in Google Maps.

13194. Nobody available in Humboldt? "Sunny IC"

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-20 19:45:47 UTC
From: Harry Marnell
Topic: 13194 Message: 13194

Fortuna Command Center is having a helluva time for the past half hour or so getting any locals to respond to a house fire in Weott. In addition to HUU, they've paged out WEO, RCV, MYR, MIR, GAR and possibly FRT, plus trying FLV, SCT, and PHL for water tenders. So far there's one CalFire engine onscene, a Weott engine, plus a water tender coming from I-forget-where ("IFW"?).

Now (12:38) the IC is requesting a hand crew., since the fire is getting into the wildland.

There is one site that supposedly has scanner feeds but none of them are working. If anyone is in the area and has the resources to setup a ShoutCast server, several NorCalFire members can combine their resources to rebroadcast the scanner feed and support hundreds of listeners. Please let us know if anyone has the resources available.

Just heard ST 9258G departing TGU for Santa Clara. Also TGU just toned
out Dozer ST 9261L (dozers 2542,2544) to Gilroy (Santa Clara). So orders
are getting out now.

13205. BUTTE: Oroville City, Structure Fire, high winds

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-22 20:51:43 UTC
From: Pamela Alley
Topic: 13205 Message: 13205

Lincoln Street x Grant Avenue; single story wood frame fully involved, powerlines down on chain link fence, fire spread to railroad right of way.

This is in deep downtown Oroville. Four total additional engines requested; per Oro PD, 'quite a fire'. Total of eight engines on scene or requested at this time.

High winds prevalent with gusts above 30+ mph.

Lincoln IC on Oroville Tac 1 (sorry folks, wish I had the freq--anyone??)

Butte Co Fire 151.400
Oroville PD (154.785, I think) and BCSO (154.725)

13212. Summit Fire Command and Air Tac are online

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-05-22 22:55:45 UTC
From: Butte County Public Safety Scanner
Topic: 13212 Message: 13212

Ok gang. We have Summit IC command as well as AirTac online. Its being broadcast on a weird encoder with command on right and air tac on left and then re-encoded to MP3. Because of the re-encoding, I could not seperate the channels but they don't talk over one another often. If any other ShoutCast hosts want to relay, please do so:
It's a little raw but best we could do on short notice. If there are any other broadcasts out there, please let me know:

Type of resources. Lima is a strike team of 2 Type 2 (Medium) Dozers
and 1 Dozer Tender. Golf is a strike team of two Type 1 Hand Crews
(total of 30 people).

13223. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-01 12:53:10 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13223

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

13224. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-01 12:53:10 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13224

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

From: Butte County Public Safety Scanner
Topic: 13230 Message: 13230

Massive response to a grass fire near a subdivision in Orland near Stony Creek. Apparently this has been burning since 1030 but the winds are picking up and several Butte engines are now being called in. Last acreage report at 15:00 was at 80 with at least 70 structures threatened.

I'm too far away in Butte County to pick up ground but I am hearing a lot of air tac. Can listen at http://www.thenet411.net <http://www.thenet411.net/>

Is anyone closer with an online feed?

not sure what's going on with Orland since Corning just had a 30acre
fire at 1500 in local govt land south of Corning along 99W and they had
no problem getting resources to it. Ham City even sent a water tender.
If Orland had an incident like that I'd think Hamilton City and Corning
would have some mutual aid sent, creating a void of local resources.

not hearing anything from Red Bluff.

I drove over form NW Chico to have a look after hearing the almost frantic first response traffic from Orland FD.I went through Orland on Hwy 32 which at that point was still open. As I approached Orland proper, there was active flame maybe 1/4 mile north of 32 in a field of dry grass surrounded by structures. The smoke was black, boiling and the flames at least 30'. When I got a look at that I hitailed it out of the way around all the mini vans full of lookie lous. There were a couple of engines in front of the flame but the grass was so tall, I couldn't really see what they were but they looked like OES engines. I went through town, and turned north on 99W to Wyo road/road 9 to get a look from the upwind side. There was a lot of black smolke still...a LOT! I finally found their Tactical freq (tac 11) and got some idea what what going on. Most of the traffic was structure protection on the suuth side of Stoney Creek around Stoney Creek and Wood haven in what looked like a f
airly new, higher end neighborhood.
The fire apparently started on the N side of Stoney Creek a little west of county road MM. MM ends into a gravel road at road 10. I thought it best not to wander down the gravel road as they were dispacthing several tenders and the dozer transport. I parked along the canal on road 10 with a good view of active flame probably 3/8 mile south of my position. This was about 11:30 or so and there were no air assets on scene. About noon, Red Bluff dispatched Copter 205 from Vina who came on scene maybe 20 minunets later directly over head. He dropped his crew after a quick round a bout of the fire and started to make drops on what looked to be the NE flank, apparently around the structures on the south side of Stoney creek I was close enough to see several drops clearly and he immediatly was making a difference as there was now some white smoke at least. I heard about this time that there was a pile of tires about in the middle of the fire that was probably responsible for all or m
ost of the black smoke which was laying down pretty low with the gusty north winds. There was also an area of active fire on the NW flank, pumping up black smoke but it looked like a run through some crowns and it didn't really go anywhere from where I was sitting. It could have been a structure I guess but I didn't hear any traffic to suggest that..
I tried to come back to Chico through Orland but by the time I got back over there it was a real traffic mess so I eventually found my way back to WYO road/County road 9 and came home through Hamilton City.I'm nto sure how far south of 32 it actually burned but I'm pretty sure it jumped 32.
I just thought you all would appreaciate an on scene report as the previous reports seemed somewhat confused. No, I didn't have my camera in the truck unfortunatly...sorry Jake! :)
It's pretty darn dry out there right now and I can't remember a spring that has had as much N wind at this one has. Wish everybody luck out there...Be Safe!

Not wanting to raise a ruckus on here, but is this Yahoogroup a place where we want to announce to the world that we "drove over to take a look" after hearing frantic fire traffic on the radio? And then as we drive around trying for a better view, describe other people who did the same thing as "looky lous"?

In my job with PG&E I often get called out to shut off electrical and gas, or help restore it, at fire scenes, and as often as not my work in helping the firefighters gets impeded by sightseers and their cars who just happened to come by and ended up inadvertently being a part of a "real traffic mess" such as the one in Orland.

My take on it is that this kind of thing gives us and scanning a bad name, especially when we post about it to a list where there are probably a number of firefighters and police officers.

Nothing personal intended to the OP, just something that struck me.

To The other Mark,
I think your getting a little fussy. As a responder to the Orland Incident and a local Fire Chief that wants to be in the know, I don't really have a problem with it.
1) Most of the time the incident is over by the time things get posted.
2) Although I don't personally know the poster, what I do know about him and his experience, he won't get in the way.
3) As long as the person who is chasing incidents stays well out of the way, I don't care.
4) All those that post here, keep those cards and letters coming.

Holey cow "other Mark"
I am not sure why I should have to qualify my fire background with a PG&E guy but I was trained in the back seat and front seat of several engines along with a DC3 that I jumped out of for a season, not in a PG&E truck.
I will take this off lline with you mate. I just tried to clear up some ambiqguities on the Orland incident. I may hot have used the correct words but I can guarantee you and the folks that left me in the dark for 5 days last Janurary, THAT I DIDN'T GET IN ANYONES WAY or cause any problems, Yoiu can count on more off line.
I am not sure what you refer to in that scanner people have a bad rep...I'v been a Ham for over 30 years and mny first scanner required freaking crystals . I paid for them myself becasuse the USFS couldn't afford scasnners for me as a Crew chief to hear the dispatch aftger hours. I stil have that damn receiver in a junk box.
The "lookie lolus" I refered to were locals, wandering around in their mini vans like it was a leverl 4 ride at a theme park. Like I mentioned, I got the hell out of the way and just moved upwind, creating no problems to anyone.
I dont't remember seeing a single blue colored truck the whole 2 hours I was obsrving the acticity, out of the way and safe.
I just wish I had taken my camera...

Dan - I didn't know GlennCo could use Tac 11. I heard some traffic on Tac 11 with two-digit resources from up here in RB but couldn't believe it was the orland fire. Is there an agreement, did Butte or Tehama ECC give out Tac 11? I would never have guessed to look there.

As for responding to fires:
Thanks for taking it offlist Nitro. I know you personally to not get in the way, but the Other Mark (how many Marks do we have?! :) does have a public point in regards to many on this list. This list (and the fire-scanning hobby) do NOT condone "responding" to an incident that you learn about from this list, or your radios. Just making it publicly clear. I think the majority of this list understands that. The minority hopefully figures it out.

You may be a retired fire guy who knows how the show goes. You may live in the immediate area and know some very nice backroads UPWIND and AWAY from the fire that make you safe, and out of the way. You may get a very clear situational awareness listening to the tac freqs and referencing your detailed street maps to keep you out of the way and safe, but still enjoying the air and radio show.

There is a time and place to watch incidents. If you have to pull over once for a fire engine while near an incident, go home. You're in the way.

Yup, that's pretty darn FruitoftheLoom considering the weight advantage almost any vehicle has over them.

As for a law, there is one. Same as for cars, they are a wheeled vehicle on the road and THEY MUST PULL OFF BY LAW. (at least, that's how my dad taught it to me when I started biking seriously.)

Nothing I've ever read makes me think differently, either.

Call your local cops and report those little so-and-so's for interfering with emergency services--I'd bet they'll get a ticket or two--IF the cops aren't too busy doing traffic control elsewhere and evacuations, that is......

It would be a tragedy if they got run over, but with that kind of attitude, it's only a matter of time. What a shame, and so dang frustrating to see idiots like that simply denying common sense!! Hard on the WT drivers, without a doubt, either way (up or downhill).

Hope things change for you this year....I know I'll make it a point this week when I go downtown to go talk to the bike shops and ask them to remind their riders on that little issue....

13248. Quincy FD - Fully involved structure fire at Coreys Automotive

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-10 13:53:33 UTC
From: engine242
Topic: 13248 Message: 13248

At approximately 0515 this morning Quincy FD was toned out to a structure fire at Corey's Automotive on East Main St. in East Quincy.

First arriving personnel on scene reported pulling up to fully involved structure (Automotive shop and attached home). The Quincy Fire Chief rolled up on scene and immediately requested a 2nd alarm.

As far as I know, the scene is still not under control, there are concerns with extremely close exposures, not to mention all the chemicals you can find in an auto shop.

Hwy 70 is open, but traffic through is severely limited due to the spaghetti of hose lays scattered around. CHP is handling traffic control through the area.

Will post info on control time and / or if anything else happens that's note worthy.

There is not much of a chance of it spreading to the wildland, unless an ember blew off to the hill nearby and sparked up a spot fire, won't say it can't happen though.

Jake -

The local agencies in Glenn County frequently use Tac 11 & 12 on local incidents. We have our dispatch notify Red Bluff ECC so there are no overlaps. RB ECC also tries to assign 11 or 12 to incidents in Southern Tehama County, or Glenn where there will be mutual aid by locals. This keeps it a little more simple.

Also, I know this isn't the forum for it, but some like Dan are here, so I would like to use this to personally thank all those that responded to the Orland Incident. In doing a count, we had over 35 pieces of equipment, and over 150 personnel, not counting Law Enforcement and others, that moved in and nailed this fire. We didn't lose one structure, and didn't get anyone hurt. In this chaos they evacuated 300 homes.

In addition to the fantastic work done by a lot of firefighters, we had great support on the command side of things. People like Dan, and other BC's that stepped up, and kept the ICS side of things working.

Again, Thank You!

Jerry aka: Division IWOMH (In Way Over My Head)

13271. Jackson Incident?

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-10 22:26:36 UTC
From: George.Cusack@alldata.com
Topic: 13271 Message: 13271

Helicopter 202 jsut took off from Chester and is enroute to the Jackson Incident? Not sure where that one is at.

There is a large wind-driven grass fire near the Jackson Highway in southeast Sacramento County. This may be it.

It is along 'Jackson Highway' state route 16 east of Sacramento
Last I heard they were on White fire 2

This is really nothing new. It seems anytime the weather gets warm, the wind blows or someone senses the possibility of a fire being somewhere in California there's a staffing pattern. It's getting to the point they might as well just work all of us 24/7 through the high fire danger months. But seriously the OT costs have to be killing the state especially if there's no fire to bill it back too. I do like OT though!

TGU major dispatch to Freeman School house rd, west of Corning. Nine engines, 2 WT's, 3 crews, 2 dozers and normal compliment of aircraft. Tomhead lookout says 8-10 acres, mod to heavy ROS, structures in the path.

Steve

13277. Ophir update 18:40

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-11 01:43:17 UTC
From: Jake H
Topic: 13277 Message: 13277

They've sent all the tankers home and the fire has done a complete mood change for the better. Copters working hotspots only. Copter 404 and 106 should be returning back to home base tonight.

Air Attack just transitioned back to AA500 from 05. They're working 151.2875 or 151.295 - can't tell on this particular scanner.

From what I'm hearing on news and such, the aftermath from this one doesn't look good at all. We'll see what comes out in the press tomorrow. Check www.chicoer.com for the latest (including pics).

I just received an update from Cal Fire as of 17:30 and it doesn't look good. Here are the facts:

Engines: 40

Dozers: 4

Hand Crews: 4

Water Tenders: 4

Helicopters: 4

Tankers: 5

Air Attack Command: 1

Total Personnel: 500+

Structures Threatened: 3000

Homes Destroyed: 21

Outbuildings Destroyed: 28

Vehicles Destroyed: 99

Road Conditions:

Powerhouse Hill road now open to residents

Lone tree and all side streets are closed, included price rd and Wyman rd (may open) small possibility

The following roads are closed through out night and remain evacuated

Palermo rd from Melvina to hwy 70

Occidental

South Villa

Kennilworth

Williams

Ludlum

South Railroad Ave

Louis

Alice

Daly

Craig

Citrus

Almy

McIntosh

South reservoir

Possibly the next round of evacuation:

Dunstone and Avocado soon to be evacuated, most likely.

Wow. Who took those pics?? # 19 is an absolute 150% WOW!!!

21 homes, 28 outbuildings, no definitive total per the ER.

Knowing that area, I am wincing at what have to be the total losses of animals and shelters, along with those who lost everything they had.

I would hope that this area will give to their own as eagerly as they do to others.

Been out of the loop on Cal Fire too long...

http://www.nimsonline.com/docs/nims_700_BES.pdf

My old link to the NIMS site on California Strike Teams doesn't
indicate an allocation for 3575C; the Charlie designator identifies it
as a ST made up of Type 3 engines (high clearance/wildland interface
engines).

3650, according to the old link, would be a USFS MNF (Mendocino) ST...

More of CDF engine types:

http://www.freqofnature.com/index.php?m=California&p=Cal%20Dept%20of%20Forestry

73s de AJ, K6LOR
www.idascan.com
22 km west of NIFC/NIRSC

Nicholas IC reporting only two patients, first and second degree burns to face and hands. Canceled REACH 2, patients being transported to UCD. Unsure what the reference to one AMR unit to Auburn Faith was about, may be unrelated.

13294. BUTTE: Humboldt IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-11 20:58:52 UTC
From: Pamela Alley
Topic: 13294 Message: 13294

Update given about half an hour ago (1315 or so):

140-160 acres with plenty of spotting ahead of the fire. Heavy winds.
Headed south/southeast up the hill with lots of black and brown smoke.

Heavy resource requests including multiple dozer strike teams, multiple crew
strike teams, and more engine requests on the way.

This fire is MOVING and has plenty of fuel; primarily heavy brush and
typical foothill vegetation.

Butte Fire 151.400
Tac is White 2

SAR callout for evacuations along Honeyrun, starting with 900 black.

This isn't going to be fun.

1400 PA

I've already heard LACO ST's up there at the fires... The resources are
a commin.

Update as of 1330, same one I heard with a bit more details.

Stilson Canyon Road is closed and it's headed up the canyon for sure.

Surprised I didn't lock out Butte stuff on my scanner after reprogramming it last night. norcalscan.org live scanner has BTU Local and Butte support on there, but they aren't on priority. I do have Air Tactics 5 on priority, behind TGU/SHU local. So lots of air attack traffic.

They have been discussing the need for the DC-10 or not. So it's on people's minds. Listen for Tanker 910 if they do.

Butte SAR up on 155.940 for evacs.

Jake

Honeyrun evacs have begun from 936 on up; hearing resources shift from Palermo (hey, anybody got an update on that one, or is it done?) to Humboldt.

Hope they have lots of help for the Honeyrun Equestrian Center....among others. I know of at least one very large rabbitry upcanyon; they don't usually evacuate but stay put and defend.

I'm not seeing many posts on this fire. :) Pam - get out of that hole!

Tanker 910 - the DC10 is onscene now. Reloading out of McClellan.

Norcalscan.org live scanner is maxed out at 60 users. You can try
thenet411.net but I think he's getting maxed out too.

Per http://www.chicoer.com update they have called the DC10.

I'll be taking my camera when I go back to Chico this evening...won't be going over there but might get some decent smoke shots.

From: Craig Allyn Rose
Topic: 13303 Message: 13306

CORRECTION - location point of reference is 1222 Martin Road and this fire has significant potential. This is some pretty rugged terrain with many structures dotting the landscape.

MARTIN IC has just ordered mandatory evacuations in the area.

LATEST RESOURCE ORDER REQUEST

3 branch directors
3 additional division group supervisors
1 PIO

More info as merits.

13310. BTU Humboldt frequency update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-11 23:10:12 UTC
From: Jake H
Topic: 13310 Message: 13310

As of 1600:

151.400 BTU Local
151.460 Command 7 - IC to ECC
154.415 Butte Support - Operations Command
151.265 Command 2 - Structure Protection Command (unconfirmed)
154.265 White 2 - primary tac
151.385 Tac 9 - secondary tac
151.295 Air 5 - tankers

Copters are on a victor net - unknown.

Their primary plan is to hold it at HoneyRun and Butte Creek in the canyon. If they can't hold it they will make a fast transition to secondary contingency which is holding it at Skyway. They've been toying with closing (or already closed) Skyway due to smoke at the time.

Jake

13311. Martin Fire - CZU - Update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-12 00:33:48 UTC
From: Craig Allyn Rose
Topic: 13311 Message: 13311

100+ acres with long range spotting up to 1/4 mile ahead of the main body of fire. Also request to have PG&E respond and secure a large portion of the power grid. Sounds like another long-term engagement.

Other items of interest include over 1,400 evacuated from the immediate area, and the column of smoke is clearly visible to the east here in the Santa Clara Valley.

13312. Santa Cruz County Scanner Feed?

XSC2301A (Santa Clara County strike team) is currently enroute to the fire as of 1823. Just saw them coming over the summit on 17.

Martin Ops is now up on Command 2 Tone 9 apparently - setting up a TFR to keep planes from BonnyDoon Airport out of the area - Batt 3502 is Safety - PG&E rep should be arriving shortly - at 607PM PDT I believe the IC ordered an additonal 10 water tenders on top of his initial request for 5 water tenders - apparently for a total of 15 water tenders ordered so far.

The ScnnerBuff.net feed is getting Command 2 Tone 9 loud and clear.

hack hack choke

Okay. Neal is to be closed; Indian Springs ditto; evacuations are continuing, although there seem to be some difficulties with getting animals out as requested--no major issues or burns as yet that I know of, but....

Evacs continuing to areas off of Neal Road; I believe that Paradise city is handling their own end of the evacs and I can't pick those up. (Sorry Jake--no tall guy showed up to hold the antenna!)

A comment was made by the contingency folks stationed over by Tuscan Ridge Golf Course that 'if the fire makes it across Skyway, we're going to need twenty more engines--I know it's probably unreasonable but that's what we'd need.'

I don't know how many they actually got when the fire crossed. Still plenty of wind on it as well as here in Oroville, tending more east than south now.

Best of luck to all...

Seems fairly certain at this point that the fire will reach Neal Road.

I'm hearing that resources are being released from Palermo (Ophir fire) despite it not being fully controlled. Does anyone have an update on Ophir??

Yes. If you have animals, pack them up, grab your necessary stuff, and get out ASAP! They're now talking that if they dont' get it stopped at Neal, it's going to go to 149 in short order.

Travel with care, but I'd highly recommend you leave sooner than later.

13353. ShoutCast Capacity - Urgent Need

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-12 14:40:00 UTC
From: Butte County Public Safety Scanner
Topic: 13353 Message: 13353

A lot of people up here in Butte County do not have scanners are with the local media advertising the Butte County online scanner as a resource, additional ports are badly needed. If you have ShoutCast capacity and can relay a feed, please relay the feed at http://wms.thenet411.net:8000 <http://wms.thenet411.net:8000/> and please let me know you intend to do so and how many ports you can offer. Thank you!

Ben,

The likelihood of evacs in the in those areas is extremely remote at the moment. We have at least one tanker and two helicopters on scene right now and we should have a lot of the lines closed up with their help.

From: Mike Larish
Topic: 13358 Message: 13358

Tac nets are expanding and changing. I'm off today so far but have somebody grabbing an IAP so we can keep track of stuff.

As far as I know, they're still using Butte Support, Command 2, White 2, White 3, Tac 9, CDF/Calfire Air-to-Ground, and have now recently added Tac 3. Further, I just heard a request for a new tacnet in the 168.xxx MHz range I thought. Didn't get the number written down...

And just now, a tac net was approved for either 153.100 or 163.100. Didn't catch the whole thing.

Mike

The Butte County Public Safety Scanner has an online chat going with citizens and members of the local newspapers for up-to-the-second information on the Humboldt fire. The scanners are constantly running at 100% but if you can't get to a feed, you can find out what is happening with the posts of others.

The Butte County Public Safety Scanner has an online chat going with citizens and members of the local newspapers for up-to-the-second information on the Humboldt fire. The scanners are constantly running at 100% but if you can't get to a feed, you can find out what is happening with the posts of others.

Topic: 13358 Message: 13371

This thing has taken off.

As of 9am this morning, Command is on command 1, 151.355. My wife will reprogram the scanner to have that on priority by 3:30pm (you can send her starbucks cards :) It appears Butte Canyon has got real hot and fire is going right up the drainages that lead into the Paradise canyon rim area. Lookout Point burned over, where last night at 11pm I helped SAR pick up their portable repeater and all was calm.

Tom - I was doing evac notices on upper Neal last night and ran into one person who said he was listening online, and it was my live scanner. Another house I could hear a scanner inside and the computer screen had your website on it. It's definitely being used by the locals up here.

Mike, 163.100 would be used as a helicopter base frequency, or temporary air-to-ground most likely. With everything blowing up in the north state, I'm sure they're pulling frequencies left and right.

Jake

Subject: [NorCalFire] Re: BTU: Humbolt Fire

This thing has taken off.

As of 9am this morning, Command is on command 1, 151.355. My wife will reprogram the scanner to have that on priority by 3:30pm (you can send her starbucks cards :) It appears Butte Canyon has got real hot and fire is going right up the drainages that lead into the Paradise canyon rim area. Lookout Point burned over, where last night at 11pm I helped SAR pick up their portable repeater and all was calm.

Tom - I was doing evac notices on upper Neal last night and ran into one person who said he was listening online, and it was my live scanner. Another house I could hear a scanner inside and the computer screen had your website on it. It's definitely being used by the locals up here.

Mike, 163.100 would be used as a helicopter base frequency, or temporary air-to-ground most likely. With everything blowing up in the north state, I'm sure they're pulling frequencies left and right.

Jake

13375. MNF - Whiskey incident - SW Tehama County

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-12 22:23:04 UTC
From: Jake H
Topic: 13375 Message: 13375

Mendocino working a 30-40 acre fire above Paskenta in southwest Tehama County, midslope from what I can see in Cottonwood. Just had the Jumper plane fly over back to Redding. No aircraft on the fire now - none available. Structures threatened.

169.175 Mendocino Forest
151.370 Tehama

Tehama CALFIRE is now all CWN watertenders and dozers. State engines I think are now gone and we're down to local govt coverage. No aircraft available.

Correction - aircraft are over this Whiskey fire.

Copter 506 enroute also from Trinity Center SHF.

13377. Re: BTU: Humbolt Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-12 22:33:42 UTC
From: Jake H
Topic: 13358 Message: 13377

Heard on Air to ground - fire jumped Clark at what sounded like Clear Creek Cemetery Road. This is south of the Paradise airport. 30minutes to Pentz Road at Lime Saddle.

Bloomer Lookout just reported a shift in winds - out of the west now at 10mph. That is not good news.

Jake

13378. Re: BTU: Humbolt Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-12 22:43:20 UTC
From: Jake H
Topic: 13358 Message: 13378

Power out at upper Pentz Rd. All circuits busy in Paradise. It's about
5 tries to call into Paradise.

13379. [NorCalFire] Re: BTU: Humbolt Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-12 22:41:04 UTC
From: Craig Carter
Topic: 13358 Message: 13379

Latest weather from the Chico RAWS located at the bottom of the Skyway as you enter Chico:

Temperature:

95 °F

Dew Point:

27 °F

Humidity:

9 %

Wind:

WNW at 14 MPH

Peak Gust:

25 MPH

Which should, in theory push the fire to the ESE towards the Butte College area and skirt lower Paradise. Only speculation on my part from 350 mile to the south.

Regardless, those are extreme burning conditions.

Craig

13380. Re: BTU: Humbolt Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-12 23:29:14 UTC
From: Jake H
Topic: 13358 Message: 13380

With the fire south of town still - I concur if those winds stay, but I'm armchair quarterbacking from 50mi to the north. I'll be going back down tonight again for evacs/comms support so I'll be unavailable for updates.

My wife updated the live scanner to have Cmd1, Butte Support, TGU in that order of priority. Air tankers are no longer priority.

Paradise has no power in all of town. Paradise Police lost their dispatch repeater. Butte SAR reprogramming their portable repeater as I type to Paradise PD F-1 and will be setting it up on the roof of Paradise PD.

Outta here
Jake

13382. UPDATE: Re: BTU: Humbolt Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 00:01:13 UTC
From: Pamela Alley
Topic: 13382 Message: 13382

All Paradise phone lines are out as well. Cell service is up but dodgy.

This fire is UGLY, folks. I just got back from Chico and it's moving any way it bloody well wants, north, west, south, east. New smoke from fresh fuels constantly coming up against the main column.

Ash was seen falling from Chico all the way to my place in Oroville. No embers seen, but....double scary.

Traffic is backed up almost to 99 on 149, with traffic control in place at 70.

At approximately 1:30 pm (1330 to you), a burnover was reported on Indian Springs Road off of Neal. Engine 212 was burned over, but ALL PERSONNEL WERE REPORTED SAFE AT THAT TIME. Repeat, ALL PERSONNEL SAFE. I do not know about injuries, but everyone got out.

Evacuations on Clark are continuing and I believe they are beginning on Pentz as well. Requests to close Messina Valley made to prevent 'work arounds' trying to reach Paradise.

Clark NORTH OF PEARSON is open at this time.

One place on Doubletree had 40 horses to be evacuated; NVADG is doing their best combined with animal control to get out what they can.

Multiple special-needs evacuations of ill and elderly being requested and performed.

Got some smoke pics on the way by...this is one impressive column....

Fire is currently reported at the west end of Abby's Lane.

http://www.townofparadise.com/emergency1.html

That's all I've got at the moment....Pics later.

Additional out of state streaming in the works; should be operational
tonight before 0000 MDT.

From: Dave
Topic: 13386 Message: 13386

Sacramento media stating that they are loosing houses on Indian Springs Road.

By the way, the helicopters are using 129.775 VHF AM and the tankers are on 151.2875.

13387. Humbolt update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 01:44:13 UTC
From: nitrobear@comcast.net
Topic: 13387 Message: 13387

Here is an update. This thing is on the run, out of control pretty much and stretching everything to the limit. Just announced it has jumped Clark Road and is now on the Butte College Campus.
If she gets into Feather River drainage...ugh, will be ugly with the predicted wind shift.This is the 12:00 update from Cal Fire. Jakes scanner is covering the action well BTW. There are a huge number of strike teams on the way from what they are saying. (HURRY UP!)

Mike,
is the Chico Scanner on-line and if so, where is it? I've lost the link and it doesn't Google.
I had a chance to see the Tnkr 910 drop yesterday...WOW!

Tks, Jon

Tac nets are expanding and changing. I'm off today so far but have somebody grabbing an IAP so we can keep track of stuff.

As far as I know, they're still using Butte Support, Command 2, White 2, White 3, Tac 9, CDF/Calfire Air-to-Ground, and have now recently added Tac 3. Further, I just heard a request for a new tacnet in the 168.xxx MHz range I thought. Didn't get the number written down...

And just now, a tac net was approved for either 153.100 or 163.100. Didn't catch the whole thing.

Mike

13394. MNF - Whiskey incident - SW Tehama County

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 03:52:56 UTC
From: Tom Caves
Topic: 13375 Message: 13394

Whiskey incident is now estimated at 500 acres, under unified command with MNF & TGU. Type II Fed Incident Mgmt Team (Kaage) ordered.

Jake H <yahoo@...> wrote: Correction - aircraft are over this Whiskey fire.

Copter 506 enroute also from Trinity Center SHF.

It would be interesting to see staffing level per unit. ie. equipment
available. Is there a hard copy version of the morning report for each
unit accessible to the public somewhere?

13396. Day One - Martin Fire Images

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 04:15:33 UTC
From: Craig Allyn Rose
Topic: 13396 Message: 13396

Good Evening All,

A quick note to share images a set of images from day one of the Martin Fire in the Bonny Doon area of Santa Cruz County. I was assigned to Branch III, which is the apparent point-of-origin for this fire. Once this blaze got cooking it ripped through the area with an intensity I have seldom seen. Local volunteers assisted by Santa Cruz County and CAL FIRE resources pulled off some miraculous saves along Martin Road. I am proud to report that their efforts clearly saved a number of structures. I wasn't able to spend the night due to commitments back in San Jose, but I did get a chance to chat with a number of folks including firefighters on a TYPE-I municipal strike team tasked with structure protection. They experienced some pretty hairy conditions as this fire swept southward through the area leaving a lot of charred homes and too many snags to count.

A huge round of applause for the men and women that saved so many homes and critters!

IMAGES HERE - http://www.emergencyphoto.com/fire/martin/martin.htm

I hope folks enjoy the images.

Cheers!

Craig

13397. 3rd Butte County Scanner Stream - out of state server

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 05:58:05 UTC
From: AJ Grantham
Topic: 13397 Message: 13397

3rd alternative stream is up for folks outside the immediate disaster area to alleviate some of the traffic off of the primary the411.net and secondary (preferred) Sierra Nevada Brewery servers.

This server is located in Idaho and should easily support 16 concurrent additional users.

13398. Fire in Paradise, CA -- Sad

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 06:54:10 UTC
From: Lake Hodges Radio
Topic: 13398 Message: 13398

I'm listening to Butte County Public Safety Scanner.

http://www.wildlandfire.com/news/scanners.htm

Search for 5350 Skyway, Paradise, CA in Google Maps.

Click on Satellite View. Look for Intersection of Neal and Skyway.
Fire is burning through there right now.

Zoom out and look at all those canyons.

I remember a lot of tall trees in Paradise. Scanner says some of
them are crowning.

Voices on scanner are all so calm. I wonder what is really happening?

Also search for airport, paradise, CA in Google Maps.
Fire is burning there too, according to scanner.

Here's a map
-->> http://cdfdata.fire.ca.gov/pub/cdf/images/incidentfile272_530.pdf
But that map is old.

If you've ever been to Paradise, the name is appropriate. Beautiful
little town.

I hope they have a better day tomorrow.

Topic: 13398 Message: 13399

Negative - this is a powerline into a single 80ft pine tree. Crowned the single pine tree. Paradise City Fire and a strike team pounced on it.

13400. Humboldt update Friday 0030

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 07:48:23 UTC
From: Jake H
Topic: 13400 Message: 13400

Just got back from the thick of it. Things are real calm in Paradise north of Pearson. South of Pearson in the upper Neal Rd and off of Clark above the Airport didn't fare too well this afternoon.

Right now one head of the fire is at/past Butte College. This is the spot fire that originally jumped over the Covered Bridge and up the rim to Skyway and jumped over.

Second head is on the rim 1 hour ago just west of lookout point and east of the powerlines. I probably got through there 5 minutes before it crested. All the guardrail wood posts are flames the entire length of Skyway. This head has nowhere to go since it's the original head from Butte Canyon that is now bumping into the back of the spot fire mentioned above.

The third head is a remnant of the origin of the fire. Winds switched this afternoon and the heal of the fire took off up Hwy32/Humboldt and Doe Mill Ridge. It is in Butte Creek Canyon as well, with a containment goal of Centerline Road at Conejo. Tomorrow morning I think they expect to burn out Center Gap Road, or have the fire contained at that road. When I left it was moderate down canyon winds making the fire back into itself. Paradise is very well off if the winds don't shift. If they shift up canyon then Valley View Rd and Bille Park area will be very hot.

Tomorrow will be a tell-all with the winds. No winds and you should see containment go up a good 30-50%.

live scanner has Cmd1, Tankers, and Air-Ground on the three priorities. In between all of that will be the area local nets, as well as Mendocino NF, and the Whiskey Air attack which was working 169.150 Thursday.
Jake

From: Kurt Barnhart
Topic: 13398 Message: 13402

Firefighter on the scanner (at 2am) says "fire is getting bigger."
Not sure which branch they were referring to. Weatherunderground.com
says Paradise has 10mph winds and 13% humidity at 2am. Forecast for
Friday is for an afternoon high of 92 degrees, and wind gusts up to 40mph.

13403. Re: [NorCalFire] Re: Humbolt Incident OES Strike Team 4800A

Herer is this mornings update from the Cal Fire indident site. Smoke is now drifting into Chico.

Humboldt Fire
Humboldt Fire Incident Information:
Last Updated: June 13, 2008 6:45 am
Date/Time Started: June 11, 2008 12:13 pm
Administrative Unit:CAL FIRE/Butte County Fire
County:Butte County
Location:Hwy 32 & Humboldt Rd on Stillson Canyon
Acres Burned: 20,484 acres
Containment15% contained - 20,484 acres
Structures Destroyed:40 residences have been destroyed.
Threatened: More than 4,600 structures are still threatened.
Evacuations: Evacuations of the southern most portion of Paradise, and the communities of Butte Valley and Butte Creek Canyon.
Injuries: 5
Cause: Under Investigation
Cooperating Agencies: Butte County, Butte County Sherrifs Office, California Highway Patrol, US Forest Service, California Conservation Corp, California Deparment of Corrections and Rehabilitation, El Medio Fire, Oroville Fire, and Chico Fire
Total Fire Personnel: 1,354 (748 CAL FIRE)
Fire crews: 31 CAL FIRE
Engines: 78 (29 CAL FIRE)
Airtankers: 4
Helicopters: 4
Dozers: 14 (12 CAL FIRE)
Water tenders: 14
Conditions: Strong winds are making it very difficult to get crews ahead of the fire. The fire continues to spot in multiple directions.
Honey Run Road, Skyway and Neal road are closed.
An evacuation center has been established at the Neighborhood Church at 2801 Notre Dame Blvd. in Chico.
Small animals can be taken to the Search & Rescue building on the Morrow Ln. Large animals to Chico State Farm 311 Nicholes C Schouten Ln cross of Hagen Ln. (public # until 5 is 898-6343, after 518-9497).
Phone Numbers (530) 538-7826 (Humboldt Fire Information Number)

13413. Interesting fire trivia... Brush vs. Grass

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 18:28:01 UTC
From: Lake Hodges Radio
Topic: 13413 Message: 13413

From: Richard Halsey
Sent: Friday, June 13, 2008 10:20 AM
To: 'eric.bailey@latimes.com'
Subject: Brush fires vs. Grass fires

Hi Eric,

I wanted to write you a note regarding your story
on the fires in the Sacramento area on June 11, 2008:

http://www.latimes.com/news/printedition/california/la-me-stockton11-2008jun11,0,514150.story

I know it is extremely difficult to get every
detail perfect in a story, especially on
deadline, but I wanted to point out a particular
error that helps to perpetuate a major
misconception regarding wildfires in California:
overgrown ☐brush☐ is always to blame.

In reference to the 6,400 acre Jackson fire, you
reported that it was ☐a quick-moving brush fire ☐

In fact, the Jackson fire was a quick-moving
grass fire. The relevant section from the
Sacramento Metro Fire press release is pasted
below. I also have an aerial photo showing the
approximate area burned I can forward if you
would like. The fuel was almost exclusively
non-native grass (excluding the 5 homes, 19
outbuildings, and 5 vehicles burned).

I know this particular error (calling a grass
fire a ☐brush☐ fire) may seem trivial, but as a
firefighter as well as a fire scientist I have
found it extremely frustrating when the public
thinks that as long as they get rid of the
☐brush☐ they will be safe from wildfires. This
perception is partially responsible for
encouraging the myopic focus found in many state
and municipal fire risk reduction ordinances on
☐clearing☐ native vegetation (☐brush☐). I believe
this misplaced focus is also responsible for a
significant number of homes being lost in
wildfires every year because citizens fail to
understand that reducing fire risk is not just

about native vegetation but about the TOTAL fire environment.

Having been in both grass and shrub fires myself, I can assure you that grass fires are much more dangerous. That fact needs to be made clear to the public. It is no surprise to anyone in the fire service that it was a grass fire that burned over the captain during the Jackson incident. One of the common dominators in firefighter fatalities are grassy fuels. The public doesn☐t understand this and is often lulled into a false sense of security when they ☐clear☐ native shrubs around their homes, yet allow other flammable conditions to exist. Such conditions include flammable ornamental vegetation, wooden fences under eaves, stacks of wood near buildings, flammable building materials, poorly designed attic vents, and seemingly innocuous dried, invasive grasses near homes that typically fill the void after native vegetation is improperly removed. Yes, shrubland fires can be extremely dangerous, but there are many other ways to fuel a wildfire.

In short, location (where the structure is built), design (how the structure is built), and fuel management (including not just native vegetation, but ornamental plants, wood fences, etc.) need to be considered when creating a fire-safe environment.

By continually blaming ☐brush☐ for wildfires, native ecosystems become demonized, the public fails to become fire literate, and homes continue to burn.

I hope you take this note in the spirit it was written. I sincerely want to help Californians understand how to live safely in one of the most fire-prone environments on earth without destroying the natural landscape they enjoy. By eliminating the use of pejorative terms such as ☐brush☐ and providing a clearer message about what fuels a dangerous wildfire (vegetation as well as homes), journalists can play a critical role in educating the public about wildfire risk.

Please feel free to contact me for additional information. I have a significant number of research papers on the topic that may be of interest.

Take Care,
Rick Halsey

Here is the relevant section in Sacramento Metro Fire□s press release on the Jackson fire:

□At 12:12 this afternoon Sac Metro fire fighters were dispatched to a reported grass fire near the intersection of Jackson Highway and Bradshaw Road. First arriving units found a fast moving grass fire on the south side of Jackson Highway approximately 1/2 mile east of Bradshaw Road. The flames were rapidly spreading to the south-east being driven by sustained winds out of the north-west in excess of 20 miles per hour, with intermittent gusts over 40 miles per hour.□

From: Pamela Alley
Topic: 13418 Message: 13418

Lookout shot says moderate build on the smoke.

One crew, copter, tanker and airtac on order.

Nasty area; plenty of brush and overgrowth. :(

IC requesting tankers inbound ASAP, access difficulty

Long IC on White 3
Butte Fire 151.400

1325

13419. UPDATE: BUTTE: Oroville, Long Bar x Long Bar Ct

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-13 20:56:30 UTC
From: Pamela Alley
Topic: 13419 Message: 13419

Air Tac showed up in record time with 3 tankers and a copter in tow, said they'd been sitting at Grass Valley and were happy to help. :) Love it when those guys are optomistic!

2-3 acres, going to frame it in with tankers and bucket it to death. :)

Let's hope they can/will. They've closed off Canyon Highlands and Long Bar and if it goes north, they'll start evacuations.

From: Kim Noyes
Topic: 13375 Message: 13422

Where are you located?
I don't believe that fire is producing a lot smoke.
HOWEVER, the Indians Fire went nuclear today with incredible pyrocumulous clouds and prodigious smoke volume most of the day and that smoke is headed to the north.

13424. Pm update on the Humbole=t fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-14 03:25:51 UTC
From: nitrobear@comcast.net
Topic: 13424 Message: 13424

Here is the &:15 PM update on the Humbolt fire. Wind has switched to SE in Chico some hours ago. The Army up there is growing by the hour. I saw a couple of engines form Beverly Hills today...nothing from PG&E with them though.
I've lost count on the numbers...it's scary. I know that the tanker numbers in this report are dead wrong and I'm sure that the copter numbers are wrong also. I think I heard 30 copters on scene today and many more thatn "4" tankers on this fire...12 seems to ring bell.
I also heard that they have given some sort of disaster rating to this incident...it's a 2 and they compare this to the New Orleans Hurricane which was a 9.
Say a prayer for the fire fighters tonight...God speed your mission!

Humboldt Fire
Humboldt Fire Incident Information:
Last Updated: June 13, 2008 7:15 pm
Date/Time Started: June 11, 2008 12:13 pm
Administrative Unit:CAL FIRE/Butte County Fire
County:Butte County
Location:Hwy 32 & Humboldt Rd on Stillson Canyon
Acres Burned: 22,833 acres
Containment20% contained - 22,833 acres
Structures Destroyed:50 residences have been destroyed and 12 have been damaged
Threatened: 5,600 structures are still threatened.
Evacuations: Evacuations of the southern most portion of Paradise, and the communities of Butte Valley and Butte Creek Canyon.
Injuries: 5
Cause: Under Investigation
Cooperating Agencies: Butte County, Butte County Sherrifs Office, California Highway Patrol, US Forest Service, California Conservation Corp, California Deparment of Corrections and Rehabilitation, El Medio Fire, Oroville Fire, and Chico Fire
Total Fire Personnel: 2,842 (1,094 CAL FIRE)
Fire crews: 47 (38 CAL FIRE)
Engines: 398 (64 CAL FIRE)
Airtankers: 4
Helicopters: 4
Dozers: 27 (18 CAL FIRE)
Water tenders: 26
Costs to date: $1.2 million
Conditions: Strong winds are making it very difficult to get crews ahead of the fire. The fire continues to spot in multiple directions.
Honey Run Road, Skyway and Neal road are closed.
An evacuation center has been established at the Neighborhood Church at 2801 Notre Dame Blvd. in Chico.
Small animals can be taken to the Search & Rescue building on the Morrow Ln. Large animals to Chico State Farm 311 Nicholes C Schouten Ln cross of Hagen Ln. (public # until 5 is 898-6343, after 518-9497).

Looks like things are finally turning in our favor today. I drove up to Forest Ranch today and Doe Mill looked pretty quiet on the western side. Looks like they back fired in the canyon just right to keep her out of Forest Ranch. Keep the troops in your prayers, it's still dangerous out there when the adrenaline starts to subside a little. Stay safe!

From: Larish, Michael
Topic: 13407 Message: 13443

Going through E-mail from several days ago...

The search was for an adult male and his children who had attempted the night before to drive from the valley up to Magalia using logging and skid roads bypassing the closed roads (Skyway, Clark, Neal, Pentz). He got lost. I sent our helicopter up with pilot plus two spotters to locate him. They did. The father and two children were flown out while one of the spotters drove the subject's SUV out. For those that aren't familiar with the foothills and mountain country in Butte County, it's criss-crossed with thousands of miles of logging roads and is very easy to get lost up there if you aren't knowledgeable about them, how they work or where they go...

Mike

From: Jake H
Topic: 13451 Message: 13451

Thanks everybody for the great job this last week on keeping up with the fires. Excellent info.

While there weren't many other fires happening, lets not forget to keep the subject line intact with the agency designator (BTU) and incident name (Humboldt) at minimum. I know it was obvious to many, but some of the subject lines that just say "Humboldt fire update" etc. could be construed by some to a fire in Humboldt County. Another example was the Martin Fire in CZU. After 50 posts about the Humboldt, "Martin smoke" suddenly arrives in the inbox. :) Even I had to spend a few minutes going back and figuring out where Martin belonged. :) Just want to get all of us into the habit early in the season.

Nothing personal, my silverware drawer gets the same OCD treatment. :)
Keep up the great work. It isn't going to slow down anytime soon.

Jake

And even the "County" agency designators (Operational Area designators) are listed on Page B-55 of Appendix B "CA Agency Designators & Operational Area Identifiers" (July 2007 version) at
http://www.firescope.org/ics-8x11-fog.htm
specifically,
http://www.firescope.org/ics-big-fog/ICS420-1AppendixB.pdf (Page B-55)

Also, Appendix A "Communications" (January 2008 version)
http://www.firescope.org/ics-big-fog/ICS420-1AppendixA.pdf
has a lot of interesting information and frequencies too.

My Operational Area (XCZ) utilized amateur radio operators for the Martin Fire CA-CZU-007089 too (as for the Summit Fire CA-SCU-002548), and we list those frequencies at http://ares.santa-cruz.ca.us . But Saturday morning most everybody in Santa Cruz and Santa Clara Counties awoke to a fine layer of ash on our cars from the Indians Fire CA-LPF-001491 in southern Monterey County, more than 50 miles away.

73, Cap KE6AFE

Mike,
Thanks for sharing that.
Quite well done and enlightening as to the timeline of events and ground conditions at the time, particularly in the fog of war of the initial attack. I'm going to post this link on Californiadisasters.

Corning Engine 212 was burned over during the Humboldt incident. The engine fared well. The occupants jumped ship and into the back of a PIO vehicle to get out. Here is an excellent article from the PIO's perspective. I was feeling the heat just reading that.

http://www.chicoer.com/news/ci_9630349

Location of burnover
http://maps.google.com/?ie=UTF8&ll=39.72498,-121.661997&spn=0.024095,0.047722&t=p&z=15

13458. CZU multiple fires along Hwy 1

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-20 21:18:58 UTC
From: mrkwoodward
Topic: 13458 Message: 13458

There are 5 - 7 fires along Hwy 1 in southern Santa Cruz county.

CZU CalFire and local have launcehd full dispatch. In addition they are asking for 1 strike team of local engines and 2 strike teams of any type Calfire.

There are structures in danger.

Air support is on the way, unsure of dispatch.

This is being worked on Calfire and local channels.

They're saying MULTIPLE fires along the freeway.

How does that happen? Sparks from moving vehicle? Arson?

According to a SJ Merc article, there were several witnesses who say they saw a man start several small fires along the highway about 20 feet apart.

13484. REQUEST

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-21 01:01:49 UTC
From: wireman1771@yahoo.com
Topic: 13459 Message: 13484

Can we please keep postings to one group and not duplicate them to several groups? I belong to most of the northern and central cali groups and I'm sure a lot of you do as well. Fire season is alive and well and it WILL be confusing to keep up on incidents when I have 5 copies of every post. Thanks!

13485. Re: [NorCalFire] REQUEST

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-21 01:13:06 UTC
From: Kim Noyes
Topic: 13459 Message: 13485

My recommendation to EVERYBODY on Yahoo groups is to get a Gmail account and have ALL your Yahoo groups messages sent into that one.
Googlemail organizes ALL messages by thread title and in proper order.
If you get double/triple/quadruple/quintuple postings they DO NOT come in as multiple messages but as a single thread with multiple copies or sometimes even one copy in one thread but with simply multiple email addy's in the "To" and/or "Cc" fields.
I highly recommend it to you all.
Oh, and Gmail's Spam Filter really rocks!

Kim Patrick Noyes

13486. SRF & SHU Numerout lightning starts

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-21 01:17:16 UTC
From: Harry Marnell
Topic: 13486 Message: 13486

SRF, SHU and HUU sending resources including copters, tankers and jumpers to numerous downstrike fires in the Ruth and Mad River areas, including "Gaynor Mtn" and "Van Duzen" incidents.

From the coast I'm hearing only intermittent traffic, including
Command - SRF Forest Net - 168.725
SRF Tac - 168.200
Unk use - 171.575

I'm obviously missing most of the show - do we have anyone in Southern Trinity or S/E Humboldt Counties on here?

(And lots of pyrotechnicocumulophlebotomectacular clouds have been building over that area the past 2 or 3 hours, too).

Harry

Thank you Kim. Yes - GMail will thread your messages. If you are using a local reader like Outlook or Thunderbird, setup filters and mailboxes for each yahoogroup. It does take a little learning but very rare. There is no solution to being subscribed to multiple groups. All I can say is norcalfire and socalfire are the two main CA fire groups and should have the most traffic on them. Other groups came years later and have only a smattering of people on them. Posts tend to be similar amongst all of the groups.

Please end this thread with that, until things quiet down. Also, no one-line or one-word posts please.
I have family on Larkin Valley Rd right under that plume of smoke. Evacuated.

Jake

You all are quick. I just heard Helicopter 510 and AA06 enroute to Shasta for fires with multiple fires and was wondering where they were headed and what was going on.

SRF, SHU and HUU sending resources including copters, tankers and jumpers to numerous downstrike fires in the Ruth and Mad River areas, including "Gaynor Mtn" and "Van Duzen" incidents.

From the coast I'm hearing only intermittent traffic, including
Command - SRF Forest Net - 168.725
SRF Tac - 168.200
Unk use - 171.575

I'm obviously missing most of the show - do we have anyone in Southern Trinity or S/E Humboldt Counties on here?

(And lots of pyrotechnicocumulop hlebotomectacula r clouds have been building over that area the past 2 or 3 hours, too).

171.575 the unknown freq is the admin net for the Shasta T Forest. Admin is often used during lightening action plans such as what they are in now. This frees up the main fire channel. Most forest will do this.

13496. Humboldt County: More lightning starts

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-21 03:27:22 UTC
From: Harry Marnell
Topic: 13496 Message: 13496

Per Fortuna Command Center, and from my location I can confirm, the lightning activity is moving west toward the coast, mostly in Southern Humboldt, with some active fires still in the SRF between Highways 299 & 36, around Onion Camp, Gainor Peak, Willow Creek. For the most part this is remote and sparsely populated area.

Air Attack 121 is checking out some strikes and smokes north of High Rock Camp, http://tinyurl.com/5qxpos and they're rounding up some crews and engines to respond to more reports. Sunset at Garberville tonight is at 20:48, current temp there is 86? with 19% RH; report that instability in Garberville/Pratt Mtn area increasing as warmer air is bumping against the onshore flow.

Another new start in Yager Creek area now being reported by "another AA" to AA121, at 40?24.55N, 123?48.0.

Spotting a third one even as she speaks, at 40?24.83, 123?59.61 (good road access on this one, she says)

Harry

Ok fine I was just trying to bring a peaceful solution to what can be a confusing situation.

It was my understanding that if a fire happened in the bay it stuck to bayscan or bay area fire, norcal fires to this group and CenCal to that appropriate group. Don't see why someone in butte, shasta, siskyou, etc.. needs info on a fire in the scu, beu, slu, etc and vice versa. If we wanted info from a different part of the state we joined that areas appropriate group. Guess that idea fell through.

So if you guys like the posting chaos a major fire brings, happy reading.

I've got a scanner stream up, but I can't tell how good the quality is, at http://65.44.220.102:8010/norcal-humboldt.m3u If someone could give me a report? groupsmail@...

Adding the Palco 153.26 frequency to it.

Being in McKinleyville I'm not in the thick of the radio traffic, but the primary repeaters are coming in fine. Getting very light rain here, and increasing lightning in the area now, at 23:15

13501. Humboldt County: Saturday morning

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-21 15:20:45 UTC
From: Harry Marnell
Topic: 13501 Message: 13501

"Redcrest IC" (I think this is the fire called "Pepperwood" last night) command has switched to CalFire Command 1, 151.355; Tac 3 151.175; two tankers on order, not filled yet, but will be using Air Tac 6, 151.31. Sounds like it includes a number of separate fires

Many reported fires from lightning strikes overnight, from So Hum up to Del Norte Co. By about 0100, apparently due to darkness, inaccessability, and relatively low threats to populated areas (my interpretation of their words) Fortuna was generally having companies get the lat/lon or approx location and they would start checking them by ground or air at first light.

"...FIRE WEATHER WATCH IN EFFECT FROM 11 AM PDT THIS MORNING
THROUGH 9 PM THIS EVENING FOR DRY LIGHTNING OVER AREAS OF THE SIX
RIVERS...SHASTA- TRINITY...AND MENDOCINO NF.."

Radio activity this morning from Garberville area north to Klamath.

My feed is up at http://65.44.220.102:8010/norcal-humboldt.m3u and I think I've somewhat improved the low-volume issue - it's on the USFS freqs, which are narrowband of course; I switched receivers. Signal reports or problems appreciated.

Copter 102 now (08:15) reporting three small fires in heavy timber in Headwaters Area, BLM engines on the way:
40?38.492, 124?05.204
40?38.107, 124?04.744
40?37.978, 124?03.707

Not good. Lightning this morning over Red Bluff, very light (a joke) of rain off and on.

Red Bank LCA is activated in TGU - command post at Red Bank CALFIRE for the whole west side. They are on 151.460 Command 7. TGU is hard-covering all volunteer stations with 3 personnel each.

Shasta LCA is activated - unknown area of SHU - on 151.355 Command 1

Jumper 52 just dropped 3 jumpers over the MNF, just south of Lake Pillsbury - cluster of 4 fires

All sorts of fun on norcalscan.org live scanner

A few downstrikes occurring in HUU and SRF (10:30 a.m.); haven't heard anything about LCA here yet. Main fire in my listening range is the Redcrest Incident. Air resources are AA121, Tankers 94 and 95, Copter 102; Copter 104 enrote; requested three additional type 1 copters, won't be filled til late this afternoon at best

Command - 151.355
HUU Local Net - 151.25
Tac - 151.175
Air Ops - 151.31
AA - 122.925 & 123.975

Palco (Pacific Lumber Co) on 153.26 & Green Diamond (formerly Simpson) on 49.30 & 151.505 also have numberou resources all over the mountains, helping both themselves and CalFire.

Fortuna broadcast an immediate need request to all Local Govt & VFDs for Type 3 engines and water tenders, call in when available for assignments. Only one response so far, from far-off Petrolia.

Red flag alert posted for the coastal and inland areas of Humboldt, Mendo & Trinity counties through this evening.

Just as an FYI in case you haven't found the Weather Underground Wundermaps site, you can go to the link below which should bring up the Weather Underground map site. center it on whatever city you like by entering a city on the upper right. Scroll down to the map controls at the bottom of the map and enable Nexrad Radar and weather stations. The map will populate with radar images of the activity going on along with all the personal weather stations in your view. It doesn't show down-strikes but it does show intensity colors so you will have to extrapolate as to where the lightening activity may be.All of the starts this morning on MNF were pretty well lit up by the radar images. you can drag the map around to different areas. Pretty cool site. My weather station is feeding the site in Chico as K6EL, NW Chico.

SHF patrol
Copter 510 southfork drainage
Copter 553 hayfork area
170.4875 District Net - working smokes in Tomhead, Hayfork area.

TGU
36IC is below Tuscan Buttes in the SevenMile creek area. Requested some overhead. Begged for a copter but was told he was on order 66 for a copter. Copter 205 just got off another 3acre fire just contained (Saron IC) so he's helping out 36IC now with bucket work.

Inskip Peak lookout just went unstaffed. Attendant's son got stung by a bee, allergic reaction and raced off the hill to meet the ambulance - enroute code3 to hospital. A major cell line just went over the east side in Inskip's area. Not a good time to have an empty lookout.

Most dispatches are not toned out now due to busy traffic. Just pre-alert and then a list of engines to respond.

SHU
has cells all over the valley and has potential for smokes from Igo west to Oak Run east. Reach 5 declared a smoke in the Oak Run area as he flew over. Hidden IC on Shasta County F3 is working in Bella Vista, Hidden Oaks at Squaw Grass Trail between Dry Creek and Intermountan Rd.

13511. Cal Fire news looking for authors

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-21 19:19:57 UTC
From: calfirewater
Topic: 13502 Message: 13511

Hi guys and Gals I am the editor of California Fire News
<http://calfire.blogspot.com/> and I am looking for a few good authors
(Scannerheads) to help out with the blog.

The pay ranges from squat to sucks but there are some intangible
benefits, such as ability to add links to other websites and groups.
Published author status, and you become media and obtain the ability to
cross fire-lines in a single bound (Most of the time).
This source of Cal fire news has become very important to the public
with thousands of hits per day and is watched closely by CAL FIRE Ops
and we receive emails from them.

I am trying to form a core group of authors and photographers that I can
depend on.

Harry, Jake and others seem to write in the style of Cal Fire news and I
would love to welcome them aboard.

Please excuse the Off topic and Cross posted interuption and consider
joining the Cal Fire News Team
Sincerely,
Bob O'Connor
Editor - Cal Fire News - California Fire News
<http://calfire.blogspot.com/>

Yeah - I think TGU/LNF is really missing Inskip right now. I'd volunteer if I wasn't scared of lightning in a metal tower. ;)

As of 1300,
TGU fires unstaffed:
Mill Creek Canyon near the valley floor, 10 acres moderate rate of spread
Grapevine Creek (up Hogsback Road), 3 acres moderate rate of spread
Inskip Peak just east of lookout, 10 acres moderate rate of spread - TGU has this as priority one - aircraft starting to work it.

TGU fires staffed:
36 IC - seven mile creek and tuscan springs area. near containment 50+ acres. Dozers and water tenders requested into the springs area off of Hogsback road.
Saron IC - Saron Fruit Colony - BLM land. No BLM Duty Officer available for contact. contained

SHU fires:
Numerous fires working Oak Run, Fern, Whitmore road areas, all in grass and oak land.
AA 240 working recon in the area.

Being a lookout is fun. I filled in at Colby and Antelope a few times and it is fun. They have grounded chair that you sit on and you are fine. I hear them requesting a lot of resources for the fires but not hearing much of a respone until just now. Going to be busy. Lightning fires are the funniest because you get to bounce around on different fires.

By the way Jake, George Weaver says he knows you and that He is unable to load the live scanner on his computer and is going to have you fix it. Just a heads up.

From: Bill Snyder
Topic: 13521 Message: 13521

Best Free Lightning Site Out There!

Well, it's again time to post the following seasonal radar detector message. This is a handy resource. Once you have this tuned-in to your area of interest, bookmark it!

Pardon the single crosspost to norcal and socal. Please respond only on SoCalFire@yahoogroups.com

Weather Underground is integrating the StrikeStar network of Boltek lightning detectors into their NEXRAD Doppler radar maps.

Go to:
http://www.wunderground.com/radar/map.asp

Select a NEXRAD Radar Station (white cross) in your area of interest.

At the top of the map, select "animate map".

Scroll down to "Radar Controls" and select the following (suggested) parameters:
Animate: 6 frames
Clutter: Hide
Labels: Show
Lightning (experimental): Show (important)
Smoothing: On
Remember these settings: (check the box)
Click "Update Radar Map"

Now, click and drag on the map to create a zoom box.

Downstrikes appear as small, pulsating black boxes, usually accompanying a strong storm cell.

Of course, you have to have participating Boltek lightning detectors in your general area.

There are plenty of optional settings to play with. Try clicking on the pop-up bar on the left edge of the map.

Don't forget to bookmark the site.

Enjoy!

910 wouldn't seem to be of much use over here toward the coast; still getting requests for mostly crews and water tenders (lotsa luck), but most of the fires are pretty localized. Largest one I've heard is the Williams IC, I believe, at 15 acres, who's requesting engines or if none available, "foam and lots of hose"

There's even a JAKE fire, Jake, SRF-1072, east of Somes Bar and Hwy 96. http://tinyurl.com/4p23vb

> Highway 20

Posts (and apparently radio coverage) for Willits/Ft Bragg have been non-existent today on NorCalFire, but if they're coming to Willits it's possible they're headed up 101 to northern MEU or anywhere in HUU or SRF. Dozens of lightning fires since last night, and everyone here is totally tapped out.

On the coast side I'm streaming HUU and SRF at http://65.44.220.102:8010/norcal-humboldt.m3u - though most of the fires require Type 3 engines, if even *they* can get through the logging roads. Most of the need here now is for aircraft and crew STs.

and inland for SHU, TGU etc is Jake's feed at http://216.68.233.15:8000/listen.pls among others

If those STs hustle they can grab a deli sandwich at Granzella's Deli before they close at 20:00

Harry

1800 update

TGU:
* Red Bank LCA, Paynes Creek LCA and now Paskenta LCA are established and on Cmd 7 151.460.
* Inskip Peak staffed again after taking her grandson to the hospital for a bee sting reaction. Good to have her back on.
* Aircraft were working the fires on the east side in the Mill Creek Canyon, Antelope Creek Canyon etc. I've lost all track of what the priority fires are on the east side.
* new fire starting in Newville Road, Black Butte Lake area. This is in the Paskenta LCA
* a large cell went over Vina to the NE over Mill Creek canyon the past hour - this is what Nitrobear was seeing.

SHU:
* new fire 25-30 acres started up in Coleman Fish Hatchery forebay.
* Shasta LCA is working Cmd1 151.355. Lateur Butte lookout working the LCA
* Weaverville LCA is working Cmd2 151.265
* Most other fires in Millville, Oak Run, Whitmore area sounds like they're knocked down
* Initial attack on larger establish fires are on local net 151.160

SHF:
* Working on District Nets 170.4875, 172.275. Tomhead Mtn Lookout active.

LNF:
* Working on Forest net 172.225. Colby Mtn and Inskip Peak active.

BTU:
* Lightning Complex broken into 4 branches, Butte Creek, Stirling City, Cohasset, Concow. All on 154.415 Butte Support.
* Each branch has their own tactical, Haven't caught what belongs to all, but gridley firenet for Concow Branch I believe.
* Sawmill, Bald, Bloomer lookouts active.

I flew down to the Bay Area this morning and flew back this afternoon to find 11 identifiable fires buring in Butte. Most are in rugged conditions that can't be accessed by engines and yet there are few if any aircraft able to respond as they are all on different fires.

Right now, Calfire is worried about the fire in the Centerville Canyon burning up towards Magalia and Nimshew...

It's going to be a long week folks...

Live scanner update
Pri1 151.370 TGU Local
Pri2 151.160 SHU Local
Pri3 154.415 Butte Support
commands, tacticals, air tacs interspersed between those.

Large column can be seen on the Nimshew/Centerville fire from Chico. SAR is gathering for possible evacuations for lower magalia.

If you were South of Hwy 193, they might have been responding to an incident near Georgetown. Otherwise, they would likely cross the county line and you can take your pick of the fires up North.
There are literally dozens of fires in El Dorado, Amador, Calaveras, and Tuolumne Counties. Most are on Federal land. Most are very small, but there are more fires than resources. ICs, many of them Captains, are horse-trading for Type 3s. ENF is divided into North and South response zones. North is on Forest Net, 171.525. South is on Admin, 172.325.
Camino ECC asked a local government engine to cover Sutter Hill Station.
All ICs are asking for more resources but many are acknowledging they are "probably low priority".

Per Bloomer LO, another cell over the area with multiple downstrikes between him and Bald Mtn, unable to pick up any new starts at this time.

Rubbing my crystal ball says that there will be LOTS of radio traffic in the early AM as all the starts get counted and called in.....

You know....even knowing what they can do in dry season, I still love a good thunderstorm.....

PA,
I also love a good Thunderstorm and have had the chance to see some in the mid west. It is really depressing however to just see dry lightening this time of year. The strikes hammering down today just make you shudder after what we went through last week with the Humboldt fire.
Darn humidity is up to 60% here and still 80 F so I doubt it will calm down soon tonight.
Good luck troops! At least there is a little moisture I guess...groan

From: Rex W. Reynolds
Topic: 13551 Message: 13551

TUOLUMNE COUNTY - STANISLAUS NAT. FOREST AND YOSEMITE NAT. PARK

Lightning Strike Caused Fires 6/21/2008

I'm only half way through the recordings and I'm bushed. But so far
I've caught the following:

Incidents by Name:
SKY HIGH INCIDENT

GRIZZLY INCIDENT

POOL INCIDENT

NORTH MOUNTAIN FIRE

DUCKWALL FIRE

IN THE WOLF MEADOW AREA

IN BETWEEN NORTH MOUNTAIN AND WOLF MEADOWS

PLUM INCIDENT

INDIAN PEAK FIRE

WILSON MEADOW BY CHERRY LAKE? DID HE SAY WOLF MEADOW EARLIER OR IS
THIS A 2ND FIRE?

SOMEWHERE BETWEEN INDIAN ROCK AND MT WATKINS ON THE NORTH RIM OF THE
VALLEY KIND OF OPPOSITE OF HALF DOME

The frequencies I've tried to transcribe from:

155.2050

155.4750

159.3900

159.4500

163.1000

164.1500

164.4250

166.3000

166.8500

168.0500

168.1500

168.2000

168.5625

168.6000

168.6125

168.7500

and I still have these to go:

168.7500

169.9250

170.0000

170.5000

171.3900

171.5000

171.6500

171.8000

171.8250

172.0250

172.2250

172.4000

172.6500

172.7750

and the air assets:

TANKER 480

HELICOPTER 503

AIR ATTACK 440

TANKER 20

HELICOPTER 551

TANKER 43

TANKER 42

TANKER 75

? BRAVO 3 ?

What a busy day here.

Rex in Jamestown, CA

We passed 6 or 8 engines headed north on 101 just north of McKinleyville around 9 pm this evening. At least 1 Cal Fire and one Six Rivers Engine. Not sure what else. Various city department engines it looked like. Driving gets in the way of sightseeing.

13554. Big Picture of starts yesterday

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-22 15:38:17 UTC
From: nitrobear@comcast.net
Topic: 13554 Message: 13554

Here is the overview of the fires that resulted from the low that spawned all of the lightening activity yesterday. Some have drilled down by county for more detail. This is just the 50,000 foot view. Pretty amazing!

Northern California Lightning Series Summary
Northern California Lightning Series Summary Incident Information:
Last Updated: June 21, 2008 9:30 pm
Date/Time Started: June 20, 2008 12:00 pm
Administrative Unit:CAL FIRE Operational Units
County:Various counties and locations throughout Northern California.
Location:Various counties and locations throughout Northern California.
Acres Burned: See "Conditions" below
ContainmentSee "Conditions" below
Conditions: Summary of Fires by Unit

Siskiyou Unit: 8 fires reporting minor acreage
Humboldt Unit: 37 fires for approximately 120 acres
Mendicino Unit: 90 fires that range in size from 1-125 acres
San Mateo-Santa Cruz Unit: 15 fires up to 2 acres in size
Amador-El Dorado Unit: 18 fires
Nevada-Yuba-Placer Unit: 7 fires all less than 1 acre each
Butte Unit: 21 fires for a total of over 60 acres
Tehama-Glen Unit: 34 fires for a total of 550 acres.
Shasta-Trinity Unit: 62 fires up to 50 acres in size.
Sonoma-Lake-Napa Unit: 5 fires with 4 contained and one burning near Napa West of Fairfield at 300 acres.
Lassen-Modoc Unit: 27 fires for a total of 25 acres.
Tuolumne-Calavares Unit: 15 fires for a total of 140 acres.
Phone Numbers (530) 225-2510 (Northern California Joint Information Center)

13555. Shasta County Fires

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-22 16:28:17 UTC
From: djohnsonhot
Topic: 13555 Message: 13555

Hello, I joined yesterday. Does anyone know of a website that is more specific as to Shasta County fires?

There is very general info there saying that there 60+ fires and no homes threatened....

We live in Shingletown and there is smoke in the air and no one to call.

Thanks,

DJ

Copter 901 9 miles out of the Incident. From SCU, no fixed wing on
either this or the lick incident. 2 copters only. Listening to NEU
traffic things are getting pretty bad out there as IC requested 4
tankers and was told none were available.

Welcome to the group, DJ. While NorCalFire covers the entire northern part of the state, it's just about as "Shasta-centric" as you'll find. A number of us live (or have lived) in Shasta County, and we're always quick to post - or follow - those incidents.

The last couple days have been a little unusual, as there were *so many* fires spread across so many NorCal counties, that messages about specific areas, or specific fires, tended to be overwhelmed by the sheer volume of posts here... 100 new messages (and 10 new members, including yourself) just since Friday afternoon.

CalFire (CDF's new nickname) is of course the official source for fire information in most of unincorporated Shasta County, but they're obviously so busy that they haven't had the time to update their "Currrent Fire Information" page, which you'll find at http://cdfdata.fire.ca.gov/incidents/incidents_current other than for the already-posted info at the "Lightning Series Summary" page, http://cdfdata.fire.ca.gov/incidents/incidents_details_info?incident_id=277

They also have a statewide RSS "News Feed" (information, not live audio) which you can get at http://cdfdata.fire.ca.gov/incidents/incidents_rss but it mostly mirrors the current incidents page.

There's http://inciweb.org/ which is mostly for federal fires (e.g fires on National Forests), but it too can get very busy and hard to get into. All of those sources are to a greater or lesser extent "after the fact" summaries of what's already happened, not breaking news sites.

> We live in Shingletown and there is smoke in the air and no one to call.

As far as whom to call, if you have a fire or possible fire to REPORT, it's 9-1-1 of course. "Smoke in the air" could be coming from a block away or a hundred miles away, depending on conditions, and for that I depend first on what I can see, and then on either a scanner or a live scanner feed, such as Jake's at http://216.68.233.15:8000/listen.pls CDF (oops, CalFire) lists what's called the Northern California Joint Information Center at (530) 225-2510, but I don't know what sort of specific info they have available, nor how many people they can spare to answer the phones when the smoke's hitting the fan.

Or you can always ask right here on the list if you have a significant amount of smoke and suspect it might be something nearby.

Hope that helps, and didn't wear out your eyes. I can get awfully wordy.

Harry

Yep, there's a LOT of stuff accessible through that site, though you have to learn just where to look. WildCAD is one of the places I check regularly, where it's available; Shasta-Trinity NF's at
http://www.wildcad.net/?WildWeb=CASHF

Sites that are super for *current* information, though they probably won't be implemented widely due to cost and other priorities, are like Ventura County Fire's "Fireline" at
http://38.101.117.146/fireline/

and Seattle FD's "Real-Time 911 Dispatch" at
http://www2.seattle.gov/fire/realTime911/getRecsForDatePub.asp?action=Today&incDate=&rad1=des or via http://tinyurl.com/2hh6

And there are others, and law enforcement CAD sites like CHP's http://cad.chp.ca.gov which often includes fire information, though somewhat slanted to their traffic-related mission.

From Cal Fire regarding the Concow evacs and road closures.

From: Upton, Janet [mailto:janet.upton@...]

Butte County Sheriff's department is effecting a Precautionary Evacuation Advisory for the Lake Concow Area for a lighting fire in excess of 100 acres burning off of Rim Rd. (Also referred to as Andy Mountain Rd.) in the Concow area. The fire is called the "Rim" fire and has resources (air and ground) working to contain it.

There are four road closures in effect:

- Concow Rd. from Yellow Wood Rd. north to the end of the pavement on Concow Rd.

- Concow Rd. from Nelson Bar to end of pavement

- Rim Rd. (also known as Andy Mtn. Rd) from Hwy 70 to end of Rim Rd.

- Deadwood from Hwy 70 to Concow Rd.

The American Red Cross is setting up an evacuation shelter at the Spring Valley School at 2771 Pentz Rd. off of Hwy 70.

Janet Upton, Public Information Officer

Butte County Fire Department/CAL FIRE

176 Nelson Ave.

Oroville, CA 95965

Sunday 3pm
You have a new 100+ acre fire starting on the Shingletown Ridge. If you have a scanner, it's on 151.265 for admin traffic. Very little resources available - it is becoming Shasta's #1 priority now due to homes in the area. Unsure of actual roads.

This fire is growing fast. Spotting ahead of it and those fires are
getting established. Fire name is 3-19 (three dash one nine). Very large
column seen from Anderson.

Tact 9 will be the tactical for 3-19 fire it sounds like. Various
copters coming in the next 15-30min. Command is on 151.265.

Shasta County live scanner on norcalscan.org
Pri1 - TGU Local Net
Pri2 - Shasta Command
Pri3 - Butte Support
various air tacticals, command nets, local nets and forest nets
interspersed in there too.

Correction
Fire on Shingletown Ridge is called 3-15 (three dash one five). Will be
on Tact 9 151.385, Command is 151.265 ("Branch 3, 4")

Update to live scanner
Pri1 - Shasta Command "Branch 3, 4"
Pri2 - Butte Support (various large fires pushing evacuations in Concow
area etc.)
Pri3 - TGU Local (might switch to Tehama Command)

13568. SHU - Shingletown evacuations

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-22 23:24:26 UTC
From: Jake H
Topic: 13555 Message: 13568

As of 4:22pm, Sheriff is now started evacuations of both mobile home
parks and Woodridge Drive of Shingletown.
This is for Fire 3-15 (three dash one five) with command on 151.265 and
tact on 151.385.

Shasta Sheriff on 158.730

13569. Re: [NorCalFire] SHU - Shingletown evacuations

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-22 23:36:04 UTC
From: Jake H
Topic: 13555 Message: 13569

Be aware for those listening to the radios, there seems to be a second fire on Wilson Hill Road that is NOT part of fire 3-15. That fire is second priority, not getting new resources on it, and those that are there are going into structure protection mode on Wilson Hill Road. It appears the Wilson Hill fire is also looking for Sheriff evacuations, but Sheriff is prioritizing on Woodridge Drive and the two mobile home parks. Getting confusing.

Command on 151.265 seems to have established a common name of "three four LCA" and sometimes "Branch three four". They are sharing the freq with Weaverville LCA

air for 3-15 seems to be on 122.925.

Update as of 19:20

Fire 3-15 is 200 acres, flanked by retardant. 4 dozers working direct on the fire. 10% containment. This is on the Shingletown Ridge and has been the reason for the evacuations in Shingletown.

Fire 3-14 is 1500 acres, Located to the west of 3-15 in the Millville Plains area, just north of Dersch and Hwy 44 intersection. The primary goal is to keep it north of Bear Creek. If it jumps Bear Creek it will be immediate structure protection needed along Hwy 44. So far they think it's stayed to the north, requesting a recon flight over the fire before aircraft shutdown for the night. Fire is active in the Clough Creek Gulch.

Your feed sounds excellent, Jake, thank you.

I've never heard this kind of incident naming before, assuming the numbers like "3-16" are the names of incidents up there. Maybe it's logical for the users, which is what really matters, but it sure make it vague and hard to follow for those of us in the teeming, listening masses. Especially if we can't listen continuously. But as I say, they don't choose their procedures and tactics for OUR benefit.

It's common for branches and divisions and other groups to be numbered, so maybe it's just an extension of that?

Harry

Speaking of incident names, the fire in Paradise was the "Humboldt Incident," and this weekend in Humboldt County we've had a "Paradise Incident" lightning fire.

When each district on a forest(USFS), battalion in each unit(CALFIRE) starts to get lighting in their respected areas, they go into lightning plans. When they start getting multiple starts it overwhelms the dispatch centers. Lookouts & recons/air tac report any smokes to the respected area office/stations and they assign them numbers. CAL FIRE name theirs numbers first, then number sequence fire was reported in. USFS & BLM start theirs with letters, usually begins with whatever name of that district, LNF Hat Creek, H-1, H-2 etc.

For instance, TehamaGlenn I think just numbered all of their fires as 1-## yesterday, regardless of battalion or area. No confirmation of this since I haven't heard a 3-## or 4-## out of Red Bank or Paskenta LCA's yet. All the 1-## were in battalion 1 - the Paynes Creek/east side of TGU.

Shasta/Trinity CalFire I think numbered based on the battalion number. Battalions 3-4 is Whitmore/Fern/OakRun and Shingletown areas I believe. Naturally, "three-four LCA" is on command 2, and fires are numbered 3-## etc.

During normal days, we'll get the English named fire. When chaos hits, they just start assigning numbers as you could get 2-5 fires reported every 5 minutes all day long.

Another good site to find fire info in at www.wildlandfire.com on the hotlist and the area that you are interested in. I think all of NorCal is smiked in. I know here at Lake Almanor we have.

I believe that numbering system is used during a lightning siege. Not sure.

Your correct Dennis. Anytime a unit goes into a Lightning Action Plan they number all fires by division or battalion depending on what agency it is.

Hi, Jake,

This is Dave again from Shingletown...thank you and the folks here updating us...this is fantastic info.

Do you have any reference to a fire called PONDEROSA (Withrow Road). This would be located to the North of Hwy 44 near Ponderosa Road. Channel 7 news mentioned a flare up this morning at 6am PST.

It is now 9:10a. We have packed in prep to evac. That particular fire is 3.7 miles from my home (due west from here which is Circle K Drive and Shadee Lake in Shingletown.

We are concerned. Ash fell all night here. The air is thick with smoke. I did not sleep last night.

I called the CDF Volunteer number, 225-2510, and they said that there were not enough Information Officers deployed here as they were out of the area on other fire lines. Therefore, she had no info on the Ponderosa Road fire.

We think that there needs to be a Hot line and web presence with Land "sections" spelled out as to status and evac data for us to be better informed. I have three neighbors out of town here who are asking me questions.

Thanks again!

Dave

Subject: Re: [NorCalFire] SHU - Shingletown evacuations

Update as of 19:20

Fire 3-15 is 200 acres, flanked by retardant. 4 dozers working direct on the fire. 10% containment. This is on the Shingletown Ridge and has been the reason for the evacuations in Shingletown.

Fire 3-14 is 1500 acres, Located to the west of 3-15 in the Millville Plains area, just north of Dersch and Hwy 44 intersection. The primary goal is to keep it north of Bear Creek. If it jumps Bear Creek it will be immediate structure protection needed along Hwy 44. So far they think it's stayed to the north, requesting a recon flight over the fire before aircraft shutdown for the night. Fire is active in the Clough Creek Gulch.

That's what I'm trying to figure out too. It appears to be a new fire that wasn't on the radar yesterday. Looks to be timber. They've been talking about it on 151.265 Command this morning.

> I called the CDF Volunteer number, 225-2510, and they said that there were not enough Information Officers deployed here as they were out of the area on other fire lines. Therefore, she had no info on the Ponderosa Road fire.

The problem with Public Information is it requires instant links back from fireline to phoneline. Basically it requires a human very near the fire or the direct sources of the fire to gather info, then relay that info in a timely manner to the public information center where the phones are. There are public information officers, but they're spread thin just as well, and timely info to them is usually only what they know in 12hour shifts. There's simply no time for that phone call or long info over a precious radio frequency. It used to be amateur radio operators would shadow the PIO's and relay this info back. But that hasn't happened for a few years now.

This is a problem in XCZ as well, however the amateur radio people have been called in to help the past three fires (Summit, Martin, Trabing).

The various responders are focused on their tasks and the amateur radio operators are a bit of spare capacity to take up the second priority tasks like getting PIO updates moved around to everybody.

From: Jake H
Topic: 13555 Message: 13583

(hint - perfect example of subject changing ;)

Timely PIO reports into the information center is definitely a void that could be filled again. It's the one black hole that often stains any positive fire response. Staffing an information center is stressful and giving of yourself. The only info they have is from the 6am and the 6pm briefings. It's a broken record all day until they get the new info from 6pm. Callers do not like hearing the same story at 3pm as they did at 8am.

Sure, that info is delayed and well edited to be very accurate and made sure not to incite panic, but I think there's a middle ground that consensus could be made there. People make irrational decisions when they don't know what's happening. If you have trained amateur radio operators shadowing the PIO, they can start making the reports up and every hour have the PIO run/edit through the report and then send it off to the valley. The amateur radio operator almost becomes a Deputy PIO or PIO assistant in the ICS structure, at no cost to the agency or its radio/phone infrastructure.

Unfortunately it takes one amateur radio operator to burn the bridge that thirty have built over the years. While there's 30 good hams out there, there's also 30 that shouldn't be out there, selfishly giving us a bad name, and making the public agencies never want to deal with amateur radio again. We've been trying to rebuild that relationship with SHU for a few years now. Hams need to present themselves to agencies as unpaid professionals, clean, humble, ready to work like it's your career and paycheck. They shouldn't show up with yellow lights flashing and reflective vests on over yesterday's fishing outfit. I can speak as I am a ham myself in the "emcomm world."

Thanks for the explanations, Jake.

Dave, Shingletown

p.s. Suddenly the smoke and ash have increased dramatically (from very little smell to intolerable: scale from a 2 to an 8).....in a scale of 1 to 10.

I am also seeing spotter planes fly to our east...we are 4 miles by flight of bird North north and to the east of Shingletown "village."

I think something is up. We are getting nervous. There are no data points but this forum.

The Record-Searchlight runs two scanner feeds that *used to be* of dubious value, but you might want to try them as well, at
http://mfile.akamai.com/14328/live/reflector:47572.asx
and
http://mfile.akamai.com/14328/live/reflector:46303.asx - this one seems to have very low volume.

A quick listen is giving me a mix of fire and "routine" police traffic, but FWIW. I have no idea where they're located nor what they have programmed in.

Topic: 13605 Message: 13605

Stanislaus NF Lightning Fires continue to Burn

Sonora, CA (June 23, 2008) ... Of the ten lightning fires started Saturday across the Stanislaus National Forest, most fires are small and burned either a single tree or a few acres with low flame lengths. The largest fire is located on the north side of the Tuolumne River Canyon near North Mountain on the Groveland Ranger District. The North Mountain Fire is as large as 600 acres burning in trees and grasses dispersed among steep rocky terrain. The fire is moving towards the peak at North Mountain where a lookout tower and radio repeater station are located and has crested the ridge where it stands between Cherry Creek to the north and the Tuolumne River to the south. Fire progression to the west is impeded due to ground burned in the Early fire in 2004. Yosemite National Park lies a few miles to the east.

A type 2 fire management team took operational control of the fire today. The team will continue to utilize the support of Stanislaus National Forest resources.

An initial fire base camp will be established at the Groveland Ranger District compound. Additional firefighting resources include: Three type 3 handcrews, three type 1 handcrews, two division supervisors one type 3 strike team (supported by Stanislaus NF engines if necessary), two to four airtankers, one type 2 helicopter, an air attack aircraft, a lead plane, and miscellaneous support personnel.

Smoke will be seen and may impact residences in Tuolumne, Mariposa, Alpine and Calaveras counties.

Rgds,

Jerry T.

From: Pamela Alley
Topic: 13606 Message: 13606

351 Boy Scouts, 64 staff to be evacuated from Camp Lassen; requesting at least one large city bus to assist. Evacuation within 30 minutes. Taking a bus up that way and back is going to be very interesting, from what little I know of the roads...and all the smoke...

Fire moving up the Big Chico Creek drainage toward Butte Meadows.

Evacuations at Upper Humboldt (Lomo) and 32.....Upper Humboldt is the
closure area per CHP CAD.
Butte Meadows also being evacuated.
Hwy 32 closed at junction with 36.
It is uncertain which fire is the culprit--Sawmill Peak or Empire....

I noted at about 1400 that the wind was kicking up a bit... :(

Neither of those fires is the reason. There has been a fire in the area of hwy 32 since the lightning strikes and it just now got to a point where it is a danger. They are going slowly to get the Boy Scouts out. They have plenty of time to get the fire before it gets there and they have pounced on it with strike teams and two National Guard Blackhawks.

13609. Rainbow fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-24 23:40:13 UTC
From: m_dbelkin@jett.net
Topic: 13609 Message: 13609

Hello,
Does anyone know anything about the Rainbow Lake fire in western Shasta County? All we can find out is that some equipment was deployed at about 1 or 2 this afternoon (Tuesday). There seems to be quite a plume of smoke to the west of us and we can't tell if it's from the Noble fire in Platina or Rainbow Lake. We can't find out anything via the 225-2510 phone number.

Mary Belkin

Not as far out as the community of Platina - http://tinyurl.com/5etj8h - but there's a "Zogg Mine Rd" fire between Igo and Ono, out Placer Rd southwest of Redding. Igo & Ono are in Shasta County, and not sure if Platina is too... it's off Hwy 36.

I can't find anything listed as the Platina area. The biggest potential in Tehama is the fire named the "1-8 Fire". This fire has potential of 10,000 acres due to lack of resources. Other in Tehama also have large growth potential.

This item has no time attached to it that I can see, Dennis, but apparently this afternoon...
http://www.redding.com/news/2008/jun/24/evacuations-ordered-near-platina/

Updated: Evacuations ordered near Platina

Some 1,500 residences, 300 outbuildings and two commercial buildings are threatened by the Noble Fire in Platina, where evacuations are under way.

Highway 36 is closed from the Wildwood Store to Highway 3 and a nearby monastery has been evacuated, spokespersons for the U.S. Forest Service said early this afternoon. The fire was about a mile away from the town of Platina at noon.

The fire is one of 70 that are part of the Lime Complex, which has blackened 7,000 acres and has cost an estimated $1.8 million to fight so far, said forest service spokeswoman Suzi Johnson.

Igo and Ono in Shasta County also have been warned of possible evacuations.

"It depends on which way the wind is blowing," said Johnson. She said evacuations could be ordered today or some time in the next two or three days.

Thanks for the link, I also found

"The Noble Fire is approximately two miles south of Harrison Gulch
and has had significant growth and is established in the Beegum
Gorge. The fire is moving towards the community of Platina and
Highway 36. Numerous fires are in remote areas with steep terrain
and limited access."

on http://yubanet.com/fire.php

Thanks all for the info, my property is on the other side of Platina
so I think I'm ok.

Can't tell for sure, Mary. I've got three separate scanner feeds on three players between my two computers, and it's just about impossible to sort out what's going on where. I can only imagine what it's like for the firefolks actually doing the work, or for the residents out there.

For all of you asking about maps, the MODIS website is a good source of current fire locations. It won't identify fire names but it will show IR returns from the GOES sat. There is a link to download to Google Earth so you can watch the fires progress. The fire mentioned before started just west of Hwy 32 and it would appear from the data that it has crossed it. Up to the east there is another fire just past where 32 crosses Deer Creek for the first time and another one south of Deer Creek that is going toward Humboldt Summit.

The link for MODIS is:

http://activefiremaps.fs.fed.us/activefiremaps.php?op=maps
<http://activefiremaps.fs.fed.us/activefiremaps.php?op=maps&rCode=gbe>
&rCode=gbe

Click on the Google Earth link and then download the file, it will open Google Earth and load the file.

A good site that will load the fire names into Google is:

http://63.196.254.151/WildCAD/WildCADWeb.asp

Hopefully, that will help some of you with names and locations

Be Safe

Craig Carter

We live, by flight of bird, within 3.7 miles from this area. The location is North of Hwy 44 and slightly east of Pioneer Way.

Has anyone heard any "traffic" on this supposedly 30% contained fire. We are very concerned that it could break loose and burn a lot of homes to the South East of that location.

Thanks so much for this Group, BTW.

They were just testing a portable NIFC Command repeater.
NIFC Command 4 - 166.6125. A Comtech was asking the ComUnitLeader to switch over for some testing. Depending on the location where they put the repeater - it may be low power low coverage out into the valley.

For the rest of the group - I will be away from all radio and fire intel from basically now until Sunday evening.

From: FM #17
Topic: 13572 Message: 13631

Hi Jake, I just joined this group right now...was reading back over some entries and found this one. Are you still thinking the numbers for the fires are correct? My son is at the Tehama/Glenn Cal Fire station Payne's Creek. He's on day 6 of fighting the fire. I'm listening to a scanner on the internet and can't figure out which one is his unit. He called me on Tuesday, but I forgot to ask him which unit/crew he was on, and he could only talk for a min to let me know he was ok. He was supposed to be off on Sunday, but they are keeping all crews on for the week.

If you know of a better scanner site, please let me know?
Thanks so much. I got this scanner from
http://www.norcalscan.org/live.html
on the "listen live" link.

From: rv_user
Topic: 13632 Message: 13632

I took these from Geomap tonight. Various fire perimeters in the
Concow highway 70 area.

This should be an interesting weekend with more thunder and dry
lightning for Sat & Sun.

Subject: Re: [NorCalFire] BUTTE Complex: Frequencies

They were just testing a portable NIFC Command repeater.
NIFC Command 4 - 166.6125. A Comtech was asking the ComUnitLeader to switch over for some testing. Depending on the location where they put the repeater - it may be low power low coverage out into the valley.

For the rest of the group - I will be away from all radio and fire intel from basically now until Sunday evening.

I'm headed up to chico, paradise tomorrow. Any road closures or detours
I should know about? Taking the usual I-5 , 99 to 70 .

As of now 70 is open to all entrances (191, Pentz Road) to Paradise. Any higher than that you may run into issues. No closures in Paradise or Magalia at present. If the West Fire jumps to the west side of the Feather River, there may be problems with evacuating residents.

What did it look like? OES has their OASIS satellite trailer at the
Paradise Intermediate School - I was staffing that all day today.
I think there's a CDF Comm rig at the Silver Dollar Fairgrounds - but
don't quote me on that. They've got to have something there.
Red Cross had their Disaster Response Vehicle up in Paradise but I have
no idea where it was setup. They were staying at the Comfort Inn in
Paradise. It's the big van with a sat dish, radios etc.

A lot of local governments have spent their DHS grant monies on
outrageous comm units so it could have been one of those. Although I
doubt tehama or shasta would loan theirs (Shasta is still being
finalized with radio programming etc.) due to their own emergencies.

I haven't seen it but every time one branch has trouble communicating with another, a very powerful signal comes up as Butte Communications and it gets through to EVERYONE. They also were helping units find the best tones for their locations. I also hear an echo every time it's used. Anyone know why?

Butte County Sheriff's Communications Reserve has their Comm 2 truck at
Station 36 - Pulga (Hwy 70).

http://70.140.219.236:81/Images/Photos/Lights03a.jpg

Not sure what comms they are providing. I've been with the evacuation
group with BCSAR for the past few days. BCSO had two tactical
dispatchers at Station 36, they might be using Comm 2 by now.

13642. NorCal fires

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-26 05:01:58 UTC
From: firemanswife67
Topic: 11441 Message: 13642

We are traveling home to Orland from Oregon and was wondering if anybody can tell me if there are any fires around Hwy 299...
So far I haven't been able to find anything in that area, but that doesn't mean anything.
Thanks.

13643. Re: Fw: [NorCalFire] SHU - Shingletown evacuations

From: Jake H
Topic: 13572 Message: 13643

is he covering the station while the fire is going, or is he fighting the fire and normally based out of Paynes Creek? The Antelope Fire (called the 1-8 "one dash eight") is 3000 acres, and has a 5000 acre control line around it. If it jumps the control lines, they say it will potentially hit 20,000acres - which is typical of the fires that go out big out there every 7-10 years.

The Mill Creek fire is at 11360acres 30% contained. A lot is in the Ishi and Tehama Wilderness areas so there can't be any dozer work and the area is considered more remote than Death Valley simply because of lack of roads. It truly is an area where many spots have never seen a mechanized vehicle. Access by ground could be 2 hours or more to some spots of the fire. When we get fires out there, they go big, and it's usually a helicopter shuttle show.

From: Lisa Saldano
Topic: 13572 Message: 13644

when he called me, he was fighting the fire. had slept the night next to the truck on the side of the road...and he is based at paynes creek.
I have been listening to the scanner all night, and it was quiet for a long time...just heard someone say the fire jumped hwy 36...and now there's no more radio activity.
I'll have to catch up on what's happening when i wake up in the morning.
I work for the university police dept, and we're preparing one of our buildings for a possible red cross evac shelter tomorrow, so it will be a busy day. Other shelters are filling up quick, so we're trying to be ready to take the over flow if need be.
Thanks for the info, I'm new to this, so I've had to jump into it and learn via crash course what everything means.
Be safe, Be blessed.
Lisa

there was a fire near weaverville, but if you are coming from ore, you can take 5 all the way to orland...
no roads are closed at this time. Check here before you leave:
http://www.fire.ca.gov/index_incidents.php#middle_column
there's a map with all fires and a number where you can call to check if any roads are closed.
safe travels!

From: Harry Marnell
Topic: 13646 Message: 13646

If you're looking at 299 between the coast and Redding, last night (Weds) Caltrans was warning of "possible" delays on 299 & 96 for Thursday due to fires.

As of 5:25 am the CalTrans website says "299 IS CLOSED FROM 23 MI WEST TO 8 MI EAST OF WEAVERVILLE (TRINITY CO) - DUE TO A WILDLAND FIRE - MOTORISTS ARE ADVISED TO USE AN ALTERNATE ROUTE"

This would be about from Big Bar to Douglas City, (both directions from Weaverville)

Also, Hwy 36 "IS CLOSED FROM THE TRINITY/SHASTA CO LINE TO PLATINA (SHASTA CO) - DUE TO A WILDLAND FIRE - A DETOUR IS AVAILABLE"

Go here, http://www.dot.ca.gov/hq/roadinfo/ and type in the highway numbers you're intested or call 1-800-427-7623 for current CalTrans road info. In general that website and phone number are more up-to-date for highway closures than the fire websites

13647. RE: [NorCalFire] BUTTE Complex: Frequencies

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-26 15:53:40 UTC
From: Larish, Michael
Topic: 13628 Message: 13647

Red Cross DRV was at Paradise PD/Fire last night in the parking lot when I stopped to have a face-to-face with one of the Paradise Chiefs. Butte County Sheriff's Office Comm 2 was at Jarbo Gap, Station 36 as of Tuesday night although could have moved yesterday with the ICP. CalFire has a Comm Rig at the Silver Dollar Fair Grounds in Chico where the overall ICP is. OES's OASIS trailer has been bumping around Butte County providing assistance to the public and local government who are providing assistance, paperwork, etc. for the fire victims of the LAST fire (Humbolt). Up to now, it hasn't been doing Lightning Complex work.

Mike

I haven't seen it but every time one branch has trouble communicating with another, a very powerful signal comes up as Butte Communications and it gets through to EVERYONE. They also were helping units find the best tones for their locations. I also hear an echo every time it's used. Anyone know why?

What did it look like? OES has their OASIS satellite trailer at the Paradise Intermediate School - I was staffing that all day today.
I think there's a CDF Comm rig at the Silver Dollar Fairgrounds - but don't quote me on that. They've got to have something there.
Red Cross had their Disaster Response Vehicle up in Paradise but I have no idea where it was setup. They were staying at the Comfort Inn in Paradise. It's the big van with a sat dish, radios etc.

A lot of local governments have spent their DHS grant monies on outrageous comm units so it could have been one of those. Although I doubt tehama or shasta would loan theirs (Shasta is still being finalized with radio programming etc.) due to their own emergencies.

Possibly you are referring to the Emergency Communications Response Vehicle (ECRV). It's been assigned to the Butte area and is manned by two Red Cross Communicators/hams from the ARCBA chapter (greater Bay Area). It normally is staged from Sacramento.

See more about the ECRV at http://www.ecrv4712.org/ECRV4712/links.cfm

I came back from working in Ferndale today and the only route open was 36 to the junction of 3 then to 299 and into redding. There was a hard closure closure at the intersection of hiway 36 and 3. The Caltrans guy said they were evacing Platina to RWild horse ranch but i cant confirm that. Was in the Rainbow lake Road area near IGo and Ono this afternoon and Caltrans had a sign up stating fire crews only on Platina road but it was unmanned.Real hard to tell what is happening because of almost o visibility in the area.

13653. thank you everyone for the great freq list

yes this was confirmed last last nite from yuba net dot net , about 11 pm ,

To: norcalfire@yahoogroups.comFrom: wildfirebuff@...: Fri, 27 Jun 2008 01:04:03 -0700Subject: Re: [NorCalFire] NorCal fires - 299 is partially Closed Thursday morning

I came back from working in Ferndale today and the only route open was 36 to the junction of 3 then to 299 and into redding. There was a hard closure closure at the intersection of hiway 36 and 3. The Caltrans guy said they were evacing Platina to RWild horse ranch but i cant confirm that. Was in the Rainbow lake Road area near IGo and Ono this afternoon and Caltrans had a sign up stating fire crews only on Platina road but it was unmanned.Real hard to tell what is happening because of almost o visibility in the area.

13655. [NorCalFire] Friday Morning highway info

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-27 16:45:47 UTC
From: Harry Marnell
Topic: 13655 Message: 13655

As of 9:22 this morning (Friday), here are the current fire-related road conditions from CalTrans http://dot.ca.gov/ and CHP http://cad.chp.ca.gov for the far north state, excluding normal construction delays or closures. All subject to change at any time

I-5: NORTHBOUND TRAFFIC IS REDUCED TO 1 LANE FROM 12.2 MI NORTH TO 16.2 MI NORTH
OF REDDING (SHASTA CO) - DUE TO A WILDLAND FIRE. Per CHP log, only the right lane is closed, starting at O'Brien Flat, and they're expectig to reopen that lane shortly. A vehicle fire that apparently got into the brush. http://cad.chp.ca.gov/iiqr.asp?Center=RDCC&LogNumber=0094D0627

Hwy 3: No restrictions

Hwy 32: 1-WAY CONTROLLED TRAFFIC AT VARIOUS LOCATIONS FROM 12 MI WEST TO 8.9 MI WEST OF THE JCT OF SR 36 (THEAMA CO) - DUE TO WILDLAND FIRE

Hwy 36: CLOSED FROM THE JCT OF SR 3 (TRINITY CO) TO 31 MI WEST OF RED BLUFF (TEHAMA CO) - DUE TO A WILDLAND FIRE - MOTORISTS ARE ADVISED TO USE AN ALTERNATE ROUTE

Hwy 70: CLOSED FROM 7.6 MI WEST OF PULGA (BUTTE CO) TO THE JCT OF SR 89 /THE GREENVILLE WYE/ (PLUMAS CO) - DUE TO A WILDLAND FIRE - MOTORISTS ARE ADVISED TO USE AN ALTERNATE ROUTE

Hwy 299: INTERMITTENT 1-WAY CONTROLLED TRAFFIC AT VARIOUS LOCATIONS FROM 2 MI WEST TO 2 MI EAST OF INGOT (SHASTA CO) - DUE TO A WILDLAND FIRE
(that's east of Redding; apparently it's open thru Trinity & Humboldt Counties for now.

Harry

13656. Tehama Command 7 CTCSS

From: Dennis
Topic: 13656 Message: 13656

Does anyone know the CTCSS tone CalFire is using for Command 7 in TGU.
I'm getting so much other traffic I'm having trouble following it.

Thanks,

Dennis

p.s. That would be the output tone.

If anybody else is interested, I was able to scan for the CTCSS and found it at 103.5

Didn't think my handheld would pick it up from Antioch.

Dennis

13659. Santa Cruz county strike teams?

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-27 22:21:41 UTC
From: mrkwoodward
Topic: 13659 Message: 13659

Does anyone know where the 2 strikes teams of local type 1 engines from Santa Cruz county were deployed?

Last night at 9:35 2400, 2411, 2511, 3414, 3513, and 4511 were meeting at Scotts Valley station 1, then headed over Hwy 17.

Wednesday at 12:25PM, 2311, 2710, 3110, 3412, and 4412 met at Scotts Valley station 1 before heading over Hwy 17.

The county is starting to get stretched a bit thin right now.

Thanks,
Mark

North Mountain Fire 30 Percent Contained
Friday, June 27, 2008 - 11:00 AM

Sonora, CA -- According to Stanislaus National Forest Public Affairs Officer Pat Kaunert the 1,411 acre North Mountain Fire in the Cherry Creek Drainage area of the south county is 30 percent contained as of 11am Friday.

422 crew members are fighting the lightning-caused fire that has now cost approximately $750,000.

Because the immediate area is inaccessible to engines and dozers, hose line has been laid to bring water up from the Tuolumne River to the outer perimiter of the fire.

Crews are ever watchful of the predicted thunderstorms that could bring more lightning streks to the foothills and the Sierra Nevada later today.

There has been little if any change in the 2,200 acre Oliver Fire in Mariposa County. The fire is still listed as 20 percent contained. Cost of fighting this fire has increased from $3.03 to $3.37 million since
Thursday evening.

13676. Ladder truck strike teams

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-28 03:06:42 UTC
From: Brian
Topic: 13676 Message: 13676

Any hear any heard on strike teams of about 15 ladder truck companies passing through the Oroville and Chico area from as far away as Carlsbad? Where they were heading and so forth? Heard that even a Tiller was part of the convoy. What a long ride for that person? The only thing I can think of is Shingletown area.

13677. June 2008 Lightning Seige

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-28 03:27:02 UTC
From: Tim Tribble
Topic: 13677 Message: 13677

There are 30 fires/complexes burning in the State right now for a total of 301,632 acres. There are 17,323 personnel, 1,201 engines, 299 dozers, 453 hand crews, and 358 water tenders battling the fires.

There is more lightning predictied for tonight and tommorow over the Sierra Nevada and Cascade Ranges along with the mountains of the North Bay (Coastal Range).

A complex is a group of geographically located fires managed as one incident.

Are all of you kidding me right now! I am sitting here in Butte County right now among the smoke and fire. All of the fireifghters that I have talked to when this topic of "Banning Firworks" is discussed they become discouraged. The firefighters think that a patriotic show would lift their spirits, specifcally at the Incident Base, where they have one every year! (At the fair grounds)

All of these people (Jo Q public to the governor) are insane. For crying out loud they make fireworks in a COMMUNIST COUNTRY, and we the United States of America can't light them off, especially now because of the fires. Should we ban cars because there killing people everyday. We, as a free society, have to accept the minute consequences of being free. If fireworks burn a house or houses down or destroy the wildland, why should that affect the millions of others who are safe and enjoy fireworks. I am done, but don't ban fireworks this Fourth!

in a proper area this would be wonderful but for the fools that set them off just
to see fire burn down things this i dont agree with and we get the boneheads that feel it doesnt matter where they are but to
set them off where ever they want even in our forest hellooo nooooo
my 2 cents.

Definately, would have been a great pic. I wonder what the most miles driven at one time on the back of a tiller is? I know that you must have a Class A license to drive one and 10 max driving.

13685. Butte Red Flag Warning

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-28 17:33:44 UTC
From: nitrobear@comcast.net
Topic: 13685 Message: 13685

The local radio station during reports this morning announced at 10:00 that a Red Flag Warning has been posted for Butte County due to predicted weather conditions including Thunderstorms and dry lightening. The RFW is in effect until 05:00 Sunday morning.
The inversion layers are also lifting today around Butte County and the planners are not sure what sort of fire behavior might develop when the inversion is broken.
The smoke in Chico this morning is significantly less than the past several days with ~ 6 mile visibilities along with hazy sunshine..

13686. Neat fire mapping and planning site

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-28 17:43:52 UTC
From: nitrobear@comcast.net
Topic: 13686 Message: 13686

I may be the last one to discover this site so forgive me if this has been shared with the group before. The site is the California Fire Alliance and there is a planning and mapping tool page that is pretty slick especially with so much activity making it hard to understand where the fires are!
Here is a link to the Planning and Mapping page or Google California Fire Alliance.
There are a lot of features to play with...enjoy.

list of resources on norcal fires

CAL FIRE has deployed the following fire and rescue resources and activated the following personnel:

8,078 personnel
643 fire engines
217 crews
150 bulldozers
53 helicopters
11 fixed wing aircraft
168 water tenders
18 air resources from the National Guard have also been mobilized to support firefighting activity (including those en-route):

Six Type-1 helicopters;
Two Type-3 helicopters and one imagery aircraft with infrared (RC-26) from the California National Guard;
Two Federal MAFFS were in Chico today from North Carolina;
Two additional Federal MAFFS are en route to California from Colorado;
Two additional Type-1 helicopters arrived in California today from the Nevada National Guard;
Two additional Type-1 helicopters from the Oregon National Guard are bring requested and;
One additional imagery aircraft with infrared (RC-26) has been requested.
Additionally, the Governor's Office of Emergency Services has requested 10 federal air tankers (SEATs) be deployed to California.

On Saturday, the Governor ordered the CNG to mobilize a total of six helicopters and one RC-26 remote sensing platform to assist in combating the wildfires in Northern California. Five National Guard helicopters with water dropping capabilities were deployed to support firefighting efforts in addition to the six CNG helicopters, RC-26 imaging aircraft and two MAFFS aircrafts that were requested over the weekend and were in place in California

13689. Update for Northern Calif-3:30 6/28

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-29 01:35:25 UTC
From: nitrobear@comcast.net
Topic: 13689 Message: 13689

Below are selected updates for fires in the north state. The Cal Fire and Inciweb sites are experiencing difficulties due to Internet load so rather than link, I am putting some of the Inciweb updates up here.
I can't see mch over the Sierra but my lightening sensor, the 40 meter ham band with a lot of field day activity is pretty quietl

CaliforniaFires: 33Acres: 305,112New fires: 1Fires contained: 0
Inciweb is having technical difficulties due to the high volume of Internet users trying to access these sites. The technical staff is working to restore access to the site as soon as possible.
Northern California Joint Information Center - Call 530-226-2749.
NEW Alps Complex (Shasta-Trinity National Forest): 1,880 acres at five percent contained. This complex of 15 fires is three miles northeast of Burnt Ranch. Active fire behavior was reported. Residences are threatened.
Information: Call (530) 226-2500 ext. 2.

American River Complex (Tahoe National Forest): 2,570 acres at five percent contained. This complex of three fires is 11 miles northeast of Foresthill. Power lines, watershed, and private inholdings are threatened.
Information: Call (530) 478-6101.
Antelope (Lassen National Forest): 600 acres at an unknown percent contained. This fire is seven miles southeast of Paynes Creek.
Information: Call (530) 257-9553.
Basin Complex (Los Padres National Forest): 26,876 acres at three percent contained. This complex of two fires is five miles southeast of Big Sur. Evacuations remain in place. Hwy 1 remains closed.
Information: Call (805) 961-5770 or visit the web site (click on Current Conditions).
BTU Lightning Complex (Butte Unit, Cal Fire): 11,500 acres at 15 percent contained. This complex of 31 fires is in Butte county. Active fire behavior was reported.Jarbo Gapa and Concow are threatened. Precautionary evacuations were issued for several communities. Highway 70 is closed.
Information: Call (530) 538-7826 or visit the web site.
Canyon Complex (Plumas National Forest): 8,718 acres at five percent contained. This complex of 30 fires is 16 miles northeast of Paradise. Residences and archeological sites are threatened and road closures are in effect.
Information: Call (530) 283-7883.

Corral (Lassen-Modoc Unit, Cal Fire): 4,800 acres at zero percent contained. This fire is 23 miles west of Termo. Moderate rates of fire spread were reported.
Information: Call (530) 257-9553 or visit the web site.
Cub Complex (Lassen National Forest): 2,591 acres at 15 percent contained. This complex of two fires is 16 miles southwest of Chester. Active fire behavior was reported. Smoke is impacting the community of Chester.
Information: Call (530) 257-9553.
Gould (Klamath National Forest): 228 acres at 70 percent contained. This fire is 19 miles southwest of Etna.

Information: Call (530) 493-1518.

Humboldt Complex (Humboldt-Del Norte Unit, Cal Fire): 1,225 acres at 50 percent contained. This complex of two fires is in Humboldt county. Several structures are threatened.
Information: Call (707) 726-1225 or visit the web site.

Iron Complex (Shasta-Trinity National Forest): 10,700 acres at five percent contained. This complex of 27 fires is one mile north of Junction City. Communities and a lookout are threatened. Highway 299 has restricted traffic flow.
Information: Call (530) 226-2500 ext. 2.
June ABCD Miscellaneous Complex (Mendocino National Forest): 951 acres at five percent contained. This complex of 52 fires is partly in a wilderness area 24 miles southwest of Chico. The complex is partially burning in a wilderness area.
Information: Call (530) 934-3316 or visit the web site.
Lime Complex (Shasta-Trinity National Forest): 22,195 acres at 15 percent contained. This complex of 48 fires is 14 miles west of Hayfork. Numerous residences, ranches, and youth camps are threatened. Platina and Wildwood have been evacuated.
Information: Call (530) 226-2500 ext. 2.
LNF June Lightning Complex (Lassen National Forest): 200 acres at an unknown percent contained. This complex is 16 miles southwest of Chester.
Information: Call (530) 257-9553

MEU Lightning Complex (Mendocino Unit, Cal Fire): 28,430 acres at five percent contained. This complex of 107 fires is in Mendocino county and was previously reported as the Mendocino Lightning Complex. Numerous residences are threatened. The communities of Greenfield and Singley are threatened and evacuated.
Information: Call 707-467-6426 or visit the web site.
Mill Complex (Lassen National Forest): 2,100 acres at an unknown percent contained. This fire is 16 miles northeast of Los Molinos. It is burning is a wilderness area.
Information: Call (530) 257-9553.

Peterson Complex (Lassen National Forest): 7,794 acres at 60 percent contained. This fire is 10 miles east of Cassell. It includes the previously reported Popcorn fire. Residences are currently threatened.
Information: Call (530) 257-9553.
SHU Lightning Complex (Shasta-Trinity Unit, Cal Fire): 35,000 acres at five percent contained. This complex of 70 fires is in Shasta and Trinity counties. Several communities and power generation system are threatened. Junction City, Platina, Corman Ranch, and power generation systems are threatened. Several communities were evacuated.
Information: Call (530) 225-2510 or visit the web site.

Soda Complex (Mendocino National Forest): 3,560 acres at 55 percent contained. This fire is 15 miles northwest of Upper Lake. Residences are threatened.
Information: Call (530) 934-3316.
Syskiyou Complex (Klamath National Forest): 5,600 acres at 15 percent contained. This complex of three fires is 18 miles southwest of Happy Camp. Campgrounds and residences are threatened.
Information: Call (530) 493-1518.
TGU Lightning Complex (Tehama-Glenn Unit, Cal Fire): 16,300 acres at 45 percent contained. This complex of three fires is in Tehama county. Moderate fire activity was observed.
Information: Call (530) 528-5193 or visit the web site.

Walker (Sonoma-Lake Napa Unite, Cal Fire): 14,500 acres at 85 percent contained. This fire is 10 miles northeast of Clearlake Oaks. Moderate fire activity was reported.
Information: Call (707) 967-1456 or visit the web site.
Whiskeytown Complex (Whiskeytown National Recreation Area, National Park Service): 3,600 acres at 10 percent contained. This complex of three fires is 12 miles west of Redding. Power lines and communication towers are threatened.
Information: Call 530-242-3438 or visit the web site.
Yuba River Complex (Tahoe National Forest): 3,069 acres at 47 percent contained. This complex of 28 fires is 13 miles northeast of Nevada City. Several communities, hydroelectric facilities, and recreation sites are threatened.
Information: Call (530) 478-6101.

I've never seen anything like this before. There is a lot more reported on Inci web if you can get on and have interest in anything about south of Sacramento.Every motel in Chico has strike teams of engines and overhead vehicles parked in the lots. Listening to the tactical frequencies suggest that everyone is "running on empty" out there.Be safe out there troops. We are all praying for a safe victory!

I agree that fireworks should be banned, but only those that are
being sold to the public. I know that there are groups/organizations
that count on the sale of fireworks as a fundraiser, but quite
honestly. with as dry as the valley is right now you know that there
are going to be idiots out there that will not light the fireworks in
a safe manner. The fire crews are already spread thin, we shouldn't
be adding to the problem.
I do feel that the larger fireworks displays should still continue to
happen. Those displays are in a more controlled environment.

There's a few private fire contractors that you might try and get on
with, especially if you already have fire training, like an academy,
volunteer experience, or had a Red Card in the past.

Red Bluff city had cancelled their annual display over the river for this year. It will be missed. I would prefer to have that display and the sales curtailed. Who knows where those "safe" fireworks will be used?

I am on rural acreage west of R.B. and think I'm reasonably defensible. 10 acres either mowed (before everything dried out) or down with a weedeater. Most trees are trimmed up 8-12 feet from the ground. Working on the rest.

I agree that fireworks should be banned, but only those that are
being sold to the public. I know that there are groups/organizations
that count on the sale of fireworks as a fundraiser, but quite
honestly. with as dry as the valley is right now you know that there
are going to be idiots out there that will not light the fireworks in
a safe manner. The fire crews are already spread thin, we shouldn't
be adding to the problem.
I do feel that the larger fireworks displays should still continue to
happen. Those displays are in a more controlled environment.

The Fire Works show is still a go for the fairgrounds...so if our fire fighters are still there by then, they WILL get their show. My friend works there and is in charge of helping set up the show, and he says his boss pays A LOT of money for the fireworks show and plans to provide the community with the show.
I just think all the "home" fire works should be banned personally. Every year there are always house fires from these fire works ending up on someone's roof...
Be Safe

Are all of you kidding me right now! I am sitting here in Butte County right now among the smoke and fire. All of the fireifghters that I have talked to when this topic of "Banning Firworks" is discussed they become discouraged. The firefighters think that a patriotic show would lift their spirits, specifcally at the Incident Base, where they have one every year! (At the fair grounds)

All of these people (Jo Q public to the governor) are insane. For crying out loud they make fireworks in a COMMUNIST COUNTRY, and we the United States of America can't light them off, especially now because of the fires. Should we ban cars because there killing people everyday. We, as a free society, have to accept the minute consequences of being free. If fireworks burn a house or houses down or destroy the wildland, why should that affect the millions of others who are safe and enjoy fireworks. I am done, but don't ban fireworks this Fourth!

Can someone let me know who to contact at the Chico base camp (fairgrounds)to have certified massage therapists and licensed bowen therapists provide free services for the fire personnel? I just had one of the Bowen therapists write me and would like to bring her clinic personnel to the base camp in Chico, or any of the other local base camps.
Thanks so much!

13705. CDF fire update 2008 norcal fire storm

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-06-29 22:39:00 UTC
From: mikeheight
Topic: 13705 Message: 13705

Statewide Fire OverviewCurrent Situation: State, local and federal firefighters continue to battle hundreds of wildfires throughout California. Fires are actively burning and continue to spread. Firefighters are prepared for the potential of new fires due to Red Flag Warnings issued for dry thunderstorm activity in the Northern Sierra Nevada and Southern Cascade Mountain Ranges in northeastern California through 11 p.m. tonight. The priority of firefighting is for the protection of life, property and natural resources. Download the latest fact sheet.

Fire Statistics
Total Fires: 1,420
Total Acres Burned: 356,134

Resources Committed
Personnel Committed: 18,608
Fire Engines: 1,377
Hand Crews: 465
Dozers: 331
Water Tenders: 375
Helicopters: 92

(These numbers are totals from state, local and federal firefighting agencies. Updated 6/28 at 9:00 p.m.)

Items of Interest:
Highway closures: State highways and local roads are closed throughout California due to wildfire activities. Closures and delays are in place for State Highways 1 (Big Sur Area), 32, 36, 70, 96, and 151. Numerous county and local roads are closed as well. Travelers are advised to seek current information from local law enforcement.

Evacuations: Areas of Butte, Monterey, and Shasta counties are under evacuation orders at this time. Precautionary evacuation orders are in place for areas in Butte, Lassen, Mariposa, Mendocino, Shasta and Tehama counties. Residents are advised to monitor the fire situation in their areas, check with local law enforcement agencies for information, and be prepared to evacuate when necessary.

Structures Threatened: 7,589 residences, 135 commercial, 2,856 outbuildings.
Structures Destroyed: 29 residences, 1 commercial, 21 outbuildings.

CAL FIRE Summary of Fires by CountyButte: The Butte Lightning Complex has burned 16,000 acres and is 20% contained. The Butte Fire Information Number is (530) 538-7826. Click Here for more

information.

Mendocino: The Mendocino Lightning Complex has burned 35,700 acres and is 20% contained. The Mendocino Fire Information Number is (707)-467-6426. Click Here for more information.

Shasta & Trinity: The Shasta and Trinity Lightning has burned 40,000 acres and is 10% contained. The Shasta-Trinity Unit Information Number is (530) 225-2510. Click Here for more information.

Lassen, Modoc: The Corral Fire has burned 10,000 acres and is 5% contained. The Peterson Complex has burned 7,824 acres and is 90% contained. The Lassen-Modoc Fire Information Number is (530) 257-9553.

Humboldt: The Humboldt Complex has burned for 1,275 acres and is 50% contained. The Paradise Fire is north of Shelter Cove and is 925 acres and 40% contained. The Humboldt-Del Norte Fire Information Number is (707) 726-1225.

Tehama & Glenn: The Tehama-Glenn Lightning Complex has burned 17,541 acres and is 55% contained. The Tehama-Glenn Unit Information Number is (530) 528-5193. Click Here for more information.

Mariposa: The Oliver Fire is located in the Ponderosa Basin and is 2,603 acres and 45% contained. The Oliver Fire Information Number is (209) 966-4784. Click Here for more information.

Lake: The Walker Fire has burned 14,500 acres and is now 100% contained. The Walker Fire Information Number is (707) 967-1456. Click Here for more information.

Napa & Solano: The Wild Fire burned 40,000 acres and is now 100% contained. Click Here for more information.

Santa Clara: The Whitehurst and Hummingbird Fires burned a combined 994 acres and are both now 100% contained. Click Here for more information.

FYI McClellan Air Park's Tower is operational.

Yesterday at 1300(1pm) Local the tower began transmitting on 126.225 Mhz

From what the tower said they will be operational from 1000 till 2200(10pm)
until next Saturday.

The tower also said it's operational due to McClellan being a "tanker" base.

I've heard a lot of C-130's flying in and out. Also "MAST" flights.

and related story

A Second DC-10 (tanker 910) will be operating in the state for fires. It is
not known if it will be based at Victorville or Sacramento (KMCC) per KCRA 3

They most likely are selling t's at the fairgrounds in Chico...if that is still where base camp/staging is. My dh never gets to come in off the line so not sure if I'll get any t shirts from this fire! He and our son have been up on Rim Road since last Monday and they have only been on quick trips down to base twice...getting awfully tired out there, stay safe men.

Can someone let me know who to contact at the Chico base camp (fairgrounds) to have certified massage therapists and licensed bowen therapists provide free services for the fire personnel? I just had one

of the Bowen therapists write me and would like to bring her clinic personnel to the base camp in Chico, or any of the other local base camps.
Thanks so much!

I manage a Laundromat in Red Bluff. Two firefighters were in there last evening - from Orland I believe. The younger fella had on a Humboldt Fire Tee Shirt.

I was just by the 'mat a bit ago and about 8 trucks lined up from Temecula and other points south. Glad to see them.

Yesterday one of my lady customers went to the grocery and brought back bags of chocolate chip cookies for the crew from Santa Barbara in there doing laundry.

Tanker 384 or Mars seems to be the call. Mars Birddog is the lead plane it sounds like. 168.100 for air-to-air and the ground Division they've been working is on 173.9625. They've made some Gel drops and they're discussing on 9625 the effectiveness of the Gel on the fire behavior.

171.575 SHF Forest Net seems to be the command freq for Mars ops too. Giving heads up when it's landing at Shasta Lake etc.

From: Lake Hodges Radio
Topic: 13732 Message: 13732

We're hearing from more and more people every day who are frustrated
with the fire fighting resources in Northern California, and who SAY
they will avoid evacuation orders and stay home to fight the "next" big fire.

If you PLAN to do so, please describe what you're planning to do, and
how you will protect yourself from being burned or killed.

SEND your messages to -->> citizen-firefighters@yahoogroups.com

Then, please look here
-->> http://health.groups.yahoo.com/group/citizen-firefighters/messages

If you have experience fighting previous fires, please tell us your story.

If you are a professional, please share your advice with others.

The moderators do NOT advise or condone citizen fire fighting.

If you are ordered to evacuate, ALWAYS do so.

PLEASE READ messages 1 through 5 before you proceed.

13733. Well, I'M impressed....

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-01 08:16:28 UTC
From: Pamela Alley
Topic: 13733 Message: 13733

While huge fires, and lots of fires, can be downright scary and get people making less-than-wise decisions, I for one am just downright IMPRESSED with the performance of Butte County and California fire in the last six weeks.

Not that I wasn't before, but...wow. Two huge, high-property-damage, immediate evacuation-required fires in two days (plus a week or so), then the lightning kicking off a thousand more....and the ff's are still out there, working their butts off, doing their jobs.

And doing it WELL, by all the gods!

Utterly amazing. Totally welcome. And appreciated from the tips of my toes on up, even though I was never threatened by any of the fires (knock on wood thank you!).

It is easy to look back and say, "I could do that."

Not so easy when your well doesn't work because the power is out, or the pressure is low from massive draw, or when you are choking on smoke so thick you can't see which way your house IS, much less the way out.

While I would probably not evacuate in a summer fire (there's just no way to move that many animals without killing them or me), I surely would not be 'fighting the fire'--but rather focusing on surviving it through good planning and allowing the firefighters to do their jobs without worrying that I'm in the way or a hinderance.

Gentlemen and ladies of the fire folks, I salute you.

You're a hell of a team.

PA

13734. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-01 12:33:24 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13734

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

13735. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-01 12:33:24 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13735

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

PA and all,
Well said PA! This is one hell of a test for any fire organization. I met a couple of fire fighters from Corona this afternoon who were on R&R and out for a run...believe it or not! I asked them how they were being treated up here and they both quickly replied that they felt right at home and that the people they had met were treating them like locals. One of them was thinking about moving up this way and out of LA after seeing Chico I assured him that this was an unusual year and not something that we have ever seen before. We have a lot of Top Gun teams in our midst...let's pray they get a break with those darn inversions so the air force can do their thing and help the troops shut this thing down.

13737. Freq update norcal fires

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-02 06:34:06 UTC
From: Jake H
Topic: 13737 Message: 13737

Found the Whiskeytown Park has a portable command repeater up. 166.3375 (borrowed from the USCG)

151.145 Cmd9 is Shasta east side fires - Shingletown, Withrow, Pine - which should all be contained by now I think. Quiet freq now.
151.355 Cmd1 is Shasta west side fires - Moon, Deerlick, Motion - all burning real hot and extreme still. Pri1 on my live scanner.

164.085 is air tactics I believe on the Motion fire. Don't know where they borrowed that freq from.
168.700 is command on the Mendocino I think. Not positive what complex this is command for.
The Fed Common freqs are very active too - even aircraft activity. 168.100, 168.350

Heard plenty of DGS comm techs working on getting a NIFC command 20 repeater up. Any command freq past NIFC Command 7 is considered a "specialized" freq and borrowed from another federal agency that isn't using it. So this freq could be anything between 160-174Mhz basically. They were doing range testing on the Branches and Divisions on the Deerlick Fire today so Command traffic might move off of Cmd1 and onto this mysterious portable repeater for day shift Wednesday. If so, I'll be searching for it.

Lassen Forest - Cub Complex command might move to 166.5625. Heard some techs talking about that on LNF Admin net.

heard some distant fire tac traffic on 169.5375, borrowed from US Customs. :)

Victors mentioned over the air have been 136.025, 118.975, 123.875. Don't know which fires they belong to.

That's what happens when too many fires get in one small area, the radio techs start pulling frequencies out of their hats a week into the ordeal and suddenly every "normal" freq goes quiet.

I will give you an update on the Cub Complex for freq's. The team from the Peterson fire is taking over the Cub fire and the team that has been running the Complex will be just dealing with the Onion fire. We have been getting the IAP's from the current team on a daily basis.

Found the Whiskeytown Park has a portable command repeater up. 166.3375 (borrowed from the USCG)

151.145 Cmd9 is Shasta east side fires - Shingletown, Withrow, Pine - which should all be contained by now I think. Quiet freq now.
151.355 Cmd1 is Shasta west side fires - Moon, Deerlick, Motion - all burning real hot and extreme still. Pri1 on my live scanner.

164.085 is air tactics I believe on the Motion fire. Don't know where they borrowed that freq from.
168.700 is command on the Mendocino I think. Not positive what complex this is command for.

hahaha, DGS tech just came on this morning at 169.5375 and called it NIFC Command 26, asking for Communications. Communications came back. He asked is this Anderson Communications? Nope, this is Cub ICP. Then she asked DGS what ICP they are from - no answer. :) Somebody's lost out there on the radio.

And now they just brought up Anderson on the same freq. Obviously frequency coordination failed in this instance. All the work yesterday of programming every radio will be worthless if they chose the same freq as the Cub Complex in LNF. Oops.

Cub ICP keeps asking who is on her frequency and to identify themselves. Oh this is going to be a long day for DGS Comm Tech 205. He is having Cub ICP now call their CommUnitLeader. I'm sure words will be exchanged. Jake

Photo Posted in Photos. I watched this helicopter dip into the reservoir last night and took some good video and this pic. Can anyone tell me what type and where it came from (branch and state)? I think it's a Chinook from the Nat. Guard. Right? Is there more than one type of Chinook? Thanks.

Sounds like they are working on changing the tones for the SHU command repeater so there won't be a conflict with LNF Cub Complex. Not sure if a tone will protect it since they're so close and will have lots of traffic on it.

Some more tacticals
SHU Divisions QHC 151.475 (CalFire Tac 13)
SHU Divisions ALMVY 158.7375 (a VTac freq)
SHU Divisions BJT 161.505 (that's a Railroad freq)
SHU Lower Fire - Divisions RX 151.1375 (another VTac)

Interesting they chose 158.7375, since 158.730 is Shasta County Sheriff Dispatch, and I don't think they narrowbanded their radio system yet, which means they could bleed over onto 7375. Interoperability rules on those VTac freqs state narrowband/interop is primary user over any interference from non-interop/non-narrowband. That would put the Sheriff dispatch as secondary.

164.1625 is new Air to Ground for Motion fire
123.875 - Noble Air Attack?

Interesting. It's actually between AAR channels 26 and
27.

AAR 27 is used in the FRC (Plumas) so don't think
we/they would
be interfering. But then again, with all these temp
inversions lately,
the VHF bands have been hopping!

Later,
Todd...

I have to completely agree that the firefighters are doing an
excellent job.

Working as they are with the limited resources that they have (due to
there being so many fires), in weather that is of course not co-
operating, they are doing the best they can.

If they have to turn and run from your property, so be it.
I would much rather see you lose you house/property than my husband
to lose his life because he was trying to save YOUR
structure/personal belongings. Items that can ALL be replaced.
My husbands life and the lives of those firefighters CANNOT be
replaced.

To those people out there that feel the firefighters are not
protecting structures/property enough, I challenge you to go through
the training that these men and women have gone through. I challenge
you to deal with what these men and women deal with.
Learn that fire is an animal all of its own and is not easy to
predict what it is going to do.

Except for your crew and (sometimes) the public, there is nothing on a wildland fire that is worth getting seriously injured over, much less dying for. I knew a firefighter who died when a windshift sent the fire back at her helitac crew. Didn't know her well--just met long enough to know what a great person she was and still feel sad over her loss. That little valley next to the river wasn't worth dying for, but sometimes no matter how hard to try to be safe, bad things happen.

From: Jake H
Topic: 13737 Message: 13746

I went through your area Todd on Sunday. Enjoyed 161.515 through Portola and Quincy. Heard a fire at Long Valley on the tracks and requested the train to stop. Saw all of that as I drove through. Went to the entrance of the train museum. Will have to come back and check that out another time.

They actually gave the freq as 161.5050 so maybe it's the narrowband 12.5kHz step in between the AAR stuff. Has AAR narrowbanded yet?

As for the inversions - I'm hearing some good stuff on VHF high band last night. Stuff was getting into our local fire repeater etc.

Tac 9 151.385
Air Attack on 164.0875

They're attacking this hard - it's a very hot and active fire, heavy torching into timber. Already assigning overhead for Operations.

All the while a spot fire on one of the complexes is threatening a helispot that has multiple crews and supplies at the top of Sugarloaf Mtn. They're begging for immediate aircraft support on that spot. Also, a medivac shorthaul by CHP H16 happening on one of the complexes for heat exhaustion, which is threatening air support on that spot. Good bit of chaos right now.

151.355 Command for the complex
156.075 calcord for medivac

Contained at 35 acres, whew. If this wasn't smack between Moon and
Motion fires with aircraft all around it may have been a different story.

13750. scancal.org live scanner update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-03 05:40:51 UTC
From: Jake H
Topic: 13750 Message: 13750

Action has kind of moved around and focused on a few areas now so I've changed the priorities.

pri1 - Cmd1 - Shasta fires on the west side (moon, deerlick, motion fires)
pri2 - Cmd7 - Tehama fires - Noble incident (things are somewhat slow on the radio, wrapping things up)
pri3 - Cub Complex Command on Lassen Forest - 169.5375
pri4 - Motion Air Attack 164.0875 (we'll see if this stays active Thursday or if they change to yet another odd freq)

also in the mix are SHU, TGU local nets, all regular tacticals and some forest tacs, I'm not putting in the unique tacticals to some incidents since it's too busy. I have Whiskeytown fires' command on 166.3375. Various air tactics and some victors. I also have some logistics UHF link frequencies for the Moon fire and aircraft over Trinity County, but doubt I'll hear much on the current antenna setup.

Heard all day Wednesday were the DGS Comm Techs "DC 2xx" units. From 7am this morning and now at 22:35 on Command 1 and Cub Complex command. Long day for them setting up UHF links for remote bases, and fixing programming from this morning's command fiasco. If you hear them, listen carefully as they'll spill frequencies over the air or plans/times/ideas on where comms might go the next day etc.

13751. A chuckle...

Yahoo group: norcalfire (2005 — 2016)

Topic: 13751 Message: 13751

I woke up wondering just WHAT signal I was picking up this time, hearing Santa Monica engine staging...on a familiar street!??!??!??

Yep.

Sure enough, there's a SM engine responding to calls here in Butte. Confused the heck out of me for a few minutes, thinking the inversions were REALLY getting wierd!

Poor guys. Trying to navigate here cold has got to be quite the adventure!

PA

13752. type I CODE 3 ?

Yahoo group: norcalfire (2005 — 2016)

13753. Care Package for Fire Fighters?

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-03 16:47:19 UTC
From: FM #17
Topic: 13753 Message: 13753

Can someone give me ideas of what they need, want, so I can take a care package to the fire fighters at my son's unit? He text me saying he needed 'stuff' but didn't mention anything but shampoo and snacks they can eat on the line. I went to cash n carry and they said the fire fighters bought all their granola bars, so at least I know that is ONE thing they are eat'n out there. I just need some ideas. Thanks!

Here are some of the items I've had personnel ask for when I was staffing a campaign fire:

Socks.
Bandanas.
Sunscreen.
Tecnu (poison oak remover).
Ibuprofen.
Sudafed (nothing which will make you drowsy).
Moleskin (by the roll if you can find it).
Toilet paper.
Baby wipes.
Baby power.
Travel-sized pillows.
Cheap flip-flops (in case they see a shower in base camp).
I like "No Rinse"-brand body bath and shampoo. (I know REI carries it.)

Of course, home-made cookies!

13756. update on California fires...progress

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-04 02:40:16 UTC
From: nitrobear@comcast.net
Topic: 13756 Message: 13756

Some progress is being made thanks to tireless efforts from the many dedicaated firefighters on the lines around us. Looks like they have this moster on the run! GREAT JOB!
From Chico today, we saw the fothills clearly for the first time in two weeks. The surface flow is pretty strong from the SWpromissing cool temps at least for July 4th in the valley. The smoke isn't hanging in the valley for the first time in several days...Nice!

Here is the 4:30 update. apears it is peetty current.
I've heard hwy 32 and hwy 70 are pretty much closed and 36 should be open to Chester from Red Bluff but no recent update.

Information: Call 928-638-7688 or visit the website.
CaliforniaFires: 27Acres: 454,394New fires: 1Fires contained: 1
Inciweb is having technical difficulties due to the high volume of Internet users trying to access these sites. The technical staff is working to restore access to the site as soon as possible.
Northern California Joint Information Center - Call 530-226-2749.
Alps Complex (Shasta-Trinity National Forest): 3,579 acres at five percent contained. This complex of 13 fires is 20 miles northwest of Junction City. Residences are threatened.
Information: Call (530) 226-2500 ext. 2.
American River Complex (Tahoe National Forest): 6,027 acres at 25 percent contained. This complex of three fires is 11 miles northeast of Foresthill. Power lines, watershed, and residences remain threatened.
Information: Call (530) 367-6223.
Basin Complex (Los Padres National Forest): 61,275 acres at three percent contained. This complex of two fires is five miles southeast of Big Sur. Big Sur and Lucia are threatened and evacuations are in place. Highway 1 remains closed.
Information: Call (805) 961-5770 or visit the web site (click on Current Conditions).
NEW Gap (Los Padres National Forest): 6305 acres at five percent contained. This fire is located six miles northwest of Santa Barbara. Residences and powerlines are threatened and evacuation orders are in effect.
Information: Call (805) 961-5770 or visit the web site (click on Current Conditions).
BTU Lightning Complex (Butte Unit, Cal Fire): 17,500 acres at 35 percent contained. This complex of 13 fires is in Butte county. Active fire behavior continued. Residences, transmission lines, and structures are threatened. Precautionary evacuations were issued for several communities.
Information: Call (530) 538-7826 or visit the web site.
Canyon Complex (Plumas National Forest): 13,164 acres at 61 percent contained. This complex of nine fires is 16 miles northeast of Paradise. Residences and archeological sites are threatened. Highway 70 is closed.
Information: Call (530) 283-7883.
Clover (Sequoia National Forest): 15,262 acres at 70 percent contained. The fire is 32 miles north of Weldon.
Information: Call (760) 376-3781 ext. 625.
Corral (Lassen-Modoc Unit, Cal Fire): 15,000 acres at 25 percent contained. This fire is 23

miles west of Termo. Active fire behavior was reported.
Information: Call (530) 257-9553 or visit the web site.
Cub Complex (Lassen National Forest): 5,181 acres at 25 percent contained. This complex of two fires is 16 miles southwest of Chester. Structures and roads remain threatened. Highway 32 is closed so firefighters can perform burnout operations.
Information: Call (530) 257-9553.
Hell's Half Complex (Six Rivers National Forest): 2,876 acres at 40 percent contained. This complex of two fires is eight miles southwest of Burnt Ranch. Structures are threatened.
Information: Call (707) 441-3623 or visit the web site.
Humboldt Complex (Humboldt-Del Norte Unit, Cal Fire): 1,275 acres at 65 percent contained. This complex of two fires is in Humboldt county. Minimal fire activity was observed.
Information: Call (707) 726-1225 or visit the web site.
Indians (Los Padres National Forest): 81,378 acres at 95 percent contained. This fire is 18 miles west of King City. Active fire behavior was reported. Numerous residences and cultural resources are threatened. Voluntary evacuations are in effect for Arroyo Seco Road area.
Information: Call 805-961-5770 or visit the web site.

lot of the first aid stuff such as tylenol can be found at camp. However the sack lunches usually are not that great! Ya kinda pick and choose what is worth eating. I usually carry a few small cans of fruit in my firepack. gives you that extra boost when nothing really looks good. had cornbeef hash once.. even a stray dog wouldnt eat that stuff! Moleskin is always good to have.....

Cal Fire takes great care to make sure everyone gets 10,000 calories of food per day, unlimited water, and Gatorade. lots of the snacks mentioned are bought and given out everyday that why the local stores were probably out of them...
My thoughts from the fire line if he is young A couple cases of cold Red Bull will make him a God with his young friends it is very hard to find on a fire,
Deodorant the young guys like Tag, and Axe, a bag of new underwear of course, A bag of socks, a bag of new t-shirts, Gold bond Foot powder and Moleskin could keep his feet in good condition as he breaks in his boots, Jock itch powder might be a godsend too! Just send it no kid wants to discuss it with his mother just send it.
Also hand held GPS unit and a Kestral hand held weather station will make him very valuable as a observer on the line and may keep his crew out of trouble, buy something that uses AA batteries he can use the old ones out of his BK radio each day and they are easy to get in camp.
Real pizza make the arrangements to find out when he will be camp for a rest period and send the crew Pizza!

A new pair of good *cool looking* Sun glasses w/ lanyard might be appreciated too.

Avoid the Red Bull. Bad stuff when its hot. It increases your blood pressure by 20+ points and causes dehydration!

Um, isn't Red Bull one of those drinks that acts like ephedra? Nasty to do on a fire...and I know it's a diuretic.

What about powdered tea or lemonade?

The normal issued drink in the sack lunch usually has two cans of some sort of juice. Lemonade has been sent out a lot on the Indians fire.

There are many options available to us on the line. Primary is water and gatorade. The latest thing is Vitamin water that was provided on the Indian fire.

Here are some of the items I've had personnel ask for when I was staffing a campaign fire:

Socks.
Bandanas.
Sunscreen.
Tecnu (poison oak remover).
Ibuprofen.
Sudafed (nothing which will make you drowsy).
Moleskin (by the roll if you can find it).
Toilet paper.
Baby wipes.
Baby powder.
Travel-sized pillows.
Cheap flip-flops (in case they see a shower in base camp).
I like "No Rinse"-brand body bath and shampoo. (I know REI carries it.)

Of course, home-made cookies!

13771. To All Firemen

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-04 14:31:26 UTC
From: THE ARM SOCIETY
Topic: 13771 Message: 13771

"Courage"
One day my son asked me, Dad?
What does courage mean?
At first I simply answered,
No fear of certain things.

Then in that same instant,
I looked across the street,
I saw my neighbors running,
And jumped up from my seat.

As I ran out the front door,
I saw what had torn their lives,
The mountains, trees and land,
Was burning before my eyes.

We quickly called the firemen,
And the minutes seemed liked years,
Then they came from everywhere,
To battle our biggest fears.

They swiftly set up their weapons,
And clad their armor in a flash,
Then they faced the dragon,
A monster of fire and ash.

They boldly rushed into the flames,
To face the devil and pick a fight,
Risking the very life they held,
For others on that night.

No one was in those homes,
But a life was still at stake,
For they have seen many homes lost,
And have seen many hearts break.

So once again they fight their enemy,
A war they can never win,
For if they win the battle,
The devil returns to burn again.

But while the devil was on that land,
They walked into his lare,
Facing his evil talons,
With water and stare.

They saved that beautiful land,
And the houses all around,
They cleaned their weapons,
Letting their armor fall to the ground.

It wasn't until morning,
That I realized what had taken place,
When I went for a walk across that land,
I saw the scar of the devil's face.

That is when I turned to my son,
And answered the question again,
When you think of courage, son,
Think always of the firemen.

"Courage"

One day my son asked me, Dad?

What does courage mean?

At first I simply answered,

No fear of certain things.

Then in that same instant,

I looked across the street,

I saw my neighbors running,

And jumped up from my seat.

As I ran out the front door,

I saw what had torn their lives,

The mountains, trees and land,

Was burning before my eyes.

We quickly called the firemen,

And the minutes seemed liked years,

Then they came from everywhere,

To battle our biggest fears.

They swiftly set up their weapons,

And clad their armor in a flash,

Then they faced the dragon,

A monster of fire and ash.

They boldly rushed into the flames,

To face the devil and pick a fight,

Risking the very life they held,

For others on that night.

No one was in those homes,

But a life was still at stake,

For they have seen many homes lost,

And have seen many hearts break.

So once again they fight their enemy,

A war they can never win,

For if they win the battle,

The devil returns to burn again.

But while the devil was on that land,

They walked into his lare,

Facing his evil talons,

With water and stare.

They saved that beautiful land,

And the houses all around,

They cleaned their weapons,

Letting their armor fall to the ground.

It wasn't until morning,

That I realized what had taken place,

When I went for a walk across that land,

I saw the scar of the devil's face.

That is when I turned to my son,

And answered the question again,

When you think of courage, son,

Think always of the firemen.

This link and a very lengthy post was on of all places one of the dog lists I'm on.
http://xasauantoday.wordpress.com/2008/06/23/big-surventana-wilderness-fire-news/

The post was forwarded from someone with a Pelican Network Members list which seems to be some sort of environmental group. There were some current pictures there, http://www.pelicannetwork.net/fire.htm as well as the link above. I only briefly looked at it as I'm leaving for work. But it looked historical and of interest re Big Sur.

Spoke with BC Sheriff office. Winds have been uncooperative with the backfire that was attempted, and now immediate threat evacuations are underway in the entire Concow/Camelot area.

Concow Road is closed completely at Jordan Hill Road and all its subsidiaries.

I do NOT envy any of these folks; they just got the okay to go home yesterday and now here we go again.

Task Force 12 responding to Concow Staging.

BCSO dispatch said they did not know the details and mechanics but it 'isn't good'.

No joke. Keep up the good work, folks, and stay safe!

From: Pamela Alley
Topic: 13790 Message: 13790

All of Concow Road clear out to 70 is now being evacuated. Jordon Hill to Rim to Hwy 70 is the approximate area being evacuated. At least one home immediately threatened per resident report, flames in backyard.

SO discussing possible mutual aid from Yuba/Sutter counties as well. BCSO has eight additional units en route to the area, Oroville PD also sending.

Top of Flea Mt, 78 degrees F, humidity 17%, winds out of the east/noreast.

Evacs working from Camelot area all the way out Concow to Jordan Hill and then on out to 70.

Ops is on Butte Support....

From: Jake H
Topic: 13791 Message: 13791

(Excellent info PA on Concow)

Both the Motion and Moon fires are really cooking. Both had two significant boiling smoke headers at 8am. First time since the day of lightning that we can see the columns now. There really are fires burning up there! ;)

Motion Fire: they are really sweating about Iron Mountain Road, keeping it on the west side. It keeps spotting 1/4mile distance over the road to the east but the copters have been knocking them out. This is all on the south and east slopes of Democrat Mtn - north of Rock Creek Dam, but burning towards it.

Moon Fire: is in the Eagle Creek drainage, crossed creek to east and burning midslope up South Fork Mtn, against the wind but with the topography. Contingency plan in setting up structure protection groups on Rector Creek Road and South Fork Road north of town of Ono. First structure protection would be cabins at the end of South Fork Road, in the Eagle Creek Drainage.
40 31.40
122 36.00

Command on 151.355
One of the fires approved today to have command on NIFC Cmd26 but I haven't been able to find that yet. Anybody have that?
Air/Ground is 164.1625

13792. BUTTE: New fire update Berry Creek area; Concow update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-08 17:54:21 UTC
From: Pamela Alley
Topic: 13792 Message: 13792

Bean IC: New fires, apparently spots, across the Bean Creek drainage (river?) Not certain of the exact location of this one....ah. Up in the vicinity of Frey fire, difficulty with air support due to proximity. Staging at Station 62.

Two or three new fires in the Bean area; Bean IC is busting butt on these little guys trying to keep them from becoming major. They are increasing, with mod-rapid ROS.

Bald Rock area being evacuated/has been evacuated. LEO en route to Berry Creek for evacs, Code 3...

Advice heard that likely want to evacuate Brush Creek area.

It is VERY hot here in the valley, some smoke cover, and very little moving air.
****
CONCOW AREA:
Fire bumping Jordan Hill Road very hard, multiple spots across road with an engine caught behind the compromised area.

****

In case anyone needs telling, this is getting seriously ugly....

Discussion: Northern CA temperatures climbed another 4 to 9 degrees Monday, as high pressure aloft strengthened. Meanwhile, light to moderate NNE to East surface winds affected many areas The combi-nation of heat, dryness and breezes led the NWS to convert most of their Fire Weather Watches into Red Flag Warnings.which become valid in different areas at varying times today. Look for maximum temps between 108 - 115º F in the hotter valleys today, with minimum RH inland ranging from 5-16%. Winds are expected to be quite similar to those of Monday, which means morning wind gusts 22-32 mph again for areas prone to foehn winds. The strong upper high and offshore wind component has pretty much dissipated the coastal marine layer. The airmass is being watched closely for subtle changes that might lead to at least isolated thunderstorms in the eastern third of NOPS later this week.

1. Ten Drivers; 2. Two Interagency Hotshot Crews (IHC); 3.Two Type 2 Safety Officers (SOF2); 4. Infrared Scan Flight; 5. Three Field Observers (FOBS); 6. Two Strike Team Leaders (STCR)
Active fire on three flanks are challenging resources in places to reach control objectives safely. Reevaluated staffing strategies to ensure focus on areas with highest values at risk. Will staff highest priority areas fully, and may remove firefighters from low priority areas. Fire on those flanks will spread unimpeded. Lack of drivers makes food and supply deliveries difficult and we may prioritize driving for other resouces, such as engines & miscellaneous overhead, to ensure safe logistical support. Engine crews may also be used to staff critical road closures to ensure safety of firefighters holding fire or firing from roadways. Up to 1/3 of suppression resources time out over the next 2-3 days, further focusing our efforts to the highest priority areas. Suppression resources are being directed toward active divisions. Mop up efforts will be delayed until priority areas are adequately addressed. Forecast weather for the next two days□stronger upriver/up canyon
winds during daytime alternating with stronger nighttime downriver/down canyon winds□together with much lower RH and possible record high temperatures may drive fire in multiple directions. Minimum RH usually occurs from midnight to dawn. This makes an alignment of slope, wind, and RH for maximum potential spread toward the area of highest values at risk. Failure to hold in these critical areas will lead to a substantially increase fire size and threaten the community of Blue Canyon, the Union Pacific Railroad (UPRR), the I-80 corridor, and North Fork Spike Camp. The RR would be impacted before I-80. Probable economic impact of shutting down the rail line is about $1,000,000 per hour. SOF2s are needed to provide oversight and advice to personnel working in extreme terrain with poor visibility. STCRs are needed to provide oversight for hand crews. Resources starting to show signs of fatigue and illness. Smoke from fire is affecting I-80 corridor communities from Auburn to
Sacramento.
PRIORITY FIRES: 1) Government Springs, 2) Westville, 3) Peavine
CONTAINMENT: Government Springs Fire (6,174 acres with 10% containment); Westville Fire (2,299 acres and 15% containment). Containment for the Complex is at 20%.

5 Type 3 Engines Strike Teams, 10 Type 1 Fire Crews, 2 Resource Unit Leaders, Air Operations Branch Director, Helicopter Coordinator.
Under strong east winds and very low humidities, the Camp fire breached containment lines and pushed into the Concow area, Approximately 300 homes affected. The fires burning in the Feather River Canyon threaten some structures, a hydroelectric plant, transmission lines, Highway 70 and the railroad. The Canyon and the Butte Complex continue to coordinate suppression strategies. Mop-up continues on the West, Rim, Smokey, and Breakneck fires. Mop-up and line construction rates are affected by lack of crews and Type 3 Engines. There is a hard closure of Highway 70. Strong down canyon winds occurred in the early morning hours with gusts to 30 mph.
PRIORITY FIRES: 1) Belden fire, 2) Camp, 3) Pit, Saddle, 4) West, 5) Support to the Canyon Complex, 6) Breakneck.
CONTAINMENT: There are 41 fires, 14 are known to be active, 14 fires are contained, and 13 fires have been absorbed by other fires.

Heavy air resources (fixed and rotary), to support modified suppression action on the Motion fire. Critical resource orders: Helitankers, Type I helicopters, Type II helicopters, S2T air tankers, P2V air tanker, Handcrews, Type III Engines.
The Motion fire is pushing control lines and is now an immediate threat to structures in the Iron Mt. Road area. The Moon fire is also challenging control lines and is an immediate threat to structures in the Zogg Mine Road area. Weather, including north winds, low RH☐s, and higher temperatures are challenging control lines which are in danger of not holding. Resources are being pulled out of the Demob process for immediate assignments.
PRIORITY FIRES: 1) Motion fire, 2). Moon, 3) Deer Lick
CONTAINMENT: Branch V ☐ Motion fire, 8,208 acres, 50% contained. Branch VI ☐ Deer Lick fire, 12,701 acres, 70% contained, with little fire activity inside perimeter control lines. Branch VII ☐ Moon fire, 17,098 acres, 60% contained. No significant increase was seen in acreage during this reporting period. Higher temperatures and lower RH☐s aided to fire movement and will continue to test control lines. The Lower fire is 100% contained. The Democrat fire is 100% contained. All fires in Branch I are 100% contained with units assigned in patrol status.
Approximately 158 fires, 112 contained with 3 active. Number of fires that have merged with adjacent fires is 43.

7 Type 1 crews, 12 Type 2IA or Type 2 crews, 6 DIVS, 6 TFLD, 1 OSC2.
Extremely steep and broken terrain limits checking fire growth on all fires. This is exacerbated by a lack of Type I crews which are critical due to terrain. 10 miles of indirect line remain open on the Eagle Fire south of the Trinity River. This fire is affected by moderate to strong up-canyon afternoon winds. The Zeigler Fire continues to threaten Hawkins Bar and Trinity Village. The Ironside Fire abuts 5+ miles of Hwy 299, threatening temporary closures, controlled traffic, and providing potential for spotting across the road and river. The Cedar Fire continues to grow due to rollout. Difficult access may cause major structure protection threats. The Eagle Fire continues to threaten the communities of Big Flat and Big Bar. 10 miles of indirect line burnout is required to contain the Eagle Fire and protect threatened communities6
PRIORITY FIRES: 1) Ironside, 2) Zeigler, 3) Cedar, 4) Buckhorn, .5) Eagle, 6) Denny

CONTAINMENT: Ironside 12,505 75% 7/25 (includes merged Don Juan, Big, Lookout, Halsey Ridge, Side, Mountain Fires). Zeigler 876 50% 7/12. Cedar 1286 25% 7/17. Buckhorn 3934 5% 7/25. Eagle 8,475 55% 7/17. Denny 43 70% 7/13. List of contained fires with acreage following: Cutthroat-83, Canadian-72, East-40, Dedrick-39, Bottom-20, Chaparral-5, Hocker-4, Bray-1, Monument-1, Cadillac-1.

10-DIVS; 6-T1 Crews; 3-T2 IA Crews; 4-T2 Crews; 1-ATGS; and 2-SOFR.
Some fires are located in very steep or inaccessible terrain. Heavy fuel loading with dry fuel moisture at levels normally not found until late August. National/Congressional interest in fuels management pilot project (Herger-Feinstein Quincy Library Group Forest Recovery Act) for intensive forest management. Economic effects to communities dependent on timber industry and tourism. Limited communications due to terrain and large incident area. Highway 70 is the major transportation route for the area and is currently closed due to fires on the Butte Complex. Lack of sufficient suppression resources, especially T1 or T2 IA hand crews. Multiple crews will be reaching their maximum work assignment and will either be demobilized or R/R over the next week. This reduction in resources may affect the predicted containment date and strategies if replacement crews are not assigned.
PRIORITY FIRES: 1) Belden, 2) South 3) Frey, 4) Cold, 5) Little
CONTAINMENT: Butte Complex/Belden-291 acres and 50% contained; South -3,807 and 20%; Frey-2,627 acres and 43% contained; Cold-5,512 acres and 95% contained; Little-869 acres and 30% contained; Scotch-1,311 acres and 5% contained; and Bear-1,066 acres and 5 % contained. The Canyon Complex is now reporting a total of 40 fires; the Butte Complex is reporting acreage for the Belden Fire and the Rock2 fire was initially reported and named twice (Buckeye Fire). Fires contained-22 (1,396 acres) of which 3 are staffed and the remaining are air patrolled; Uncontained-8 (17,055 acres) of which 7 are staffed; UTL-11.

A RED FLAG WARNING for low relative humidity and high temperatures is posted for 1600 hours

Tuesday through 2300 hours Wednesday. The most challenging fires are in steep, inaccessible terrain. The fires have minimal staffing and evacuation warnings are in place. Heavy resource drawdown has 39 active fires continuing to grow. The Mendocino Redwood Company is taking firefighting action on large fires located on their properties totaling 18,350 acres. The estimated value of commercial timberland lost is $50 million dollars. Fires that are within close proximity to each other have been grouped to assist in resource allocation to prioritized individual fires.
PRIORITY FIRES: 1) Cliff, Mallo and Sugarloaf fires, 2) Red Mtn. Series, 3) Hardy, Middle and Lost Pipe fires.
CONTAINMENT: Cliff, Mallo and Sugarloaf fires-13,400 acres, 80% contained. Red Mtn. Series-8,020 acres, 50% contained Hardy, Middle and Lost Pipe fires-8,550 acres, 20% contained. 127 total fires, 39 active and 88 contained.

24 hrs: Residences and Forest Service work center, Native American cultural and spiritual resources, Wild and Scenic River Corridor, Wooley Creek lodge and Hoover cabin, old growth timber, and anadromous fisheries habitat.
Control Problems: Critical firing actions required to prevent structure loss within the Oak Bottom campground and residential complex require skilled hand crews. Need Type 1 crews or T-2 IA. Merrill and Jake are on the verge of convergence at the confluence of the Salmon River and Wooley Creek. This drainage is aligned SW to NE, making it extremely volatile as the predicted weather pattern sets in the next few days. Social/economic/cultural: Heightened concern on behalf of residents in Salmon River drainage as fire moves down to the river with a 6 mile front. Critical Native American cultural spiritual areas impacted, including only known fully intact Karuk spiritual site. Historic structures including the Wooley Ck. lodge and Hoover cabin. USFS recreational and administrative site at Oak Bottom. Wild and Scenic River ☐ Klamath River. Anadromous fisheries & spawning grounds ☐ spring Chinook in Wooley Ck and steelhead and sturgeon in the Salmon River and Marble Mtn.
wilderness.

PRIORITY FIRES: 1) Merrill , 2) Jake

1 Type 2 IA Crew - 5 operational periods, 1 Type 2 Tender - 5 operational periods.
Control Problems: Terrain, falling snags, rollouts, and today's hotter weather contributed to increased fire behavior. Important Native American cultural and spiritual sites exist and are concentrated throughout the fire area, and outside the fire area to the north and east. Anadromous fisheries & spawning grounds. Extremely high Yurok and Karuk cultural concerns on Blue fire. Pending major traditional spiritual activities within both areas are of concern, particularly considering lack of knowledge where these activities may occur and unknown who/how many/where, and proximity to ongoing fire.

13794. Butte: Paradise Pentz Rd evacs

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-08 19:50:47 UTC
From: Jake H
Topic: 13794 Message: 13794

Just got the call that east side of Pentz Road from Honeysuckle to Malibu is under evac. The east side of Paradise. Pentz closed at Skyway southbound.

Paradise fire chief at the end of Merrill Road says fire is just about down to the water of West Branch Feather River and near rapid rate of spread. Requested two task forces of engines to Merrill Road code 3.

13795. BUTTE: Update Concow, Paradise, Berry Creek

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-08 19:54:36 UTC
From: Pamela Alley
Topic: 13795 Message: 13795

CONCOW:
Fire bumping Concow Reservoir pretty hard; hazarding high power lines which are going to take some serious heat very soon. Fire making runs; per Chico ER, CalFire reports at least five structures lost in the Concow area.

PARADISE:
East of Pentz Road is under immediate threat evacuation; from Pentz west to Clark, a precautionary evacuation is underway.

BERRY CREEK:
Now Darnell IC under Plumas and Butte interagency cooperation. Bald Rock, Brush Creek, Bean Creek areas are all being evacuated, immediate threat.

ALL:
Fires are very active throughout all complexes I can hear in the area. Resources, particularly air, are in high demand and stretching thin.

Problems with animal transport becoming evident, all evacuees are being asked to TAKE ALL ANIMALS WITH THEM IF AT ALL POSSIBLE WHEN EVACUATING. Dogs, goats, horses, cats.....all are being evac'd.

Please, folks...be careful out there!

1254 hrs

Now that family is involved, I've put Butte Support back in. It's going to get a little busy on there with Shasta's major evacs and structure protection too.

Pri1 151.355 Command 1 - Shasta Command Moon/Motion Fires
Pri2 165.010 NIFC Cmd 26 - Shasta Command - Southfork Structure Group
Pri3 154.415 Butte Support - Butte fires command

and of course, all sorts of air attack, air-to-ground, tacticals, forest nets and TGU SHU local nets in between those priorities.

13797. Re: Shasta: fire updates

13801. HUU veg fire near Weitchpec

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-09 00:22:40 UTC
From: Harry Marnell
Topic: 13801 Message: 13801

Thank you Redding and Chico for launching tankers 42 and 93, but they're now being canceled by AA121... too smokey over here.

New veg fire off Bald Hills Rd behind the (apparently vacant) Tulley Creek fire station. http://tinyurl.com/5u2brn 1/3 ac in heavy timber but slow ROS. Engines coming over from the coast, 90 minute ETA. Per Tulley IC (aka Helitender 102) keep the assignment coming, though copters 102 and "3HL" may be able to knock it down.

Who is copter 3HL?

151.25 HUU Local
151.34 Tac 3
151.22 A/G

Harry

Thanks, and they were just released at 17:55. Sounds like this fire isn't going anywhere, they've diverted one CalFire engine to a structure fire in Crescent City and holding Transport 1240 at Orick on 101. Tulley IC requests continue E1288, E12 (SRF?), one HUU crew and the Jefferson crew; also diverting Arcata E1239 to the Crescent City fire.

Harry

Just got the knock on the door here in Magalia, off Rosewood. Precautionary Evac. My car is packed and I'm ready to go. But I'll stay until I hear it's immediate threat. I left last time and didn't have to, don't wanna do that again...I will be on line til late, checking this listserve to see if anyone near me has been evacuated on immediate threat...
Thanks so much for all the valuable information you all share on here for us!
p.s. My son had a whole 24 hours off before they called him back in this morning...he's back out there...
I took the care package out to him on the 4th of july, and he loved it! the apple cider vinegar solution for the poison oak worked! Thank you all! I used ALL your suggestions!Plus I made brownies for all the guys in his unit...they were gone before I left the station!
God protect all you men out there...you're my heros.
Lisa

Here is the latest from Cal Fire this afternoon. I had a conversation with a fellow who's Grandmother in law was evacuated from Camelot last night. He told me that that area had burned down. He was extremely upset with the CC&R's over there regarding clearing. Is this a recurring theme in California? It's hard to hug that damn tree when it's charcoal...
This is unprecedented in my lifetime. We have had ash falling all day in Chico today
Surreal and very sad...
God Bless the troops, please stay safe on the lines!

Butte Lightning Complex Incident Information:
Last Updated: July 8, 2008 5:00 pm
Date/Time Started: June 21, 2008, 2:00 pm

13811. Message for Animals being evacuated right now!

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-09 06:36:26 UTC
From: Lisa Saldano
Topic: 13811 Message: 13811

Can someone let command to check with Chico State to see if they can take the horses they are trying to evacuate!?
I'm listening to them "trying to find somewhere to take these horses" and when I left work, we still had room for horses at the farm.
thanks!
p.s. I work for University Police...

Lisa, if you can give them that info, CALL. You can probably get them in
and in touch better than anyone else here.....I would suggest you call BCSO
for it....

THANK YOU!

PA

13813. Fallen F.F.

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-09 07:30:35 UTC
From: twobells2@charter.net
Topic: 13813 Message: 13813

I saw a blurb in the newspaper last week, nothing on this or other groups of a Fallen Fire Fighter from Anderson Valley FD. This unpaid professional died in the line of duty of a apperant heart attack at too young a age. Any more information or thoughts. Usually there is more than blank space for a fallen fighter.

I realize we have other fish to fry here at the moment.

Joe Lacey

Joe,
If you want more info try this:
http://www.ukiahdailyjournal.com/ci_9813000
Or this:
<
http://www.pressdemocrat.com/article/20080704/NEWS/807040353/1033/NEWS&title=Anderson_Valley_volunteer_firefighter_dies
>
It seems it was a heart attack while out on the fire.
We in the local community are all very saddened by this.

Did anyone watch the news on KOVR at five today and see the clip of the news crew in a vehicle with an information officer taking them into the fires near Concow and the wall of flames they went through. I was greatly appalled by the information officer and going into a fire with that much intensity. No regard to safety during this footage. I really want to know all your thoughts and if I am over reacting to this. I would hate to see anyone get hurt for a simple piece of footage.

I saw this clip or a similar one here in the Bay Area earlier tonight. My first thought was "I
wonder whether the air conditioning is working" and second "are they gonna die".

While the driver knew the actual conditions and I don't, I'll give him benefit of the doubt.
However, I do wonder if he was a PIO and whether he's still on the State of California payroll
tomorrow.

The shots were probably the best from a news crew that's I've seen.

No business?????

See section (d) aparently you are confused about the law.

409.5. (a) Whenever a menace to the public health or safety is created by a calamity such as flood, storm, fire, earthquake, explosion, accident, or other disaster, officers of the California Highway Patrol, California State Police Division, police departments, marshal's office or sheriff's office, any officer or employee of the Department of Forestry and Fire Protection designated a peace officer by subdivision (h) of Section 830.2, any officer or employee of the Department of Parks and Recreation designated a peace officer by subdivision (g) of Section 830.2, any officer or employee of the Department of Fish and Game designated a peace officer under subdivision (f) of Section 830.2, and any publicly employed full-time lifeguard or publicly employed full-time marine safety officer while acting in a supervisory position in the performance of his or her official duties, may close the area where the menace exists for the duration thereof by means of ropes, markers, or guards to any and all persons not authorized by the lifeguard or officer to enter or remain within the enclosed area. If the calamity creates an immediate menace to the public health, the local health officer may close the area where the menace exists pursuant to the conditions set forth in this section.

(b) Officers of the California Highway Patrol, California State Police Division, police departments, marshal's office or sheriff's office, officers of the Department of Fish and Game designated as peace officers by subdivision (f) of Section 830.2, or officers of the Department of Forestry and Fire Protection designated as peace officers by subdivision (h) of Section 830.2 may close the immediate area surrounding any emergency field command post or any other command post activated for the purpose of abating any calamity enumerated in this section or any riot or other civil disturbance to any and all unauthorized persons pursuant to the conditions set forth in this section whether or not the field command post or other command post is located near to the actual calamity or riot or other civil disturbance.

(c) Any unauthorized person who willfully and knowingly enters an area closed pursuant to subdivision (a) or (b) and who willfully remains within the area after receiving notice to evacuate or leave shall be guilty of a misdemeanor.

(d) Nothing in this section shall prevent a duly authorized representative of any news service, newspaper, or radio or television station or network from entering the areas closed pursuant to this section.

Yes, No business!!! As in 'no common sense', or 'not enough brains to stay out of harm's way'.

There's other fallout, too. After seeing this particular footage, one of my neighbors made the comment that "Fires aren't nearly as dangerous as all the firefighters want us to think, otherwise they wouldn't take them thru it like that. The firefighters all just want us to think they're heroes by telling us their job is soooo dangerous, and it's obviously not that bad." How many people who see this footage are thinking the same thing!??! My guess would be that a lot of people seeing this now think it's not nearly as unsafe as the fire agencies make it sound. In a lot of other people's eyes, it made the newscrew look stupid, made their escort look even stupider, and eliminated a lot of respect for the decisions that the fire agencies make. As in 'If he's dumb enough to do that, why should I trust his judgement when he tells me to evacuate?' And yes, wether you know it or not, there's tons of people out there with this sort of mindset.

It may very well be legal, but it most certainly wasn't intelligent. It's good to remember that just because something's legal, it doesn't necessarily mean it's a good idea, or good for you. Just because you 'can', doesn't always mean you 'should', and bad judgement is bad judgement, no matter who applies it.

Hey, thanks for the well written, and well thought out post! However, if you need a little ammo to help your neighbor understand the danger involved in our business, please refer him/her to the following link:

http://www.wffoundation.org/honor/thefallen.html

I don't mean to put too fine a point on this, but this one example may very well have additional details associated with it that we are not entirely aware of. Just trying to play devil's advocate.

Be safe all!

13823. RE: [NorCalFire] update BTU 9 July AM

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-09 16:54:04 UTC
From: hithel
Topic: 13805 Message: 13823

Listening via the feed - at 930AM local - these questions were being asked on Butte Support 154.415R - will more structural resources be needed today? - how much more resources? - can the present resources be moved around? - what will the trigger point be today?

Someone on Butte Support said that evacuations today would probably cover CocCow Rd at 70, west to Lake Oroville (IF needed). There seems to be great uncertainty about the extent of any future fire spread today.

http://thenet411.net is carrying - 153.95 Paradise FD - 154.415 Butte Support - 156.165 DPW - BCSO Dispatch 154.725 - Paradise PD 155.715 - CLEMARS 154.92

948 AM - Yankee Hill was just recommended as a precautionary evacuation area - from Station 36 to West Branch - due to roads congested with fire rigs

950 AM - recommending immediate evac Jarbo Gap N & W of 70 to Lake - precautionary evac E & S of Jarbo Gap to the Lake.

952 AM - pulling out a map to decide on some decision points

Keep in mind that I am listening from 3,000 miles away. Please dont make important decisions based on what I am posting.

Peter sz

13824. New freq(s) and repeater - Hoopa & Fortuna

Fortuna FPD's WNKH975 license had been modified to add a repeater (on existing 154.235) at Rohnerville Airport. I've had almost no luck hearing their old transmitter from McKinleyville, will listen for this one. Don't know if it's in service yet. Anyone?

Hoopa Valley Indian Tribe OES has a new license, WQIX222, with a repeater on 156.195 at about 2400' elevation in the Bald Hills area, for "Tribe Office of Emergency Services. Coordinating and managing all major public safety organizations within jurisdictional boundries of Hoopa Valley Indian Reservation." This is in addition to their existing police and fire frequencies http://harrymarnell.net/humbfreq.htm#hoo

13826. 2008 Wildfire Risks...

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-09 17:45:46 UTC
From: Lake Hodges Radio
Topic: 13826 Message: 13826

Here's a message you may want to forward to everyone you know in California... this is real, not a hoax.

Everyone from Oregon to Mexico is at risk this year.

Places like Santa Clara/Saratoga, south San Jose, Woodside/Palo Alto, the Berkeley Hills, Marin/Sonoma, San Diego/La Jolla, the Orange and LA foothills, Ventura and San Luis (anywhere with dry plant material or dead grasses) are in danger this year -- particularly on the outskirts of cities -- because many suburban residents are not educated about wild fires and aren't prepared for them.

We all hope it doesn't happen, but a few sparks from a truck on the I-5 freeway could cause half of La Jolla to burn during a Santa Ana windstorm and there would be little that anyone could do, except get out of the way. Former San Diego Fire Chief Jeff Bowman has been warning La Jolla homeowners about this for years, mostly to deaf ears.

Very few city and suburban residents are prepared. Most are apathetic or naive and unaware of the risks. Mention wildfire preparation to most urbanites, and they say something like, "I'm heading to the gym right now. I'll think about that some other time, maybe next year."

Here's a good Wildfire Action Plan developed by the Santa Barbara Fire Department.
Feel free to share this document with your friends...

Subject: [NorCalFire] Re: news video

Yes, No business!!! As in 'no common sense', or 'not enough brains to stay out of harm's way'.

There's other fallout, too. After seeing this particular footage, one of my neighbors made the comment that "Fires aren't nearly as dangerous as all the firefighters want us to think, otherwise they wouldn't take them thru it like that. The firefighters all just want us to think they're heroes by telling us their job is soooo dangerous, and it's obviously not that bad." How many people who see this footage are thinking the same thing!??! My guess would be that a lot of people seeing this now think it's not nearly as unsafe as the fire agencies make it sound. In a lot of other people's eyes, it made the newscrew look stupid, made their escort look even stupider, and eliminated a lot of respect for the decisions that the fire agencies make. As in 'If he's dumb enough to do that, why should I trust his judgement when he tells me to evacuate?' And yes, wether you know it or not, there's tons of people out there with this sort of mindset.

It may very well be legal, but it most certainly wasn't intelligent. It's good to remember that just because something's legal, it doesn't necessarily mean it's a good idea, or good for you. Just because you 'can', doesn't always mean you 'should', and bad judgement is bad judgement, no matter who applies it.

13831. Firefighter down postings

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-10 00:12:30 UTC
From: Jake H
Topic: 13831 Message: 13831

Do not, do not, do not post anything with the phrase "firefighter down" unless you have ALL the info. And even if you have ALL the info, you need to take into consideration the ramifications of your post to a public list of 500+ members, and all messages are readable via non-members via the web and RSS feeds.

Nine times out of ten, you won't have all the info, so bets are to not post anything. That way there is no speculation, no firefighter's spouses stressing out, no family members notified out of line etc.

In this particular instance and for the future, it could have better been worded as, "I have heard on an incident some firefighters or inmates treated for heat exhaustion."

Thank you
Jake
list-owner

Thanks Jake!

This type of post tends to upset and worry firefighter family members
at home.

Let the system work and the notifications go through offical
channels, family notifications made and press releases.

I say this as a retired Forest Service emplyee who has had family
members worried after early release of information of helicopter down
many years ago.

Topic: 13816 Message: 13834

i know that they have every right to be there but the video footage put them in much risk. I am not attacking the media in anyway. I think the PIO needs to think about if it safe to bring the media into the area like the one that was shown in the video. Trust me I have been photographed and video taped quite a bit.

No business???? ?

See section (d) aparently you are confused about the law.

409.5. (a) Whenever a menace to the public health or safety is created by a calamity such as flood, storm, fire, earthquake, explosion, accident, or other disaster, officers of the California Highway Patrol, California State Police Division, police departments, marshal's office or sheriff's office, any officer or employee of the Department of Forestry and Fire Protection designated a peace officer by subdivision (h) of Section 830.2, any officer or employee of the Department of Parks and Recreation designated a peace officer by subdivision (g) of Section 830.2, any officer or employee of the Department of Fish and Game designated a peace officer under subdivision (f) of Section 830.2, and any publicly employed full-time lifeguard or publicly employed full-time marine safety officer while acting in a supervisory position in the performance of his or her official duties, may close the area where the menace exists for the duration thereof by means of ropes, markers, or guards to any and all persons not authorized by the lifeguard or officer to enter or remain within the enclosed area. If the calamity creates an immediate menace to the public health, the local health officer may close the area where the menace exists pursuant to the conditions set forth in this section.

(b) Officers of the California Highway Patrol, California State Police Division, police departments, marshal's office or sheriff's office, officers of the Department of Fish and Game designated as peace officers by subdivision (f) of Section 830.2, or officers of the Department of Forestry and Fire Protection designated as peace officers by subdivision (h) of Section 830.2 may close the immediate area surrounding any emergency field command post or any other command post activated for the purpose of abating any calamity enumerated in this section or any riot or other civil disturbance to any and all unauthorized persons pursuant to the conditions set forth in this section whether or not the field command post or other command post is located near to the actual calamity or riot or other civil

disturbance.

(c) Any unauthorized person who willfully and knowingly enters an area closed pursuant to subdivision (a) or (b) and who willfully remains within the area after receiving notice to evacuate or leave shall be guilty of a misdemeanor.

(d) Nothing in this section shall prevent a duly authorized representative of any news service, newspaper, or radio or television station or network from entering the areas closed pursuant to this section.

I saw this clip or a similar one here in the Bay Area earlier tonight. My first thought was "I
wonder whether the air conditioning is working" and second "are they gonna die".

While the driver knew the actual conditions and I don't, I'll give him benefit of the doubt.
However, I do wonder if he was a PIO and whether he's still on the State of California payroll
tomorrow.

The shots were probably the best from a news crew that's I've seen.

This Wednesday afternoon Southfork Mtn, the primary radio site for city of Redding had a nasty spot fire from the Motion Fire burn over the radio sites. Aircraft dropped on the radio sites for probably an hour pre-treating with retardant etc. until the aircraft finally got smoked out with no visibility.

Now coincidently I no longer can get Redding City's trunked system hosting the PD, utilities, and bus transportation. I also got note that Redding City Fire Dispatch and a medcom repeater are down too. NOAA weather radio is still up, which transmits from Southfork. The TV stations are all up too.

Could be the sites are fine and they just lost grid power and generator propane (or the generator couldn't fire up due to the smoke). Whatever it is, it's not good. I believe Redding trunked system has a backup site closer to town at a lower elevation (their original site) and I wouldn't hear that from Red Bluff.

Redding trunked system is up on Southfork. The radio I used to test
wasn't programmed properly. Who would do a thing like that?! :)

From: Sis Lisa
Topic: 10033 Message: 13839

I'm just one of the listeners, but I'm trying to find out which departments are up here fighting these fires? I'm in Chico (just down the hill from Paradise) and I heard Huntington Beach Fire Dept. is here. Can someone confirm that for me? And which fire they're at?

Thank you,
Lisa

From: David Coursey
Topic: 10033 Message: 13841

To battle large fires, agencies from around the state contribute equipment and resources to what are called "Strike Teams," typically five pieces of the same type of equipment (plus a Strike Team Leader) from a particular area (or even a single department, in the case of the largest departments). My county, San Joaquin, has (I believe) two strike teams out right now, each having been assigned for several weeks. The individual firefighters work 7-day shifts and return home.

Our engines were sent to provide structure protection on the Indians fire (Big Sur), last time I checked. Structure projection tends to be deadly dull right up to the moment it becomes potentially deadly for the crews.

Thus, firefighters (and equipment) from all over the state and, indeed, outside California, can be found battling our fires.

From these articles, it appears they were both private-contract firefighters, both from Oregon, and both off-duty at the time of their deaths:

164.0875 for air attack - have been very busy with the MAFFS and tankers (still talking at 1920). Copters are on victor and I don't have that. They've been mentioning hundreds of victor freqs the past few days so I have no idea where they're at now. I believe the most likely bet is between 118-119MHz. 118.6875 or 118.875 - something like that.

164.1625 for air to ground.

Also try 165.450 for additional command for structure protection for Moon and Motion.

Lets try to remember that emails directed to one or two people, or if only one or two people would benefit from the info, need to be sent directly to those people and not on the email list.

We've had a rush of new subscribers with the recent fires. Lets keep the chatter off the list and stick only to fire information, frequencies, questions etc.

Thank you

I think it's because when you hit "reply" you think you are replying to the poster, but it goes to the entire group.
So if everyone on here realizes you have to "copy" and "paste" the email address of the person you want to reply to, it might lessen the occurrences. Took me about two accidental postings to realize I wasn't replying to just one person! Yikes! Sorry about that folks!

My scanner for a day, until the IC-205 landed in my lap the other day. :)

NIFC Commands 20+ are temporarily assigned frequencies borrowed from
other federal agencies such as FAA, Customs etc. that aren't being
used in the area at the moment. Their assignment typically stays for
the remainder of the season, so Cmd26 should always be 26 for the rest
of the season, unless the original agency wants their frequency back.
At the end of the season it all goes back in the pot.

A note on the Cmd26 repeater up here on SHU Lightning complex - it's a
mess today. Bad data noise etc when it's keyed up. It's on the output
of the repeater only, since the links and the other Cmd repeater
linked to 26 up here doesn't have the same noise. The users have got
to be hearing that. All of my radios have it. If Cmd 26 is giving you
problems, tune in 165.0125. It's linked to 26, and is clean - but a
lot lower elevation)

And now my theory is all debunked. Cmd26 just went clean with transmissions from ICP and other users. So my theory is now interference on one of the link freqs into the repeater. It's not on all transmissions.

They've been having problems in the past with some link freqs from Beale AFB pave paws radar.

From: Mark Woodward
Topic: 10033 Message: 13870

Some Santa Cruz fire engines actually carry surf boards on top of their engines. Some crews have certified ocean rescue swimmers, and the boards are used in some rescues. Santa Cruz county still has 2 strike teams of local resource type 3 engines deployed in Butte county. I actually saw a couple of the local engines in news footage the other day on KGO 7. I would expect these strike teams to be returning home soon, as they are right at 2 weeks of deployment.

Air-to-Ground 151.2200 N
Emergency Air Guard 168.6250 N
Deck 122.925
TOLC 121.000
154.220 OES Fire - Butte Fires command net
154.415 Butte Support - Butte Fires resource net
151.460 Command 7, Tehama fires command net
151.145, 151.190 tacticals on fires in tehama
151.385, 151.445 tacticals on fires in shingletown
151.265 Command 2, Shasta fires, Weaverville fires, MEU fires "Howard
Forest" (Cahto Peak cmd2 repeater activated, which comes over the
mountains into valley from Corning to Red Bluff via Mendocino Pass).

This freq is really a mess when everybody gets talking. Especially Weaverville and Shingletown walking over each other.

123.975 tanker base redding, chico, chester
122.925 air tactics for various fires, I think Shingletown is primary all VHF air tactics have been used off and on
151.220 cdf air ground - VERY busy

172.225 Lassen Forest
169.175 Mendocino Forest
171.575 Shasta forest
170.4875 Shasta Forest - Hayfork/Yolla Bolla District Net
172.275 Shasta Forest - Southfork District - barely readable in valley
170.000 USFS air to ground
168.050 tact on a mendocino forest fire

151.145 Cmd9 is Shasta east side fires - Shingletown, Withrow, Pine - which should all be contained by now I think. Quiet freq now.
151.355 Cmd1 is Shasta west side fires - Moon, Deerlick, Motion - all burning real hot and extreme still. Pri1 on my live scanner.

164.085 is air tactics I believe on the Motion fire. Don't know where they borrowed that freq from.
168.700 is command on the Mendocino I think. Not positive what complex
this is command for.
The Fed Common freqs are very active too - even aircraft activity.
168.100, 168.350

Heard plenty of DGS comm techs working on getting a NIFC command 20 repeater up. Any command freq past NIFC Command 7 is considered a "specialized" freq and borrowed from another federal agency that isn't
using it. So this freq could be anything between 160-174Mhz basically.
They were doing range testing on the Branches and Divisions on the Deerlick Fire today so Command traffic might move off of Cmd1 and onto
this mysterious portable repeater for day shift Wednesday. If so, I'll
be searching for it.

Lassen Forest - Cub Complex command might move to 166.5625. Heard some
techs talking about that on LNF Admin net.

heard some distant fire tac traffic on 169.5375, borrowed from US Customs. :)

Victors mentioned over the air have been 136.025, 118.975, 123.875. Don't know which fires they belong to.

That's what happens when too many fires get in one small area, the
radio
techs start pulling frequencies out of their hats a week into the
ordeal
and suddenly every "normal" freq goes quiet
hahaha, DGS tech just came on this morning at 169.5375 and called it
NIFC Command 26, asking for Communications. Communications came
back. He
asked is this Anderson Communications
164.1625 is new Air to Ground for Motion fire
123.875 - Noble Air Attack?
heard some distant fire tac traffic on 169.5375, borrowed from US
> > Customs. :)

Glenn -

Start with the OES and CALFIRE web sites.
[http://www.oes.ca.gov/ and http://www.fire.ca.gov/] Both agencies
are working together to keep the public informed. The OES site has a
comprehensive collection of documents that is current.

Statewide Fire Statistics
Total Fires at Peak: 1,781
Total Fires Contained: 1,459
Total Active Fires: 322
Total Acres Burned: 793,483
These numbers are total fires and acres that have occurred from state, local and federal firefighting agencies beginning June 20, 2008.

CAL FIRE Statistics
Total Fires at Peak: 1,005
Fires Contained: 814
Active Fires: 55
Acres Burned: 239,418
These numbers are total fires and acres that have occurred ONLY in CAL FIRE jurisdiction since June 20, 2008.
The number of contained and active fires will not equal the total due to some fires merging together.

Statewide Resources Committed
Personnel Committed: 20,274
Fire Engines: 1,503
Hand Crews: 467
Dozers: 291
Water Tenders: 423
Helicopters: 142

Highway closures: State highways, county and local roads are closed throughout California due to wildfire activities. Closures and delays remain in place for State Highways 1 (Big Sur Area), 32, 70 and 299. Travelers are advised to seek current information from local law enforcement.

Evacuations: Areas of Butte, Monterey, Shasta and Trinity counties are under evacuation orders at this time. Precautionary evacuation orders currently exist in areas in Butte, Kern, Mendocino, Monterey, Plumas, Santa Barbara, Shasta and Trinity counties. Residents are advised to monitor their local fire situation, check with local law enforcement agencies for information, and be prepared to evacuate when necessary.

Structures:
Threatened : 12,924 residences, 135 commercial, 2,460 outbuildings.
Destroyed : 100 residences, 1 commercial, 126 outbuildings.

CAL FIRE Summary of Fires by CountyButte: The Butte Lightning Complex has burned 49,500 acres and is 55% contained. The Butte Fire Information Number is (530) 538-7826. Click Here for more information.

Mendocino: The Mendocino Lightning Complex has burned 52,700 acres and is 65% contained. The Mendocino Fire Information Number is (707)-467-6426. Click Here for more information.

Shasta & Trinity: The Shasta and Trinity Lightning has burned 72,501 acres and is 45% contained. The Shasta-Trinity Unit Information Number is (530) 225-2510. Click Here for more information.

Humboldt: The Humboldt Complex has burned 1,310 acres and is 90% contained. The fires are burning throughout Humboldt County, with the largest fire, the Paradise Fire, north of Shelter Cove and is 975 acres and 85% contained. The Humboldt-Del Norte Fire Information Number is (707) 726-1225.

Lassen, Modoc: The Corral Fire burned 12,434 acres and is now 100% contained. Click Here for more information.

Mariposa: The Oliver Fire burned 2,789 acres and now 100% contained.Click Here for more information.

Lake: The Walker Fire burned 14,500 acres and is now 100% contained. Click Here for more information.

Napa & Solano: The Wild Fire burned 40,000 acres and is now 100% contained. Click Here for more information.

Santa Clara: The Whitehurst and Hummingbird Fires burned a combined 994 acres and are both now 100% contained. Click Here for more information.

Tehama & Glenn: The Tehama-Glenn Lightning Complex burned 22,907 acres and is now 100% contained.

Major Federal and Local IncidentsFor information on major federal incidents click here.
Kern County: The Piute Fire has burned 35,076 acres and is 44% contained. Click Here for more information.

13880. Amercian River Complex NEW INFO

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-12 15:31:24 UTC
From: chris a
Topic: 13858 Message: 13880

I am heading Up to tahoe for a couple of weeks....
going to try and get some nice photos on the way up there...
?

Friday, July 11, 2008, 10:00 a.m.
Info Center (530) 367-6223, 6224, or 6226
Hours of Operation: 6:00 a.m. to 8:00 p.m.
?
Placer County, CA ? Firefighters made good progress Thursday holding and building new line on the north, west, and south flanks of the merged Government Springs/Westville fires.? As anticipated, a smoke inversion limited fire activity and also curtailed air operations for much of the day.? The fire became active in Tadpole Creek, east of Beacroft Trail, within the fire perimeter on the southeast flank, when the inversion lifted about 2 PM.? On the west side, hotshot crews built hand-line from Sawtooth Ridge down into the rugged American River Canyon near Humbug Bar.?
?
The fire burned toward Big Valley Canyon to the northeast and New York Canyon to the east.?
?
Though smoky conditions limited the use of aircraft Thursday, helicopters dropped water and 18,000 gallons of retardant to help cool the fire and assist firefighters on the ground with hot spots.?
?
A helicopter reconnaissance flight showed that the fire has burned around the Mumford Bar cabin, but the cabin is intact.??
?
Overnight, the fire was quiet except for an approximately 12-acre slop-over near the American Hill road on the south side.? Firefighters on the night shift contained the slop-over.????
?
Today, on the northwest side, the fire is expected to make runs up to the dozer line on Sawtooth Ridge.? On the southeast flank of the blaze, southwesterly afternoon winds will likely move the fire east with intense ground fire, torching of individual trees, and possible sustained crown runs to ridges in the west fork of New York Canyon.? Smoke from the fire will continue to affect I-80 corridor communities from Auburn to Sacramento and east to Truckee, California and Reno, Nevada.
?
A Red Flag Warning is in effect for northern California, including the fire area, and will continue until Friday morning.? Large fire growth is possible, although weather predictions call for a slow cooling trend by the weekend.
?

From: Jake H
Topic: 13883 Message: 13884

Mike - the way communications works etc., the tankers will utilize whatever frequency the incident is working. In this case, SHU Complex is working 164.0875 for air-to-air and 136.175 for victor. The tankers will work on those frequencies for the fire. Then it switches to 123.975 to talk to the air base while it's inbound to the airport to let them know they need reload and gas or not, then switch to 119.800 for Redding Tower to land and take off. Those would be the only 4 frequencies they care about while working the Shasta fires.

While they are flying off fires between bases, such as from Canada to McClellan etc. they will probably be on whatever AM chit-chat freq they decide to be on between 118-138MHz. Plotting their secret Canadian plans on taking over America.

Jake

13886. The Marines are here!

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-13 00:18:20 UTC
From: Mobile11@aol.com
Topic: 13886 Message: 13886

I was out at McCellan Air Park and the Marines are here! 4 Ch-46 Sea Knights and 2 CH-53 Sea Stallions were sitting on the ground. I also saw 4 of the Canadian Convair aircraft. Cal Fire's Tanker 910 came flying in also to reload and fuel up. The MAFF aircraft were all over the place. MAFF 8 was in the Coast Guard hanger with what looked to be having a engine looked at. Seeing the Coast Guard has 4 C-130's all the time it would seem logical that the MAFF C-130 would be there getting the once over. I'll have the pics up soon and I'll place them in the photo's section.

Question: I'm 2 miles from McCellan and would like to stream the audio from the tower somehow. I receive the signal full scale on the Tower Freq as well as Norcal and Unicom. How would I do that?? Thanks

Paul - KA6PDY

13894. Cobra?

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-14 02:43:09 UTC
From: nitrobear@comcast.net
Topic: 13894 Message: 13894

I went up to Chester/Almanor today, left Chico about 06:15. On the way to Red Bluff, I must have seen 8 or 10 strike teams and a few PG&E fellows, headed down 99E towards Chico. All shapes and types and flashed my litghts to all the engines and got a few waves back. I was amazed at the number of fire assets running around up here...man, it's impressive and THANKS to the whole team effort which is inspiring and one of the few things that the State seems to "Get" these days.
When I went through Chester there were4 "Sky Crane" (Is it the CH-54?), sitting on the tarmac and a couple of them had crews with the hoods open looking things over.
What caught my eye was a Cobra copter on the pad behind the Chester Helibase office. When I was there we didn't have an office or a pad but that is another story. I'm not sure it is a Cobra but it looked like one without all the missiles and stuff. Anyone know what that is used for. Maybe a copter Air Tactical or mapping or?????
Thanks in advance and the visibility was not horrible but sure not good at all. I would estimate maybe 5-6 miles in most places, worse in the valleys and no wind.

The Cobra is used as both mapping and as an air attack platform. They are ran by the Forest Service. There are two in the state. One in Redding and the other is stationed I believe on the San Bernardino Forest. They are very versatile in the ways that they can be used compared to the typical fixed wing air attack platform. Thanks John for putting me on the spot.

13903. Online Scanner Capacity Offer

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-17 03:28:15 UTC
From: Butte County Public Safety Scanner
Topic: 13903 Message: 13903

Hello all,

During the Humboldt and Butte Lightning Complex fires in Butte County, many local (and some out of area) citizens generously donated the funds needed to dramatically expand the bandwidth for the Butte County Public Safety Scanner. We are now leasing a full server in a Dallas data center with 100Mbps in both directions and it is funded for at least a year from July. Even with over 1000 listeners on three different encoders, we only used 1/4 of that capacity.

As this summer promises to be a very busy one for wildfires in California, I would like to extend an offer to those in areas with active wildfires. Whether you have an active online scanner or are in an area without one and you can provide the scanner, the encoder, and a single upstream connection, I will provide 500 additional Windows Media and/or ShoutCast MP3 slots for your scanner so that the citizens in your area as well as anyone else that is interested can listen in to the traffic free of charge for the duration of the event. As I am sure you are all aware, many people don't have scanners and being able to listen to the progress fire crews are making on these fires is an invaluable resource. If you need technical assistance, please do not hesitate to contact me and we will get you up and running in no time.

Air Attack 440 just had a bird strike on his wing will leading the four-copter presidential tour over the fire. Lead Bravo 56 just picked up the tour while AA440 went back to the airport - on the ground safe now. Helco on 118.675 and A/G 164.1625.

AF1 made it in. Had 4 radios going and the @&#!@#$! mobile installed scanner pretty much took a dump on me with any AM Aero freqs. Sitting at the end of the runway and it couldn't hear the tower or Oakland Center worth beans. Managed to hear them on 132.2 saying they had the field in site, which is the clue to switch to the tower freq. Nothing on
the tower freq. My @*&%!! fuse is lit that's for sure. Don't think it was desensed, never had
problems near the airport before.

PD Command post is on TG 58832 Tac 1

:) No official flight restrictions for any fire air ops. They were actually trying to time a Martin
Mars drop with Marine 1 and the President watching, but said if the timing doesn't work oh well. So that's nice knowing they aren't making things happen just for the Prez, sounds like
all ops are normal. The copters are working 118.675 (Shasta Complex helicopter air-to-air) with Marine 1, and 122.925 has related traffic also.

I love those black box things. But no - it was my radio. Could hear plain as day on the handheld when he took off at the same time my mobile scanner didn't break squelch. The antenna is tight - I'm picking up distant VHF tactical like I was next door, but AM Aero on the BCT-8 I have deemed worthless. What a great time to find out too.

Hearing some very distant and clear skip on various VHF freqs here in Red Bluff. I guess San Diego is getting it too. Someone down there reported on another list hearing an airport ground station 135 miles away - rare for AM airport comms.

No it was the humbolt fire that was arson. The rest of the fires were from lighting
strikes.

Yep. Called tropospheric ducting... Very nice conducive layer of atmosphere allows the signals to get into the layer then bounce hundreds, occasionally thousands of miles and pop out somewhere else.

From: Jake H
Topic: 13911 Message: 13916

That would be another form of "skip" where radio waves bounce off the ionosphere far above. That's what gets the lowband skip for CHP etc. where we can hear Tennessee and other east coast states on low band. What we're talking about concerns the weather around us at the time, which is one big static airmass, creating an inversion and keeping all this ugly smoke at ground level. A byproduct of that can be a "tunnel" of air between the cold and warm air masses. VHF-hi radio waves can travel these tunnels all over the place. For us on NorCalFire, a big clue is the reuse of the CalFire frequencies. You'll suddenly start hearing distant CalFire Local nets on your tactical freqs, or even on your own local net.

I don't think so. If KRON reported that, they are a bit confused and may want to re-check their sources. . Hundreds of lightening strikes started the Butte Complex fires...I saw some of them form under the bed! :-)
The Humboldt fire was arson caused they are pretty sure and they have identified two vehicles that are subjects of interest that may have information.
The Feather River Hospital in Paradise was re-opened today after extensive health inspections. Slowley but surely, Butte County is starting to look like Butte County again.
Most of the Strike teams are fianally headed home after trememdous work for us up here!!!

For the Hams amongst us, I've found a neat web page that pulls VHF/UHF spots off PacketCluster, worldwide and plots the QSO/contacts by grid square and callsign. I've seen 70 CM openings this past week and quite a few Tropo openings on 144 MHz which is close to many of the fire frequencies above 148 MHz. It updates every few minutes and is fun to watch. When I get my antenna farm updated, I'm hoping to have some fun on these higher frequencies. Here is the link and you will have to configure it for what you are intrerested in seeing. I heard some Montana traffic last weekend on 155 MHz. Some Crews pulling into Missoula base...brought back memories but when I was there we were on 45 MHz! (1964) Enjoy...

Headline: "Butte County" fire suspected arson.
Not: "Butte Complex"

The fire started on June 11th is the arson, not the lightning
starts.

The closest 146.85 repeater (K6AER) to Santa Barbara is in Thousand Oaks, about 50 miles to the southeast. It can be accessed from the Santa Barbara waterfront.

Hey, now, give them a little slack. :)

After all, they usually only have to cover one or maybe two good-sized fires a year, maybe a real bang-up spectacle two or three times a decade!

And now they have all THIS?? Who can blame them (besides us, that is *grin*) for a wee bit of imprecision?

:) So...can we find out now what's happening on the American River Complex area, please?

PA

13927. NorCal Fires update - a month later

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-21 16:27:24 UTC
From: Jake H
Topic: 13927 Message: 13927

Shasta Complex:
Moon fire (Igo/Ono)
contained last night at 29,031 acres

Motion fire (Whiskeytown, IronMtn Road, Shasta Dam)
90% containment with 28,336 acres burned, but they expect no more forward progress of the fire. Burning within containment lines and all backfiring operations have completed. Copter 205 was working that over the weekend. Whiskey Creek day-use and campground in Whiskeytown NRA remains closed and threatened and that is it.

all other fires in Shasta Complex contained. Only

Lassen National Forest:
Cub Complex in Lassen Forest - 100% contained yesterday

Butte Complex:
currently at 90% containment. Activity is on north end near Rock Creek drainage. Winds are causing spotting over the line in Rock Creek area and they expect 2000 more acres from that. Winds are also fueling hotspots burning unburned islands, which is threatening a reburn in some timber that's already dry and hot.

American River Complex - Tahoe NF:
85% containment - NE flank is still uncontrolled - this is the Big Valley Canyon area. Weather is favorable now to work on getting that portion contained with minimal further spread.

Lime Complex - Shasta Trinity NF:
65% contained at 92,867 acres. Various fires around Hayfork, Platina, Yolla Bolla wilderness. Steep terrain is causing problems. Limited resources. I don't have details on exact fire locations in this Complex. I'll be focusing the online scanner to these fires in the next day or so.

Iron/Alps Complex - Shasta Trinity NF:
56% contained at 57k acres. Just north of the Lime Complex. Spots from the Lime Complex get into the Iron Complex. Eagle Fire threatens Junction City. East side of Cedar fire threatens Big Bar and Del Loma and the south side threatens Corral Bottom. ICP for the complex is in Junction City - coordinating an evac plan for the ICP should they need to.

Canyon Complex - Plumas NF:
78% contained at 37,438 acres. Total of 30 fires, only 6 are uncontained, all staffed.

13928. TV show about radio tower workers

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-22 02:43:45 UTC
From: Jake H
Topic: 13928 Message: 13928

Just a heads up that Monday tonight on Dateline NBC (NBC at 10pm PST) is a story about "tower dogs, the people that climb and service the radio towers." The few teaser clips I saw online look great. I'm good with heights and towers and ladders, but some of that footage even had my hands sweating.

http://www.msnbc.msn.com/id/25786803/

Should give you an idea of what these people go through to keep the communications sites working. Especially after these lightning fires have been threatening multiple radio sites throughout NorCal. They sent commercial comm guys in Nomex and Type3 engines to get a vital county vault back up and running during the Motion Fire in Shasta County just last week.

Without these guys, we wouldn't have anything to listen to. ;)

I'm sick as I write this. My son, Jordan, is beside himself.
His truck was broken into last night here in Chico, on his FIRST night off in 30 days. He spent his first day off picking up his new Cal Fire Sweatshirt he ordered, a nice leatherman, flashlight, etc. All that plus his CAL FIRE "out of county" bag, lacrosse bag with all his civilian clothes, plus all his Cal Fire tshirts, and 2 pairs of nomex uniform pants, all taken. I told him I would ask if anyone had any of this stuff he could have or borrow until he can buy replacements. He wears a size 40 in the pants. As you know, those are $89 each, and he had bought 2 pairs. I feel so bad. I just don't have the means to help him replace any of it.
God Bless anyone who can help...
Lisa

From: Tannhauser, Jerry H CW4 RET
Topic: 13931 Message: 13931

Jamestown, Ca -- CAL Fire investigators have determined that the vegetation fire at French Flat Rd. and Williamson Rd. originated in an old storage shed.

The fire is 100 plus acres in size and has jumped over Mormon Creek. It is headed in a north direction.
Investigator Rommie Jones says that it appears that the fire was human caused.
Deputies with the Sheriff's Office are on scene in case there would be a need to call for evacuations.
The fire started during the two o'clock hour. Air resources have been called in from outside the region.

Hello Everyone.
So I called the local newspaper as well as the local tv news stations, and they aren't jumping on this opportunity to let the community know what happened. I spoke to a reporter at the local newspaper and he said no other robberies have been reported (because most of the victims are still working and haven't had time to report the crimes). My son did in fact report his, and is getting a copy of the police report to take to headquarters to get re-issued equipment. But all the items he purchased himself must be purchased...again, as well as getting the broken window replaced...

I'm surprised that the media didn't jump on this opportunity to not only let the community know, but be warned about these robberies to Fire Fighters, as well as their homes they've been protecting, by people using the stolen uniforms to impersonate and gain access to evacuated homes!

Some of you have written me and told me of your personal experiences of the same happening to you or your husbands, or sons who are fighting fires out there. Feel free to contact the media to let them know! They don't think it's a "story" if it only happens to ONE fire fighter. I know my son is not the only one. He just heard today that someone stole some guys uniforms out of a laundromat WASHER! I'm just outraged! The nerve!

Thanks to those of you who gave me the idea to alert the media. I tried. But maybe they need to hear from more than just one person:

13944. Re: [NorCalFire] Media no help...

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-23 21:57:54 UTC
From: Gene Salvetti
Topic: 13941 Message: 13944

Sorry folks, this is gonna go OT here....
While I agree with you 100% and sympathize with you even more, the sad reality is that in this time and place it is probably not (sorry to even quote this BS) "newsworthy".

Depending on where you live, there may be far more serious issues. It may even be as I experienced in Stockton, that such issues detract from the image of the area that the paper is trying to portray for the merchant class.

Sounds political...economical...socially unjust, but it's business pure and simple with the news. They say movie theaters were created as great places to sell popcorn, and the news is the #1 grossing revenue show on nightly TV, a good place to run commercials that pay top $...forget papers, it's a dying breed, with online news.

Nightly gunfire from 1 Stockton neighborhood (confirmed #1 violent crime city in Calif 2 yrs running) did not interest the news...daily drive-up drug traffic did not interest the news even though it was busier than the drive-up at the Walgreen's drug store around the corner.

When someone died on the street...guess what...they were all over it.

My point is this. We learned in our younger years that the news was there to focus attention on our daily tragedies, and get someone to see a need to help. Today, the news is there to sell the news and it only sells if they think it's an outstanding tragedy...robberies happen every day...to firemen, to widows and orphans...pensioners who spent their lives working, maybe as firemen, or cops, or ER doctors, or just a good guy who worked his @$$ off to raise 2 good kids.

You can't depend on the media to help any more, it's gone back to Yellow Journalism, and the real help comes from people like the guy who wants to send your boy new gear.

Good luck, and I wish him something more positive, but don't get all stressed out if the media is not really your friend...they sell stuff, just like every other company.

Now that the message is out there, we know who to contact to give help
and to notify/kick the media into action, lets start wrapping this
topic up please to keep the list-traffic minimal. Please email Lisa
directly at this point.

I have extended family involved with KHSL/KNVN and I've requested them
to do some internal butt-kicking regarding this topic. We'll see.

Thank you
Jake
that grumpy list-owner :)

Thanks Gene, I agree, and yes...sadly, the front page news of our small town newspaper featured nesting birds (egrets...psh...not even endangered birds...heh) and the best tomatoes for salsa. yeah, I know, serious issues...

But you are SO right! The outpouring of kind words and generosity is heart warming! I can't thank all of you enough, but my son did want me to post a "thanks, big time...this was the shittiest day of my life..." but he and I believe in Karma, and the person who did this horrible thing, will have it returned 10 fold, and those who have helped, will be rewarded 10 fold!
In deepest respect and gratitude,
Lisa and Jordan Saldano
Chico, CA

MARIPOSA — A brush fire burned about 1,000 acres as of 7 a.m. today and threatened homes in the Midpines area, the California Department of Forestry and Fire Protection reported.

The blaze started about 3 p.m. Friday in the area of Telegraph and Sherlock roads, in the steep Merced River canyon, the report said. The cause of the fire, which was only 5 percent contained, was under investigation this morning.

No structures were reported lost, but authorities have told residents to be ready to evacuate if the fire is not slowed. Campgrounds downstream of Briceburg, owned by the U.S. Bureau of Land Management, already have been evacuated, the Mariposa County Sheriff's Department reported.

The fire has drawn about 750 firefighters, 10 aircraft, and 55 engines and other ground equipment, Cal Fire reported.

Mariposa County, CA -- According to Public Information Officer Robert Carvahlo the 18,150 acre Telegraph Fire is listed at zero percent containment.

The fire is located at Telegraph Rd. and Sherlock Rd. in the Mid Pines area. 2,000 homes have been threatened with eight already destroyed.

The Mariposa County Sheriff's Office issued an evacuation order at 3pm Saturday.

Power was lost in the Yosemite Valley for a period of time but has been restored through the use of generators.

Crews are conducting a fire operation in the Coulterville area near Dogtown Rd. and Hwy 41-49 by igniting backfires. This area is to be strictly avoided by the general public.

As of 7am today 94 engines were on scene along with 34 water tenders, 24 dozers, 900 firefighters, four helicopters and six air tankers. A DC-10 may be called in later this afternoon.

Cause of the fire; target shooting.

Jerry Tannhauser,
WA6AVR

*Note that fire has reached Yosemite National Park
Sunday, July 27, 2008 MMU-Telegraph IC Update - 20,000+ acres<http://calfire.blogspot.com/2008/07/mmu-telegraph-ic-update.html>

Official Information: The number to call for information is (209) 966-4784 or (209) 966-4785 .
If you have any other special or specific needs, call Mariposa County Sheriff's Dept. at (209) 966-3615.
Evacuation Hotline: (209) 966-1133 (recorde

Cause: Target shooter - State fire spokeswoman Karen Guillemin said the blaze, dubbed the Telegraph Fire, was sparked by someone target shooting but would not elaborate,About 2,000 firefighters were battling the fire and hundreds more were headed to the scene along the Merced River west of Yosemite, one of the nation's most visited national parks.
Updated: 1600hrs - Significant structure losses - 8 Residences and 7 Outbuildings officially confirmed lost. About 2,000 firefighters battling the fire and hundreds more were headed to the scene along the Merced River west of Yosemite.
Most of the evacuated homes are in the town of Midpines, located along Highway 140, about 12 miles from the park.
Updated: 1400hrs - More Evacuations, evacuation of the Dogtown area and a hard closure of Schilling Road. - Fire encroaching on Briceburg - Tanker 910 5 mins out, on the way in over Lake McCellan, Type 3 S/T from Sac County 4159C enroute.
Hospital is being evacuated.
Updated: Sunday, July 27, 12:05 p.m - The Mariposa County Sheriff's Department's event information line has just released the following additional evacuation orders; The following areas are under current evacuation order and the roadways are closed to the public: Foran, Avoca Vale, Alta Vista and Grosjean, Lake view, Serpentine, PennyRoyal, French Camp.
CAL FIRE's event information number is 966-1133.
Updated: 20,000+ acres, Mandatory evacuations - Roshen to 140, French Camp road, lakeview Road, Mosher Road, Telegraph Road, Whitlock Road, Cory Pine Road, Sherlock Road, Salamander Road, Colorado Road, Davis Road, Rumbly Mine Road and Rancheria Creek Roads are all under evacuation orders. North side of Mariposa County, Dogtown Road, Texas Hill and Wagner Roads are under pre-evacuation orders.

- The Telegraph Wildland fire has now grown to over 20,000 acres at the Gateway entrance to Yosemite park.
- CAL FIRE officials state that there has been "significant structure loss," but they are unable to provide an exact number because firefighters haven't been able to return to areas containing structures due to erratic fire behavior.

- A damage assessment crew has been requested.

Planned actions: CALFIRE will begin a firing operation on Buckhorn Ridge and Burma Grade near Briceburg today in an effort to put a semi-circle of fuel-depleted land in front of the advancing blaze. If it is successful, the operation will provide anchor points on two sides of the fire, and in the middle.
Notes: Some fire lines were established on the ridge lines overnight as the perimeter of the fire settled down, but the center of the fire continued to rage overnight. "Right now the fire is dictating to us what we can do," said Incident Commander Bill Hodson following Sunday morning's briefing.
Hodson has stepped aside as incident commander as CAL FIRE Team 8 takes charge of the unified command that includes the Mariposa County Sheriff's Department, Mariposa County Fire, and the U.S. Forest Service.

Yosemite fire -Further information will be available on this Web site as it is released.

PNF - report of smoke from 3 different lookouts. Doing a heavy dispatch.
Following units responding:

Engines 32, 31, 20, 13 in stand-by, 25, 11
Crew 1, 11, and 3 (??)
Dozer 3
Water Tender 1
Helo 512 enroute
Patrol 31, 23
Battalion 33 and 21
Division 2 and Divison 1

Possibly crews 11 and 3 also.

Helo 512 mentioned Victor freq of 127.320
ETA: 1 minute out

PNF: 170.550

More to follow...

MARIPOSA ? A brush fire burned about 1,000 acres as of 7 a.m. today and threatened homes in the Midpines area, the California Department of Forestry and Fire Protection reported.

The blaze started about 3 p.m. Friday in the area of Telegraph and Sherlock roads, in the steep Merced River canyon, the report said. The cause of the fire, which was only 5 percent contained, was under investigation this morning.

No structures were reported lost, but authorities have told residents to be ready to evacuate if the fire is not slowed. Campgrounds downstream of Briceburg, owned by the U.S. Bureau of Land Management, already have been evacuated, the Mariposa County Sheriff?s Department reported.

The fire has drawn about 750 firefighters, 10 aircraft, and 55 engines and other ground equipment, Cal Fire reported.

The fire has not reached the park. It's still around Briceburg and to the west and southwest. " Gateway entrance to Yosemite park" is a bit of editorial license, not it exact location.

From: Gaffit
Topic: 13971 Message: 13971

New Air to Ground 169.7125. Using Eureka Lake for water supply.

Anyone know who/what 859.9375 is? I believe State Parks?

Computer is in the middle of downloading the newest firmware for
the Kenwood TS480, so didn't want to mess that up...Will have
to check FCC site later ;-)

Sounds like PNF has a good handle on it...They're placing it just
outside of the State park. Sounds like two different fires in the
Mcrae Meadows area. Will post updates if warranted.

Later,
Todd...

If the response is more than one county away the Strike Teams travel without lights and sirens. If it is in a neighboring County and is immediate need then lights and sirens would be used. Having said that, it is not written in stone either.

13975. Telegraph Fire-Mariposa Cnty-update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-28 23:47:59 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 13975 Message: 13975

Mariposa, CA -- According to Yosemite Spokesperson Suzanne Grin the Telegraph Fire has now reached 27,000 acres in size and continues to be only 10 percent contained.

According to Sue Exline of the Sierra National Forest the fire is eight miles from El Portal, 12 miles from Arch Rock and 15-18 miles from Yosemite Valley.

1,000 residents have been served a pre-evacuation advisement. 12 residences have been destroyed along with 27 outbuildings.

This evening CAL Fire, the Mariposa County Fire Department, the Mariposa County Sheriff's Office and the C.H.P. will be hosting a seven o'clock meeting at the Mariposa County High School Auditorium for all concerned residents.

I looked right there north of Lassen doing my daily "scan for new columns" on the way home from work today. Nothing. If something was big enough to be capping north of Lassen, I'd have seen it, heard it, and I think this list or wildlandfire would have had a little peep on it.

However, the Iron Complex from the SHF/MNF Yolla Bolla fires was putting up loads of smoke and a wind pattern was pushing it right over the valley to the east (valley floor had clean air today!) and directly swamping Lassen Peak in thick dark smoke. Nothing to the south or north - just right through the park. So if you were in Chester, maybe it would have looked like a thick new batch of smoke boiling out of the park around otherwise blue sky?

13980. Live scanner update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-29 18:59:16 UTC
From: Jake H
Topic: 13980 Message: 13980

With the Shasta Lightning Complex at 100% contained and radio traffic dieing down, I have reshifted/programmed my live scanner at scancal.org / norcalscan.org.

Pri1 - Cmd1 151.355 Shasta Lightning - mopup, hotspots (will lose Pri1 spot by tonight probably)

Pri2 - 164.880 MNF Yolla Bolla Complex Command - Grouse, Vineger and Yellow Fires.

Pri3 - 151.370 TGU Local Net
Pri4 - 151.160 SHU Local Net

Also added 164.000 in the regular scan list. It is a new command repeater for the MNF Yolla Bolla Complex for Branch 3. Not sure how busy or if in range of my scanner so it isn't a priority channel yet. It also is standalone and not linked to the 164.880 command. MNF might do that if it's feasible for them. Apparently Branch 3 is very remote and poor communications to the resources on it.

Looking for CommPlan ICS205's for Lime, Iron and Yolla Bolla complex. If you have access to those, looking for command, air-ground and air-air to program in the live scanner. Thanks! You can email me offlist if you wish.

13981. Telegraph Fire-Mariposa Cnty-update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-07-29 21:15:31 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 13975 Message: 13981

Mariposa, CA -- According to CAL Fire and Incident Command Team 8, the Mariposa County Sheriff's Department and the Mariposa County Fire Department Hwy 140 was closed late Monday afternoon to traffic three miles west of Briceburg and four miles west of El Portal at Cedar Lodge.

The Telegraph Fire has burned 29,600 acres (46 square miles) and is only 10 percent contained. The cost of fighting the four day old fire now stands at $9,100,000.

Current status; The fire is burning in the Merced River Drainage on both sides of the river and making major runs in all directions through thick stands of manzanita, chamise and oak. Extreme fire behavior has been observed with flame lengths of up to 100 feet reported. Similar burning conditions are expected at least through noon today. The fire is moving north and east into the Sierra and Stanislaus National Forest affecting a 70 kv transmission line providing power to Yosemite Valley.

Resources assigned include 3,458 personnel, 71 hand crews, 408 engines, 30 water tenders, 59 dozers, 13 helicoptres and six air tankers.

The communities of Mariposa, Midpines and Mt. Bullion Conservation Camp are under evacuation advisory. The Mariposa Public Utility District water supply, 70 kv transmissionline supporting Yosemite Valley, and numerous communication/repeater towers are threatened.

A mandatory evacuation of 25 homes in the Coulterville area was issued at 3pm Sunday. That includes Texas Hill Rd. and Dogtown Rd. from Texas Hill to Schilling Rd. An evacuation advisory is in effect for all residences in the immediate fire area including the communities east of North Hwy 49 at Mykleoaks Rd. south to the Hwy 140 junction. This also includes communities west of Hwy 140 from Mariposa north to Briceburg.

25 residences and 27 outbuildings have been destroyed. 4,000 structures are listed as threatened.

The Red Cross evacuation centers are located at the Mariposa Elementary School, 5044 Jones St., Mariposa and the Greeley Hill Community Center, 10332 Fiske Rd., Greeley Hill. The animal evacuation hot line is (209) 966-3615.

Page 72 of the Sierra Phone Directory has useful information for residents dealing with wildland fire situations. Evacuation hotline phone number is (209) 966-1133.

The Mariposa Department of Motor Vehicles office, located at 5629 Hwy 94 North, has closed its office for the remainder of the week due to low air quality. The office is expected to reopen at 8am Monday, August 4. Office technicians and customers will be redirected to DMV offices in Madera and Merced. The Madera office is located at 1206 Maple St. (50 miles away) and the Merced office is located at 1313 We. 12th St. (41 miles away).

The Telegraph Fire started at 1510 hours, Friday, July 25 due to target shooting.

Jerry Tannhauser,
WA6AVR

Evening Jake and all, From another site, info of a new fire upstream from Belden. Plume visable on the NOAA radar. The Canyon Complex folks are taking it over. Burning on both sides of the Feather River. August is still a few days away... To all you F/F's out there that read this site, If your home and reading this, get some rest. The Type III Eng. from Hamilton City (E-5105) had been out a total of 34 days prior to Monday. Monday they were dispatched to Mariposa. Keep your heads up folks. We don't need to hear anymore Bagpipes this season.

And I'm picking this up on 172.400 for the Plumas real clear in Cottonwood and Red Bluff. I don't show that as a current Plumas NF freq but it is a common FireCamp/Service Net freq for other forests in this area. It's odd since I don't normally pick up Plumas NF up here. I'm hearing Mohawk and Plumas dispatch on there, talking to Division 2, along with air attack, and tankers 93 and 12. Just heard Tanker 93 on 123.975 returning to base load and hold. Not sure if that's for a cut off or the fire is looking good. May not be the same fire as what you're reporting Dan.

Ayup - it's Rich IC and I was hearing that on 172.400. Tankers 93 and 12 were smoked out and on load and hold. 93 must be in Redding since he lit up my scanner pretty hot on 123.975. Division 2 was the IC until the fire got swept into the Canyon Complex admin.

Hwy 70 at Rush Creek Road, Rich Bar area.

Plumas online news now reporting on this. Have a
timeline released by the SO...Funny I first heard it
on the UPRR road channel. PNF was trying to get a
westbounder stopped down near Rush Creek area, and
suspected train might have started this one...

PNF now at UPRR yard in Portola. Me thinks they're
going to be looking at, and possibly shutting down,
the locomotives if they don't pass their
inspections...

Later,
Todd
Portola

Size-up from AIR ATTACK 460 as follows:

- Fire is 20-25 acres along County Line Road with moderate to rapid
rate of spread, torching and spotting.
- Fire has extreme potential with limited access.
- Ordering MAFFS ships to assist.
- Fuel model 4, 5 with continuous brush areas and some spots of timber.
- AIR ATTACK also advises that this is adjacent to the edge of last
year's Coe Fire and also is in the area of the Del Puerto Canyon Fire.
- No Command Channel assigned as of yet.
- TACTICAL is CAL FIRE TAC 2

This fire will likely be labeled the BULLHEAD FIRE.

Latest update is 50-75 acres with four structures threatened out ahead of the fire at location:

North - 37.11.070
West - 121.18.752

I won't be able to continue updates at this time as I am responding, but hoping someone else can pick up the slack.

13993. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-01 12:27:08 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 13993

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

13994. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-01 12:27:08 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 13994

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.

One structure lost. Three more threatened. Anticipating a move toward Lake Oroville and guessing it will be 250-300 acres by then. Two type 1 copters being requested.

13999. UPDATE: BTU - veg fire Robinson Mills

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-03 23:46:58 UTC
From: Pamela Alley
Topic: 13999 Message: 13999

Per Air Tac, spotting is heating up with some slope transition occurring; some spotting about 150 yards from main fire; fire is 'pulling in real well but still throwing some spots'.

One engine being advised to pull back to the next structure outward due to spots heating up downhill from him. Next structure is about a quarter mile out.

The terrain up there is very rugged and plenty of fuel.

Lateral spread is considerable already and overall size could 'get quite a lot bigger'. Ordering two additional air tankers at this time, type 1 or 2.

Copter 205 is inbound, no ETA yet.

Requesting four additional ST of engines for structure protection.

River may not hold the fire; numerous spots 1/4-1/2 mile out from head of fire with rapid ROS in drainages.

Structures threatened 30-50. (Estimated based on past fire experience.)

107.320 is air-air freq.

Tankers are on left flank, copters on the right. Coverage level six.

14010. Telegraph Fire-Mariposa-update

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-04 03:01:22 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 14010 Message: 14010

Mariposa, CA -- According to CAL Fire officials the 34,091 (53 square mile) Telegraph Fire has reached 95 percent containment as of 2:30 Sunday afternoon.

100 percent containment of the 10 day old fire is now scheduled for Monday, August 4. Hwy 140 remains subject to bried traffic delays north of Midpines and south of El Portal.

All evacuation orders and warnings were lifted as of 10pm Saturday, August 2. The Evac Center at Mariposa Elementary School has been closed. A local Red Cross Assistance and Distribution Center has been established at the Midpines Community Center.

Community meetings and daily media briefings have been terminated by CAL Fire, the Mariposa County Fire Department and the Mariposa County Sheriff's Department.

Resources are quickly being reassigned or sent home. Sunday there were only 75 hand crews on site along with 260 engines (from a high last week of over 450), 44 water tenders, 27 dozers, nine helicopters and four air tankers. Total personnel on site has been reduced from close to 4,500 last week to 3,171.

Cost of fighting the Telegraph Fire to date; $32,090,376.

Craig Fire prompts immediate threat evacuationsStaff Reports
Article Launched: 08/05/2008 03:32:42 PM PDT

FORBESTOWN ? The Butte County Sheriff's Office has ordered immediate threat evacuations of Kanaka Ranch Road and Onyett Road, west of Lumpkin Road, as the Craig Fire continues to grow.

Officials said up to 50 structures are immediately threatened.

Spot fires reportedly springing up a half-mile in front of the main blaze, and the threat of erratic winds as a storm front approaches later today, have put an estimated containment date of tonight in jeopardy.

The fire has burned more than 1,000 acres and was estimated to be 30 percent contained at noon Tuesday.

A new team that has taken over the fire ordered additional ground and air resources Tuesday, and reactivated an incident command center at the Silver Dollar Fairgrounds.

Three strike teams ? a total of 15 engines ? were ordered to gather just outside the fire zone on Lumpkin Road this afternoon. A priority order was also placed for two additional Type 1 helicopters, with a water drop capacity of up to 400 gallons each.

Officials said a storm front may bring stronger, erratic winds to the blaze later today or tonight.

"This is being fought in rugged, four-wheel drive country," said Cal Fire Capt. Scott McLean. "By the time ground crews reach a spot fire, it can be something much larger," he said.

This afternoon, McLean said containment on the Craig Fire was holding at about 30 percent.

In addition to winds, some weather reports are forecasting lightning, accompanied by little or no precipitation.

Butte County is working with the Red Cross to open a shelter for evacuees. The shelter has been established at the Nazarene Church, 2238 Monte Vista Avenue in Oroville.

The shelter will open at 4 p.m. today, with cots arriving at 5 p.m.

Butte County has not opened an emergency operations center yet, but is prepared to if the Craig Fire necessitates further evacuations.

Precautionary evacuation orders affecting other roads in the area remain in effect.

TGU east side getting a good storm right now at 0315. Woke me up in RB. TGU working some starts off of Ponderosa Way, Plum Creek Road, Hogsback etc. Fires in this area tend to get big fast due to the inaccessibility (one of few places in SRA that is only miles of hike-in or shuttle crews in by copter).

Dopplar shows many storms passing through BTU, TGU and SHU areas, but there is a lot of green associated with it. Lets hope the green reaches the ground. Nothing in RB yet.

Expect live scanner to be geared towards these new starts.

News Release
US Forest Service

Shasta-Trinity National Forest

Contact: Mike Odle
530-226-2494

Helicopter crash on Shasta-Trinity National Forest
REDDING, Calif. (August 5, 2008) - A Sikorsky S-61 helicopter assigned to the Iron Complex on the Shasta-Trinity National Forest crashed this evening on the north end of the Buckhorn Fire, approximately 15 miles northwest of Junction City, Calif.

Forest Service officials first learned of the accident at approximately 7:45 p.m.

Four fire personnel were transported to Mercy Medical Center Redding and are listed in critical condition. Officials still have not confirmed the number of persons on board the helicopter. There are no known fatalities at this time.

A U.S. Forest Service Accident Investigation Team will be ordered tomorrow.

The Forest Service will hold a press conference tomorrow at 10 a.m. at the USDA Service Center, 3644 Avtech Parkway, Redding, Calif.

This was put out earlier today by USFS:
http://www.fs.fed.us/r5/shastatrinity/news/2008/releases/045-aug6-helicopter-crash.shtml

Numerous unofficial reports put the "people unaccounted for" at nine.

I thought we were not suposed to post new starts? :-)
For the first time in my adult life, I am having trouble keeping focus on what is going on where up here with fires. This has been one hell of a summer and the fire season is just ramping up now really .
It is just me or are you all feeling it also? Maybe we have the worst behind us.

Redding Air Attack Base is a cool place to check out. That's about it. Nice little shaded viewing area right on the loading pits. North Ops Green Phone is broadcasted over a loudspeaker so you can hear all of the tanker orders being placed by various Units and Forests. When the base is active, it gets real loud. Consider earplugs, or noisecancelling headphones. When the S2's hotload, you will be deaf for 10 minutes after they take off. ;) Tanker ops on 123.975, tower 119.800

Winding your way to the base, you'll pass the smokejumper training facility. Cool looking contraptions they jump out of etc.

If you can make it to the Weed airport about an hour or so north of Redding on the 5, you can see the Siskiyou Fire Fighter Memorial Air Museum, with an S-2 Tanker 94 retired and on display. They were supposed to get an OV-10 bronco and copter on display too, but unknown on that status.

Redding Air Attack Base is a cool place to check out. That's about it.
Nice little shaded viewing area right on the loading pits. North Ops
Green Phone is broadcasted over a loudspeaker so you can hear all of the
tanker orders being placed by various Units and Forests. When the base
is active, it gets real loud. Consider earplugs, or noisecancelling
headphones. When the S2's hotload, you will be deaf for 10 minutes after
they take off. ;) Tanker ops on 123.975, tower 119.800

Winding your way to the base, you'll pass the smokejumper training
facility. Cool looking contraptions they jump out of etc.

If you can make it to the Weed airport about an hour or so north of
Redding on the 5, you can see the Siskiyou Fire Fighter Memorial Air
Museum, with an S-2 Tanker 94 retired and on display. They were supposed
to get an OV-10 bronco and copter on display too, but unknown on that
status.

14048. BUTTE: Oro Quincy Hwy x

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-12 07:35:04 UTC
From: Pamela Alley
Topic: 14048 Message: 14048

Two structures on either side of Oro Quincy fully involved, spreading to the north in wildland. Augment assignment with five additional engines, any type, closest engines.

Between Milla Court and Sunflower Lane, vicinity 2702 Oro Quincy.

Quincy IC
Oroville Tac 1
Butte Fire 151.400

0030 hrs

14049. UPDATE: Quincy IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-12 07:40:02 UTC
From: Pamela Alley
Topic: 14049 Message: 14049

Additional resource request forthcoming; fire on both sides of O.Quincy, multijurisdictional event. Closing Oro Quincy between Arbol and Olive; fire is headed toward Gold Country Casino and Olive Highway.

Law enforcement on scene attempting immediate evacuations of surrounding areas.

Incoming resources to stage at Gold Country Casino; unsure if Olive Hwy will be closed but it sounded that way.

0039hrs

14050. Update II, Quincy IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-12 08:03:21 UTC
From: Pamela Alley
Topic: 14050 Message: 14050

Advising all Arbol residents from Oro Quincy to Olive Hwy to evacuate...0056hrs

Requesting 6 additional engines, report of explosion, multiple fires spread along the electrical lines, notifying PG/E.

Immediate need, Buehler off of Oro Quincy as well as Arbol structures immediate threat.

Additional fire behind Ishi Hills Middle School, same complex, additional multiple structure threats in area.

This fire is MOVING, and quickly. Lots of fuel back in there, and sounds like there are multiple fires in the area.

I'll be reporting more as I have it.

PA

Stanford IC on White 3

Oro Dam Blvd, Pleasant Valley Mobile Home Park, space 220. Smoke showing from front bedroom.

0106hrs

14052. Update 3, Quincy IC

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-12 08:14:39 UTC
From: Pamela Alley
Topic: 14052 Message: 14052

Notifying OPD/SO/CHP to close Olive and Foothill both at the intersection of Olive and Foothill. General alarm to Oroville Fire requested.

All evacuation notices accomplished on Arbol and all tributaries. Unsure if immediate threat or precautionary at this time.

Further precautionary evacuations --more a heads-up, keep your eyes open, but don't leave quite yet.

Requesting a second tac net.

Tac 12 and Oro Tac 1 are two tactical channels.
Butte Fire 151.400

14054. BUTTE: Lookout tower volunteers needed

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-15 13:57:21 UTC
From: Butte County Public Safety Scanner
Topic: 14054 Message: 14054

I know this is not about a fire incident, but I thought it was too important to not get this out to anyone who wants to help. I apologize in advance if this is too off-topic.

Do you live in or near Butte County? Do you have the time to help staff our lookout towers? If so, please read below:

Our local lookout towers provide invaluable protection during times of wildfire danger. Have you been wanting to help our lookout towers beyond donating the funds to keep them occupied? Now is your chance.

Cal Fire/Butte County Fire is looking for paid volunteers to staff the Bald Mountain and Sawmill Lookout towers in 12-hour shifts. Volunteers will be paid $10 per hour for the first 40 hours worked in a week and $15 per hour for every hour after that in a week.

If you are interested in providing this extremely important service to the residents of Butte County, please be at Cal Fire station 17 (6640 Steiffer Road in Magalia) on Wednesday, August 20, 2008 at 8:30am. For more information, please contact Captain Salinas at 872-6313.

Full wildland response in San Luis Obispo to reported multiple vegetation
fires in the hills between Biddle Ranch Road and Lopez Lake Drive and on up
into the Los Padres National Forest. A friend in SLO can see a good header
from one of these.
Santa Barbara County Fire has a major fire off Tepusquet Canyon Road and is
dispatching strike teams to that at present.
All CDF personnel in SLU have been ordered on duty.
Unfortunately, my scanner feed is down for now until I can get it fixed.

Date: 2008-08-17 01:49:18 UTC
From: Chris Burgardt
Topic: 14057 Message: 14058

KTVU reported that the fire was up to 8 alarms and that 20+ structures were involved. The report said that the structures were vacant homes scheduled for demolition for a new housing project. The smoke was quite dark, definitely looked like a column from a large structure fire. I believe winds were 30+ MPH.

I'm about 10 line-of-sight miles north of Eureka, and have seen no *lightning* nor heard any thunder since the late June storms. Our sky's been alternatey broken and high overcast all day. And there's been nothing on the scanner to indicate anything in areas I can't see/hear directly. Only "noise" was from a 4.6 offshore earthquake 17 miles northwest of me last night.

Their locator thing might need some recalibration.

My Echolink node kept giving off severe thunderstorm warnings today too!
Not a peep up here in Portola, eastern Plumas county. Did hear from
a fellow ham up near Susanville that they too were in a thunderstorm
warning. Haven't heard back from him yet though...

Later,
Todd...

Heard several booms far distant unknown direction pre 2100 hrs this is 10 miles north of Crescent City.No rain, light fog.

Heard at 2100 hrs, Hwy 299 closed for unknown time west of Weaverville at Big Bar due to fire. I think this is SHF area.

14071. Silver Creek Fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-19 03:12:07 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 14071 Message: 14071

Toyaibe National Forest, CA -- The Silver Creek Fire, started by a Sunday 4:30pm lightning strike, has now spread to 200 acres.

Current containment is listed at but five percent.

The fire is located northwest of Hwy 108 near the Pickle Meadows Marine Corp Mountain Warfare Training Center in the Humboldt-Toyaibe National Forest.

Resources on scene include 175 personnel including two 20 person hand crews. In addition there are eight engines, seven air tankers, three helicopters and one air attack plane.

Hwy 108 was closed between Kennedy Meadows and Hwy 395 from 8:15pm Sunday until 9am this morning. Another closure could be ordered given the amount of smoke from this fire.

Jerry Tannhauser,
WA6AVR
Columbia,Ca.

Thanks all...apparently my information was flawed. I was listening to the weekend 40 meter ham swap net and the net controller was in Fort Bragg, complaining about all the static crashes and he asked those of us that could hear him where they were coming from. I pulled up the brown valley site and there they were, all over the place in the Eureka area! Maybe not from what has been reportet here...Good to know although it seems to be pretty accurate usually.
Here is a link in case you want to check it out. I've never really trusted these sites frankly but I keep hoping I guess!
Next time I'll take a screen snap! :-)

Heard several booms far distant unknown direction pre 2100 hrs this is 10 miles north of Crescent City.No rain, light fog.

Heard at 2100 hrs, Hwy 299 closed for unknown time west of Weaverville at Big Bar due to fire. I think this is SHF area.

14074. FREE Scanner Audio Hosting Offer (NOT spam)

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-08-20 03:23:51 UTC
From: Butte County Public Safety Scanner
Topic: 14074 Message: 14074

To All California Online Scanner Providers -

My name is Thomas Miller and I am the owner of the Butte County Public Safety Scanner (http://www.thenet411.net <http://www.thenet411.net/>). As many of you are aware, Butte County has seen more than its share of wildfires this season. During the Butte Lightning Complex fires, a large portion of our foothill areas were under some type of evacuation notice. My online scanner has been online for over three years and until recently, was prohibited from allowing more than 150 scanner audio connections due to bandwidth limits. Because of this limitation and the massive interest in my scanner by the local community, many residents of Butte County (and some from outside of Butte County) donated the funds necessary to expand bandwidth to the point where we can comfortably host over 10,000 simultaneous connections for at least 14 months. This was of great help when during our crisis but most of that bandwidth is now dormant. Last month, I made an offer to the NorCalFire and NorCalScan Yahoo groups to provide 500 slots to any online scanner that was broadcasting an active incident. We had one scanner take us up on our offer during the Telegraph fire and it worked flawlessly. Now, I would like to expand that offer.

For the first 20 online scanner providers who contact me, I will provide 50 slots to your online scanner free of charge for the rest of fire season (possibly longer). There are a couple of conditions (see below if you are interested) but this is an open offer to all California online scanners. I will provide additional details off-list to those who are interested but the conditions are:

1. Supported Stream Types: Windows Media, ShoutCast (maybe more, it depends on how things go but Windows Media and ShoutCast relays will be up and running by Sunday)
2. Must be police/fire scanner audio (accompanying video feeds such as scanner status displays or webcams are allowed)
3. Must be a feed originating in California
4. No guarantees of service (basically I cannot be held liable for any downtime) but our services have seen 0% downtime in the two months since the server has been online.
5. Understand that this is an experiment. I'm not a professional streaming media host but I have been a professional network engineer for 15 years with three years of running an online scanner with 98% uptime. I will do my absolute best to ensure that the service I am providing is available at least 98% of the time. If this does not work out, at least we tried and no one will be the worst for it.
6. Slots will be provided to the first 20 feed owners which result in a relay. Basically this means that if any of the first 20 responders don't work out for some reason, the next in line will receive the slots.

This offer is real. This is our way of giving back to the online scanner community by using our excess bandwidth to provide an important and needed service in our state. I look forward to hearing from anyone who wishes to take advantage of this offer.

Sign me (n5fdl@...) up. I can send San Joaquin County stuff,
though I may start with Tracy PD, which recently went P25. I would use
NiceCast to feed the audio from my Icon IC-R2500 receiver.

Thanks! Please send additional information.

Thanks Tom for this great opportunity. I recommend anybody who has a small inkling of bandwidth to upload a stream to take this offer and get every radio signal over California plastered on the internet. :)

Tom - keep me posted on a list of streams. I'd like to keep a list on scancal.org

Started behind Lake and Masonic in the canyon, it has jumped North Market Street burning on both sides due to the erratic winds. Requested 15 engines any type code 3. This is in addition to multiple calfire and LG strike teams already responding. At least 4 tankers with some heavies and a lead plane, but I lost track if more than 4 are responding.

traffic on scancal.org live scanner, however the priorities are set to 1 TGU, 2 SHU, 3 Air Attack and the Command 1 is in normal scan.

General area of fire (where it's shaded doesn't mean it burned, just giving idea of what's burning or threatened). Fire is heading in a south and east direction - right into the turtle bay area and sundial bridge.

http://tinyurl.com/6e8l7m

Priority traffic covered the command traffic on live scanner, but Air Attack had ordered a Sikorsky Sky Crane which is sitting at Redding, but the order was declined by numerous chief officers due to cost and requested we stick with agency copters only.

TGU sending immediate-need strike team of engines.

They're starting to jettison loads on the tankers and returning them.
Air Attack was losing targets for the tankers to drop. Like many city
fires, these kinds of things explode fast but they're still surrounded
by pavement in some way shape or form. Latest word is 100-110 acres
per comment on redding.com

TGU now sending 2nd immediate need strike team of engines to the incident.

Tactical update - it's 151.445 tact 11 for Lake IC.

Topic: 14082 Message: 14088

Final count was 130 acres. Realize that's in the middle of the city. It was definitely a fast moving fire directly threatening lots of IZone and potential for even more.

Now that I'm home and relaxed, I was thinking about the comms I heard during this incident. I became aware about 10 minutes into the fire as I left the office to pick up a sandwich. Saw the column, and passed a TGU engine covering a station in north Tehama. I heard nothing fire related on City of Redding Fire 154.325. Dead quiet, even though this was in the heart of the city. I would think they would have a lot more, but only a medical aid was dispatched later in the incident. It sounded like all traffic took place on calfire frequencies and resource ordering was all calfire. Maybe that's a pre-established plan for major wildland fires in the city?

Did a search on the trunked system. It was non-stop chatter on all agencies. PD had probably two channels non-stop, with evacs happening on ch1 and traffic on ch2. City bus was real busy with bus drivers reporting congestion, confusion on one channel, and their second dispatch channel was trying to negotiate city buses for evacs, especially since it was many apartment complexes that probably had senior homes. At times even 3 channels were utilized for buses at once. Trash was fairly busy and tied at least one channel up non-stop for the time I was monitoring. Some guy blew a hydraulic line and had to explain in slow detail how every time he stopped, he was leaving a puddle on the ground. (we get the hint, shutup and come back to shop) Electric and other utilities had a few lengthy talks also. 8 freqs in the system, minus 1 for data leaves 7 simultaneous transmissions before someone's getting axed or the busy signal. I wonder how close they got.

That's one of the big limitations of trunked systems that can often surprise listeners, or more importantly, *users* of them. Redding has 30+ talkgroups, which might give the impression that they have, in essence 30+ frequencies. Not so at all. In a major emergency, or any busy time, it's real easy to run out of available "channels."

For most all of the City of Redding's departments and services (except the FD, which ducked out of the system before it was even purchased) there are really only seven simultaneously-usable channels. When the stuff hits the breeze, like today, that limitation can quickly become obvious.

> It sounded like all traffic took place on calfire
> frequencies and resource ordering was all calfire. Maybe that's a
> pre-established plan for major wildland fires in the city?

That's really interesting, Jake, and I wish I'd been around to listen. Don't know that I've ever heard of an agreement like that for a full-service local department. Anybody looked through Redding's (or Shascom's) websites for documents that might shed some light on it?

Harry

I'm sure that they got bonked quite a few times. I hope that they have the PD talkgroups set for the highest priority, so they DON'T get bonked.

Well, hopefully the city powers-that-be understand prioritization needs to be included in the trunked system and told the commercial entity controlling the system just that. I was listening for the probably lower-priority users' comments that their radio was beeping at them or not working right, but heard none of that.

Another commentator on redding.com asked a shascom dispatcher about the lack of traffic on RFD F1 and she stated back it is part of their MTZ agreement with the county. I did dig through SCFD site and RFD site last night looking for MTZ details and there was nothing other than an MTZ existed. Ron, I must have missed the RFD F1 traffic. I became aware of the fire about 10 minutes into the incident it sounded like. RFD traffic probably finished up then. Were you listening to both RFD and SHU Local? How did they do the handoff? Did RFD tell all units to switch to SHU for command traffic? Somewhere they had to have realized the fire was at a certain size and that calfire would take "command" of the fire, even though it was 100% in the city limits with no threat to county, unless there was some odd "island" of county land in there - which according to the city zone map - there isn't. Something had to have been said on RFD F1 at some point.

The fire this morning was a stolen vehicle torched in the middle of a field, right behind SHASCOM actually.

Fire working off of Olinda Road just west of Anderson. 50-100 acres - putting up a good column. Olinda IC. Bumping West Anderson Drive

New fire starting Walker Mine Road at Lake Blvd - in the city. CHP and Shasta Bear Lookout nailed this one. CalFire response just cancelled to this one, sticking to Redding City only. Those
resources moving to Airport Station 43 for valley coverage.

My only post - offline now. Live scanner has tankers and SHU Local on it.

From: Jake H
Topic: 14105 Message: 14105

Copter 205 was sent down to NEU this afternoon for a fire. Not sure where or what (was watching a movie) but now I'm hearing very annoying tactical traffic on tac 2 (approved for NEU), 151.160 which is SHU Local Net and a priority on the scancal live scanner. It is Air Attack giving directions to the IC on the ground it sounds like. Thanks CalFire for perpetually recycling your frequencies. :)

From: Jake H
Topic: 14106 Message: 14107

Majority of fire stayed between Hwy 99w and I5, made it from Liberal Ave down to Sour Grass creek pretty fast. Multiple spotting to the east of 99W (where the houses are) is now in check. Firing operations at Sour Grass with tanker drops to reinforce it. NB lanes of I5 closed. Air Attack is optimistic with the spotting controlled, one tanker on hold and the other in orbit, canceled Copter 510 back to Chester air base.

My last post on this one.
Jake

<MARKLEEVILLE, Calif. -- Fire crews are fighting a wildfire that broke out this afternoon in Alpine County south of Lake Tahoe, forcing the evacuation of resorts and campgrounds.
The 100-acre blaze is making runs in heavy timber and could threaten homes if fire crews don't get a handle on it this evening.
The fire broke out close to the Burnside Mine near the intersection of highways 88 and 89 in Hope Valley.

Fire officials have called in air tankers and helicopters to respond to the fire as part of an all-out attack.
No lightning was reported today, and a fire investigator is en route to the scene. >

14114. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-09-01 11:24:21 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 14114

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

14115. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-09-01 11:24:21 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14115

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

14116. Fire Burning in Alpine County

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-09-01 15:45:51 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 14116 Message: 14116

A fire burning through heavy timber is forcing evacuations, and threatening homes and campgrounds in Alpine County.

The Burnside Fire started just after 4:00 p.m. Sunday afternoon, near Highway 88 and Blue Lakes Road. It's burning in an area 12 miles southwest of Gardnerville, and has destroyed 125 acres.

The blaze is now 5% contained.

Sierra Front says the people inside 20 homes near Sorenson's Resort have been evacuated, along with those staying in campgrounds and other recreational areas. Those are all in the area of Hope Valley.

An evacuation center has been set up at Diamond Valley School in Alpine County. All roads are open, except for one U.S. Forest Service road.

.

Jerry Tannhauser,
WA6AVR
Columbia,Ca.

Fire Name: BURNSIDE

9/1/2008 11:30 a.m.
Mark Struble
Fire Information Officer

One mile south CA State Route 88 in Hope Valley. The fire continues to burn west of Pickett's Peak.
Lat: North 38* 45' 28.8" Long: West 119* 55' 23.17"
08/31/2008
4:06 p.m.
Under investigation
150 acres
30%
Timber; elevation approximately 7,500 feet.
U.S. Forest Service, Humboldt-Toiyabe National Forest
USFS Incident Commander Charlie Dobson.
*Incident Command Post is at Turtle Rock Park in Woodfords.
Bureau of Land Management, Cal Fire, Nevada Division of Forestry, East Fork Fire District, Lake Valley Fire Department, Alpine County Sheriff's Office.

Major Threats,
Evacuations
& Closures:
Structures that remain threatened include Sorenson's Resort, Hope Valley Resort, Crystal Springs Campground, Kit Carson Campground (all in the Carson River Canyon along CA State Route 88/89) and approximately 20 residences on Douglas Way (across from Sorenson's Resort on CA State Route 88/89). The need for continued evacuations will be made during the day on 9/1 by fire officials and the Alpine County Sheriff's Office.

Evacuation Center is at Diamond Valley School in Woodfords, CA (click here for directions map). Sheriff's Office reports that nobody stayed at the Center overnight on 8/31.

Highway Closures: none at this time Forest Service roads to Burnside Lake and Pickett's Peak are closed. The Forest Service Road to Blue Lakes remains open at this time.

A STRONG COLD FRONT MOVED THROUGH THE AREA LAST NIGHT. MUCH COOLER WEATHER IS EXPECTED FOR TODAY AND TONIGHT...FOLLOWED BY RAPID WARM-UP FROM TUESDAY ONWARD. WINDS WILL REMAIN GENERALLY LIGHT THROUGH AT LEAST WEDNESDAY.

Other Threats:
Potential damage to Carson River watershed.

Resources Assigned:
2
Air Tankers
2

Helicopters

1
Water Tenders

Dozers

6
Hand Crews
16
Engines

8
Command Staff
183
Personnel

Remarks:
A Type III Incident Management Team will take over management of the fire on 9/1.
One minor injury has been reported (firefighter hurt his back and was treated and released to his home unit).

Sounds like they're wrapping things up quickly on this one. Fire was originally for a vehicle fire, camper on fire. Later in the response did they find the multiple vegetation spots going into structures. CHP CAD log says the truck dumped the camper and left. Also says the structure threat has wrapped up and working on fire along freeway now.

My last post on this one.
Jake

14124. Re: [NorCalFire] Engine 5566?

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-09-01 21:09:46 UTC
From: Chris Nichols
Topic: 14121 Message: 14124

Calfire uses a specific numbering system.

First number is region.

Second number is the geographical unit.

Third number is unit type.

Forth number is specific to the actual engine.

Example:

Engine 3161 is from region 3 - Riverside - 4 wheel drive.

Chris Nichols

ahhh thx , is there any other engines assigned to different places with
different numbering?

NEU it looks like, a couple miles south of Marysville on the Yuba County side of the Feather River: http://tinyurl.com/MyrnaIC

Doesn't look like SRA, though http://frap.cdf.ca.gov/webdata/maps/statewide/facname_map.pdf

Dadnabit!
I thought you were asking about the Gladding Incident!
The fire you are asking about is in LNU.

From: Jake H
Topic: 14127 Message: 14133

It would be NEU, just south of Marysville, although I think this is LRA and not SRA. We have had a longtime poster in Linda, but not sure if he is still here or not.

NEU is grabbing a lot of norcal resources right now. The MEU Strike Team floating in Shasta and recently in Tehama has now formed up for NEU immediate need as well as a Local Government strike team out of Tehama. SHU sent a strike team cover engines to BTU this afternoon.

Grabbing incident outside of Lincoln seems to be the big concern. Copter 205 is down there too.

<Wind Aids Grass Fire Near Lincoln
500 Acres Burned, Evacuations Under Way
POSTED: 1:33 pm PDT September 1, 2008
UPDATED: 7:12 pm PDT September 1, 2008

LINCOLN, Calif. -- A grass fire near Lincoln has burned more than 500 acres and destroyed multiple structures, fire officials said Monday.
The blaze, named the Gladding fire, started at about 12:40 p.m. on Gladding Road and Merritt Lane.
The fire started burning about an acre of land but quickly grew with the aid of 30 mph wind gusts, officials said.

"There are a lot of homes that remain threatened," Cal Fire spokesman Daniel Berlant said. "This fire is still actively burning … hopefully, though, the winds will die down a little bit more, and we'll get some containment."
Fire officials said evacuation orders were under way, but did not say which areas would be evacuated.
An evacuation center has opened at Carlin C. Coppin Elementary School in Lincoln.
Animals may be taken to the Gold Country Fairgrounds in Auburn.
Residents in the area may call the Placer County Fire Department at 530-823-4083 for more information on possible evacuations. >

14136. Breaking News: Crew Killed inTanker Crash

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-09-02 03:38:12 UTC
From: castriketeam
Topic: 14136 Message: 14136

[Moderator's note: While no attribution was supplied by "castriketeam" numerous media outlets are carrying this article.]

RENO - A P2V Neptune multi-engine tanker has crashed outside of the Stead Airport north of Reno. A spokesman for the Federal Aviation Administration says everyone onboard was killed.

The twin-engine air tanker crashed just after its 6:11 p.m. takeoff about a half-mile from the runway, according to FAA spokesman Ian Gregor. Preliminary reports from witnesses suggest the tanker lost a piece of its engine or a wing before it caught fire and went down, Gregor says. The airplane was carrying two or three people, and there were no survivors from the crash, he says.

Sierra Front spokesman Mark Struble said the tanker was working on the Hope Valley fire earlier in the day and had been released.

Witnesses on the scene say the back engines were on fire as it crashed into power lines. Sierra Pacific says 1,740 customers in Cold Springs, Red Rock, and Silver Knolls lost power as a result. All customers should have power restored sometime Monday night.

14138. Re: [NorCalFire] Engine 5566?

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-09-02 04:55:55 UTC
From: Craig Tomasello
Topic: 14121 Message: 14138

Whoa whoa whoa, let's clarify:

Pranay reference this page for some more info:
http://www.ccdpw.com/CDF/CDF%20Tones.htm

Ok now here's how it goes:

First Number is Region (1= Coast Region, 2 = Cascade Region, 3 = South Region, 4 = Sierra Region)

Second Number is Unit

Third Number is Vehicle Type

Fouth Number is Specific Engine Number

Now, since we're on the subject of numbering....

An Air Attack Takes the first 3 numbers of the Unit Number (i.e. San Benito/Monterey Unit is 4600, hence Air Attack 460)

A Helitack takes the first 2 number but puts a 0 inbetween the two numbers. (i.e. Santa Clara Unit is 1600, hence Copter 106)

CT

No I didn't mention that because someone else did and the site i referenced also cited that. One thing that I didn't mention is that the 1500 series is Marin County fire, who is under contract with Cal Fire and numbers their engines just like Cal Fire format.

Side note to anyone who cares: The 1300 Series used to be the Sonoma Unit, which used to have copter 103 which is now 104.

Many departments/districts use four-digit numbering systems like Cal Fire. I can't speak to East Bay, but my county (El Dorado) uses similar numbers.

Although most EDC non-Cal Fire fire apparatus are identified by station numbers (Engine 49 from Station 49, etc.), the chiefs are identified with 6000-, 7000-, 8000 and 9000-series numbers. The chief in the Diamond Springs-El Dorado FPD are numbered C8100, C8102, C8102, and B8103.

None of the departments/districts here use 1,000- to 5,000-series numbers that I'm aware of. Anyone know if these numbers are reserved for Cal Fire?

We often hear 5500-series equipment in AEU during the summer fire season.

Alameda County uses numbers below 5000 so some must overlap, I'd
imagine.

All dept's in Ca have 4 digit #'ing for uses such as when they go out on ST's.. no I'm not talking about the actual ST #'s. Even though placer county eng 49 may use that within county, if they go somewhere else they do use a # digit numbering system like Cal fire does, and other counties in the Bay Area.

ALCO uses their own 4 digit numbering system for their rigs. I.E. Engine 3454 out of Sunol. That would conflict with San Luis Obispo Unit numbering for Cal Fire. I would imagine that they wouldn't delve into the 1600's in ALCO (at least for fire fighting equipment) beings that SCU is present in ALCO.

No department, except CalFire, uses a 4 digit numbering system in Santa Clara County. It's all listed by station number.

Feds also use 2 numeral numbering system (ENG-32 for example). It's suppose to be preceeded by the units 3 letter identifyer (MNF Eng-32, SHF Eng-43, etc.....) for off unit assignments.

Humboldt County deparments are switching to four-digit numbers as well, with most of them having completed the change.

First two digits are for the department, last two are the type and specific unit number. They have (or will have) their 3-letter California Agency Designators affixed to the rigs, but don't usually refer to their department's name now.

Numbers go from 5000s in the south county to 9800s in the north (lots of VFDs here).

Solves the problem like when Eureka had a big structure fire and there were three "Engine 1's" on scene.

Sonoma County also does what Humboldt just switched to. First 2 are department, 3rd number is vehicle type, last number is a sequential number for the vehicle. Rightfully so the 1400's are reserved for CDF, but most of the departments use the higher ranges. Santa Cruz County is another example, but p

Places like San Joaquin, San Mateo, San Francisco, Stanislaus, Merced and Madera, however, do not use a 4 digit numbering system. Come to think of it I don't think Sacto does either. Probably because they don't have several different departments numbering their engines the same, I.E. four engine #1's. San Mateo just adds to the list, hence why you'll hear Engine 77, or the like. Stanislaus idetifies their Engines by calling their Department name then the unit number (I.E. Modesto 6, or Stanislaus 21).

San Joaquin County, except Stockton, uses a one or two-digital department number, preceded by a type and followed by what is often a station number. You are supposed to say the department number separately from the apparatus number. So, the engine at the Defense Depot in Tracy is engine two-six two and not engine two-sixty-two.

The Tracy truck is Truck Nine-One. And the Battalion Chief is Battalion 9, although the individuals are Chief 9-1, 9-2, etc.

Madera/Mariposa/Merced use a 2/3 digit system from 1-99 for the stations between the 3 counties, with Chowchilla City as the exception. Fresno uses a 2/3 digit system from 1-99 for all of the stations in the county.

Sacramento solved this issue with the many mergers that took place..

Sacramento City Stations 1-20, 56, 57
Sacramento Metro 21-68, 101 - 111
Cosumnes River 44-75

think these are pretty accurate.

This is untrue. Individual resources (engines) will never change their identification. What is painted on the engine is what they are. When outside their local response area as an individual resource, they will/should add the three-letter designator of their department as appointed by firescope(?). Every fire department in CA has a unique 3 letter designator. So RDN Engine 3 is different than RBU Engine 3.

When part of a strike team or task force, they will be referenced as that particular team's 4-digit designator, because dispatchers don't care about the individual resources on that team, just the team itself as one whole resource. So XTE-3345C might have RDN Engine 3, RBU Engine 1, OAK Engine 3 and ABC Engine 4. The only time you'll hear those engines referenced by their engine numbers outside of their local area would be by their strike-team leader.

We have several dept (mostly county agencies) that subscibe to a
particular numbering system. First 2 numbers are the department
designator, 3rd number is vehicle type, last number is what station the
piece of equipment resides at. Most departments designator do not change
when going out of the jurisdiction but for instance Hayward Fire used to
go by the 4 digit designator, then went back the normal E-1, E-2 etc.
but when a piece of equipment goes out of the city limits, they switch
to 36xx to differentiate themselves from other E-1's, E-2's or E-3's
that may be on a multi-jurisdictional fire where you could have (7) E-1
or T-1's onscene.

So does this happen just within the county? While in city limits they're
E1 etc, but in Alameda Co they do 36xx? Any other cities in Alameda do this?

All cities within Alameda county have the 4 digit designator except for Hayward. Hayward uses E-1,E-2, etc.. They used to use 36xx. They now only use that when sending units out of city limits. For example Hayward engine E-1 goes on a 3rd alarm assignment out of city. That engine now turns into Hayward Eng. 3641. Dept's using the 4 digit designator uses that all the time. whether in or out of their jurisdiction. I always thought the 4 number designator was something setup within OES.

Oakland 25xx
Alameda County 34xx
Livermore Lab 18xx
Union city 37xx
Fremont 38xx
Newark 39xx
Camp Parks Dublin 56xx
Alameda City 27xx
Berkeley 22xx
Piedmont 21xx

Several Butte engines and a couple from Susanville searching for a new start in the Lassen Trail area south of Mineral. Having a tough time finding and getting to it. Air resources not available until at least 0830. Some rough country and it appears to be largely uninhabited. Will have to see what becomes of this.

Lomo IC. Command moved over to Butte Support on 154.4150. Can be heard clearly at http://www.thenet411.net <http://www.thenet411.net/>

Actually, that's rather physically impossible. Butte Meadows is fairly close to the County line and Hwy 32 and Humbolt Rd. is very close to the County line. Anything east or north of there is Tehama County.

Lol, you are correct, sir. I was a little confused this morning too. From the landmarks they were talking about, it sounded like it was in Tehama County to me too which was why I was wondering why Butte and Susanville were involved and none from Tehama. Access was off of the K-Line from 32 so at least access was in Butte County.

So does this happen just within the county? While in city limits they're E1 etc, but in Alameda Co they do 36xx? Any other cities in Alameda do this?

About 1500 hrs thirs, 1/2 acre,steep,poor access,heading into timber.
Kings Valley Rd x Wonder Stump Rd, Fort Dick,
King Incident HUU 151.250, tac 3,
Fort Dick F.D. C81,2 Water Tenders, E
Cal-Fire E1278 (Crescent City),BC 1214, E1283(Klamath) Alder Camp crew.
E30 Redwood National Park.
Property owned by Diamond Resorce timber. access gates locked,shuffle trying to find keys, takes more than bolt cutter to enter.Usually timber co glad to give fire depts keys or access codes.

Due to lack of other activities in unit, they put on great air show for four hours. AA, at least one chopper, at least 2 tankers.

E1263 (Elk Camp) due for Fri day shift.don't know present acreage, went over top of Hi-Tree ridge near cel-phone and repeater farm into Smith River drainage. Radio quiet after air show. Talked to folks on Smith River objection was choppers dipping from river splashing water on roof.Well Excusise me.

I've been hearing only very sparse information on SRF 168.125 since yesterday, about this incident which is apparently a BIA fire, reported on wildfire.com as being 1000 acres. But on the wrong side of the mountain for me to hear.

Helos on the fire are reported to be 675D, 719, 206G, 58AH and inbound from Lassen was H510 for helibase management and setup.

Topic: 14168 Message: 14168

SHF working the Gulch Fire, with heavy resources from TGU and SHU
assist. This is in Harrison Gulch, which was ordered evacuated earlier
but that order was cancelled later. 2000 acres at 7pm at 5% containment.
I knew nothing of this until hearing NEU send a cover strike team to BTU
as I was coming home from the Donner area tonight. Was able to hear Air
Attack 210 clear with SHF dispatch and coordinate tomorrow's air freqs.

162.225 will be air to ground
163.0375 will be air tactics
both on scancal.org live scanner, along with SHF, and Southfork District Net

Elmoore Fire working near Lakehead. No details on actual location but
sounds like it has lots of potential. No freq knowledge on this one
other than SHF Forest Net and possibly Shasta Lake District Net. Keep an
eye on wildlandfire.com and redding.com for further details on these two
fires.

Jake

Elmore fire is at 250 acres and 25% contained. UPRR was reduced to 10mph through a 2 mile area it sounded like according to rail traffic on 161.310. Milepost 290 something. This is just south of Lakehead along the Salt Creek and I5 area. Elmore Mtn area.

Gulch fire is still active at 2935 acres an 20% contained. At times fixed-wing aircraft was called off due to smoke. Fire burning to north and west through Knob Peak area, still threatening Harrison Gulch and forcing evac of 6 homes along Harrison Gulch Road - fire crested ridge within mile. Contained on the south/heel side of fire along Hwy 36. Coworker drove through Hwy 36 a few hours after fire started and noted fire got pretty close to the ranger station.

171.575 SHF Forest was command net it seemed for fire today. Not sure if a new command repeater will be setup once the ICT is established.
170.000 seemed to be Gulch air-to-ground today
163.0375 was Gulch air attack FM
132.300 was Gulch air attack AM victor

all on scancal.org live scanner.

Jake

California passes bill to merge emergency services with homeland security

The California State Legislature has passed Assembly Bill 38, to create the California Emergency Management Agency (CALEMA), a new agency that will combine the state's Office of Emergency Services and the state's Office of Homeland Security into a single cabinet-level department. CALEMA, which was championed by California Governor Arnold Schwarzenegger, will assume responsibility for overseeing and coordinating emergency preparedness, response, recovery and homeland security activities throughout the state. "Emergency personnel, firefighters and law enforcement all over the state have been asking for this reform for many years," according to a statement by Assemblyman Pedro Nava (D-Santa Barbara), chairman of the Joint Legislative Committee on Emergency Services and Homeland Security. "CALEMA will make the state more responsive when disaster strikes." CALEMA also will mean that California can "reduce its administrative costs and reduce the conflict and duplication from having separate agencies," Nava said.

Ahh yes. Surry Village is Red Bluff's intense IZone area. Luckily the river borders the entire south end so nothing can really rip and roar into the place but it sure could get a little queasy if something goes internally. We had a huge shop fire a few years back that was pretty scary with the embers. One narrow windy road through the area.

Funny that they use this for a Butte drill. I wonder if it's more a map and radio drill than actual acting out. They're forecasting dry lightning for Tuesday.

ChiPs pulls over for EFJT radios

Irving, TX-based EF Johnson Technologies, Inc. has won a $3.7 million contract from the California Highway Patrol to provide Project 25-compliant radios and accessories to the agency.

The ChiPs order follows a $16.7 million contract from the State of California itself in October 2007 to provide its Project 25-compliant portable radios to public safety agencies in the state.

Good morning Pam!

P25 is an open standard digital format for voice communications. Any radio manufacture can use it in their radios. Unlike the proprietary digital formats that the main companies have developed oopn their own. This means a Motorola radio using P25 can talk to a EF Johnson radio using P25. If they were using their own formats they couldn't talk to each other.

As a taxpayer it means that the CHP has once again circumvented the State Purchasing Plan and done their own thing.

It also means that you'll need a scanner capable of receiving digital / P25
rather than the older/cheaper analog-only scanners.

EFJ doesn't show any VHF-Low band radios in their current catalog (but they do list VHF-High, UHF and 700/800), so would it be likely that these radios will be for interoperability rather than to replace their 39/42 Mhz radios?

$3.7M or even 3.7 + 16.7 wouldn't even put a dent in their statewide system.

I don't know their time line, but there are areas of the state (San Luis Obispo, Fresno, areas north of Sacramento) where they could operate today. Once the DTV cutover date passes next year, they would be free to operate anywhere in the state.

The Homeland Security Department will soon begin testing newly engineered multiband radios for first responders in New York City and other locations as part of its efforts to improve emergency communications, officials said.

Historically, firefighters, police and other first responders have used radios that operate on only one frequency or on different bands. The new radios, which will operate across different bands and in both digital and analog modes, will make it possible for them to communicate in cases where they need to work together.

DHS' Office for Interoperability and Compatibility, the Federal Emergency Management Agency and responder groups developed the requirements for the radios, which are being produced by several manufacturers.

The prototypes will be tested this year and in 2009, David Boyd, director of DHS' Command, Control and Interoperability Division, and Chris Essid, director of the DHS Office of Emergency Communications, told the House Communications, Preparedness and Response Subcommittee Sept. 16.

The pilot program testing will involve radio operation across multiple systems, such as analog, conventional, digital and Project 25 systems, as well as across multiple agencies that include federal, state, local, tribal and military.

In addition, the office of emergency communications is establishing an Emergency Communications Preparedness Center to improve coordination of programs related to its mission across the federal government. The center expects to have an operating charter later this year and to submit a strategic assessment to Congress on progress made and challenges ahead in interoperability.

The emergency communications office is creating Regional Emergency Communications Coordination Working Groups to coordinate multistate efforts to improve the survivability and interoperability of communication systems.

Starting in January, the emergency communications office intends to hire 10 regional coordinators who will work in FEMA's regional offices, Essid said.

Tom is a great guy. He and my former Captain Al Foley worked together in Redding. I have met Tom several times and a great guy. Al had 200 jumps in his 19 years. Smokejumpers get a lot more jumps now days than they did in the 80's and 90's due to proficiency jumps that they have to do on a regular basis whereas in the 80's they did training jumps in the preseason and when they were ordered for fires. Still a great number of jumps for Tom. I am not sure what the record is for the most, but I am sure he is probally near the top.

Article Launched: 09/21/2008 12:05:38 AM PDT

CHICO - Property stolen from two law enforcement agencies and $130,000 in industrial woodcutting equipment stolen from a private business were recovered following an investigation by the Butte County Sheriff's Office.
The agency announced in a release that in the process of investigating two burglaries and a theft at a business on the 12000 block of Meridian Road, police discovered a variety of property previously reported stolen.

Among the property named was equipment, bicycles and tools reported stolen from the Chico Police Department and firefighting equipment from the San Francisco Fire Department.

The hoses and nozzles were reported stolen while San Francisco firefighters were in Butte County assisting with the fires during the summer.

Nearly all of the property reported stolen from the woodcutting burglaries was recovered.

Police arrested Benjamin Ruggles, 30, at 5604 Jewell Road in Paradise on a variety of charges, including 37 counts of possession of stolen property.

Drugs were also found at the residence.

The Sheriff's Office said the public should keep records of serial numbers so that stolen property can be returned if it is recovered by police.

Among the property named was equipment, bicycles and tools reported stolen from the Chico Police Department and firefighting equipment from the San Francisco Fire Department.

The hoses and nozzles were reported stolen while San Francisco firefighters were in Butte County assisting with the fires during the summer.

Nearly all of the property reported stolen from the woodcutting burglaries was recovered.

Police arrested Benjamin Ruggles, 30, at 5604 Jewell Road in Paradise on a variety of charges, including 37 counts of possession of stolen property.

Drugs were also found at the residence.

The Sheriff's Office said the public should keep records of serial numbers so that stolen property can be returned if it is recovered by police.

From the Chico ER:

Missing Bangor man found dead

Staff Reports

Article Launched: 09/24/2008 01:09:47 PM PDT

Bangor - A Bangor man being looked for Tuesday by search and rescue teams was found dead just before 7 p.m. near Swedes Flat Road, the victim of an apparent all-terrain vehicle accident.

The man was identified by the Butte County Coroner's Office as Terry Lee Thomas, 57.

The California Highway Patrol said Thomas ran into a chest-high wire strung across a roadway entrance at an unknown speed. The collision ejected him from the ATV.

The CHP said the accident occurred on private property. No one else was riding with the man at the time, officials said.

The accident remains under investigation.

Should be required reading for PIO's, and well worth at least a skim-through for anyone involved in giving out fire info. From the PSW Research folks:

http://tinyurl.com/3k9bka

Looks like the powers that be may finally be catching on!

14208. File - NCFposting.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-10-01 12:46:14 UTC
From: norcalfire@yahoogroups.com
Topic: 12013 Message: 14208

How and what to post on NorCalFire.

1. Northern California Fire Radio

Any and all questions regarding how to monitor fire radio are welcome on NorCalFire. This may include how certain agencies work, their frequencies, methods of operation, and any other info to better our listening hobby. This list is also used for incident information for fires in Northern California.

2. Common Sense:

We know it's a fire. We know it's a new fire. So don't post New Fire or New Start in the subject line. By the 2nd message about the fire, it isn't new anymore. We'll see a new fire started by seeing a post with a new subject line. This is a pet peeve of mine, and many others. Expect it enforced.

3. Subject Lines:

Get at least the following: County or Jurisdiction, general location, incident name.
Example subject lines that please everybody include:
Butte - Honey Run Canyon
SHF Bolli Incident
Timber Fire, Lassen USFS Turner Mtn
Calavaras - Alpine Lake fire?

4. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.\

6. Acronyms
Learn them. Do not complain about them. Too many people on the list use these acronyms in

their daily lives. They do not need to stop when posting to this list. It is expected of you to learn these acronyms if you want to enjoy fire radio of any degree. Acronyms are readily available on the Internet. There is a link to acronyms etc. at the bottom of every post. Use it.
http://fire.norcalscan.org/glossary.html

14209. File - NCFrules.txt

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-10-01 12:46:14 UTC
From: norcalfire@yahoogroups.com
Topic: 12014 Message: 14209

Thanks for joining NorCalFire! If we all follow these rules, the list will run nice and smooth. If you don't follow these rules, refer to rule #6

1. No whining or complaining.

There is zero tolerance for whining and complaining on NorCalFire. You will be moderated fast and if you continue, you will be removed from the list. There is no room on the list for your personal problems. That is what direct email is for. If you have a problem with someone on the group, try emailing norcalfire-owner@yahoogroups.com for help.

Do not whine about acronyms. Learn them or look them up. Print them and put them next to your screen. Too many people on these lists use these acronyms in their daily lives and will not bow down to your lack of appreciating the hobby. If you want to enjoy fire radio, learn how to listen to fire radio. We will NOT hold your hand.

http://fire.norcalscan.org/glossary.html

2. Keep it on topic.

Northern California Fire Radio. If it doesn't involve THREE of those FOUR words, do NOT post your message. We are not here to learn about what radios you have to sell, or how to turn on your scanner.

3. No one-liners, or one-acres, or thank-yous, or you're-welcomes.

This goes for the "play-by-play" posters. Please combine the information that you've gathered into a larger post. If you're posting sooner than every 15-30 minutes about a fire, you're posting too much. Wait for a size-up of the fire before posting. If it sounds like a large incident with lots of radio monitoring potential, then post it.

No Strike Team deployments, unless they're going to a Northern California fire that isn't posted on the list yet.

Don't send thank you's (or if one gets through, don't send you're welcomes back") to the list. If a large fire got covered nicely on the list, and it is quiet on the list, and you were directly affected by the posts regarding that fire, you may thank the list or the particular people. If this is abused, you will be asked to stop. This just adds to an already busy list.

4. Sphere of Influence.
So the fire is 200 miles from you? Don't worry about it. We don't need to know if your second cousin's best friend's sister lives 10 miles away and you want every little detail about the fire. The person who posted about the fire will post more info as they see fit. If you know of immediate family in the area, you may ask the poster privately, using their direct email. Don't use the list please. You will be moderated if this is abused.

Choose your home and stay put. If you live in Fresno and have a keen interest in Butte County fires, then move to Butte County. Do not live vicariously through the list and ask

every little detail about incidents in Butte County. Etc. Etc. Etc.

5. Replying

Read all messages before replying. You might be replying to a question that got answered ten times already. Also use one message to reply to all items for any particular topic.

6. Moderation

New members are automatically placed on moderation. This is mainly to stop the spam that has become pervasive on the system. It's also so that we (the moderators) know that you're okay, and not some kind of wierdo. You'll come off moderation when we feel that it's okay to turn you loose to the list.

Once off your initial moderation, you generally have to screw up really bad to be put back on moderation. One of the things that we will not tolerate is incivility. We are all adults here, and those of you between 13 and 18 should have enough maturity to act like an adult. We can disagree without being disagreeable. If you've been placed on moderation, you'll be taken off when the moderators think you can be trusted again. If you keep being put in moderation, we may ask that you leave so our time is not wasted in holding your hand and babysitting you.

7. Have fun!

This list is for getting the information about fires in NorCal out, so we all know what's going on. The news media isn't very much help in getting the specifics out, and you can listen to the incidents as they unfold.

If you have any questions, complaints, or suggestions, email them to norcalfire-owner@yahoogroups.com and we will try to get to them as soon as possible.

Jake, List Owner

PA

Paradise High School arrested for impersonating firefighter
By Staff Reports
Article Launched: 10/03/2008 12:00:00 AM PDT

PARADISE - A Paradise High student was arrested Thursday afternoon on suspicion of impersonating a firefighter and being in possession of safety equipment allegedly stolen from Cal Fire.
Officials confirmed he is a minor and declined to release his name.
Cal Fire-Butte County investigators, in conjunction with Paradise police, interviewed and arrested the suspect at the school.
He was later booked into Butte County Juvenile Hall in Oroville.
Cal Fire spokesman Joshpae White said the juvenile allegedly stole about $1,000 worth of safety equipment, including the familiar yellow, fire-resistant turn-out uniforms worn by firefighters responding to blazes.
Further details are pending the completion of the investigation, White said

I'm not seeing it either, in active or filed incidents. CHP typically drops incidents from the public CAD whenever there's a crime or arrest involved, so that may or may not have some significance.

To all:

This update is being posted at 9:47PM.

---
9 Confirmed Dead In Bus Crash
Bus Rolled Into Ditch Near Williams
POSTED: 6:25 PM PDT October 5, 2008
UPDATED: 9:36 PM PDT October 5, 2008

COLUSA COUNTY, Calif. -- A Greyhound bus heading from Sacramento to a Colusa County casino flipped and rolled into a ditch, killing at least nine and injuring more than 30 people, Colusa County sheriff's officials said.
Emergency crews are currently responding to the scene at Lone Star and Abel roads, moving people out of the bus and bringing people by air and ground ambulances to area hospitals, officials said.
Aerial images captured by LiveCopter 3 HD shows a bus with burn damage that appears to have overturned into a ditch. Several people were also seen being taken on ambulances and stretchers.

Believe CHP should be lead investigation unit, probably Trans Safety Comm, ICC

and others whether located in City or county .

Chris:

According to a news story at the KCRA site, the bus flipped and rolled into the ditch.

Calstar 10 lifting sierria Nevada hostp.
Looks like now shifted into mop up mode.
Did anyone notice that the ends
Were crushed like it went end over end
Instes of rolling on it's side then into the
Ditch??
Or is that just me?
Chris.

Multiple media outlets reported this as a Greyhound Bus crash. It was not.
It was a contract carrier making a casino run.

I believe it was reported on this mornings news CW31, that the bus was sold
by Greyhound out of Texas last November(?), which might explain the plate,
and I also thought it was an unregistered vehicle, so the Calif plate is
VERY shady indeed.

Harry,

There was the mentioning of "Greyhound Bus" on the side, but according to the company, they do not have Greyhound buses. So where did this misterious bus come from?

Rick

---------- Original message ----------
From: "Harry Marnell" <groupsmail@...>
The plot thickens. Driver's been arrested for DUI. Investigators have reportedly found a California license plate inside the bus, but no word yet on why it had a TX plate. The owner of the bus, a guy named Cobb, has been located, and on 10/2 he had placed this ad online for a driver:

"Charter Bus Driver
Location: Sacramento
Date Listed: Oct-02-08

Charter Bus Driver postion available, work is full time or part-time. All work is within 100 mile radius, no other duties besides driving required.

For more information contact Daniel Cobb Sr. at 916 470 7759."

The bus was sold by Greyhound over 2 years ago, and the TX plates were
not current.

<Placer County Fire Contained To 75-Acres
POSTED: 11:50 am PDT October 11, 2008
UPDATED: 12:32 pm PDT October 11, 2008

SACRAMENTO, Calif. -- Cal Fire officials said Saturday they contained a 75-acre blaze in Placer County.
Fire crews utilized an air attack on the blaze that reportedly began with a hay-filled trailer at Sunset and Foothills streets near Thunder Valley Casino. They said it started at about 10:22 a.m. in an industrial area. Though windy conditions proved challenging, fire officials said crews were able to gain control of the fire before it headed towards commercial and residential areas.
Fire officials said crews from Roseville and Lincoln provided additional aid and support to battle the blaze, including 14 engines, two air tankers and one chopper.

There were no injuries and no structural damage reported, fire officials said.
The cause of the fire is under investigation.
Keep refreshing KCRA.com and stay with KCRA 3 Reports for the latest on this developing story. >

14249. Wildfire Scorches Little Tujunga Canyon-SoCal

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-10-12 19:17:23 UTC
From: Tannhauser, Jerry H CW4 RET
Topic: 14249 Message: 14249

October 12, 2008

SUNLAND -- A wildfire stoked by strong winds has burned at least 750 acres in the Angeles National Forest, threatening about 400 homes and prompting the evacuation of Kagel and Lopez canyons.

One house and one garage have been destroyed in the fire. Also lost were three sheds and three motor homes.

Over 1,000 city and county firefigthers were on the scene, aided by six heavy helicopters and four air tankers dropping fire retardant on the blaze.

A spokesperson for the Angeles National Forest said that the fire was 10 percent contained by late morning but still burning actively and likely to be burning for several days.

The fire broke out about 2 a.m. near a shooting range in the 1200 block of Little Tujunga Canyon Road, about 20 miles north of downtown Los Angeles, according to fire officials.

Wind gusts of up to 50 mph spread the fire west towards ranches and houses in three heavily-forested canyons, then along the foothills parallel to the Foothill (210) Freeway.

Early in the morning, the fire moved southwest out of Little Tujunga Canyon, then spread to the lower ends of Kagel and Lopez canyons, said Los Angeles County fire Inspector Sam Padilla.

Fire officials called for the mandatory evacuation of Kagel Canyon about 5:40 a.m. and of Lopez Canyon just before 6:30 a.m. The evacuation orders have affected about 1,200 people.

Some children at a youth camp in Lopez Canyon are safely sheltering in place as firefighters work to put out the wildfire burning around them, said Padilla.

No evacuations have been ordered yet in subdivisions near the Foothill (210) Freeway.

Los Angeles County Fire Department spokesperson Ron Haralson said firefighters were "getting a really good handle" on the fire. He warned, though, that Santa Ana winds are expected to pick up Sunday evening, and the gusts could spread embers.

Winds were sustained at 15-20 mph Sunday morning. Wind gusts of 60 miles an hour in mountains and canyons, and 45 mph in other areas, are forecast beginning Sunday night.

The blaze also threatened a trailer park and horses at Middle Ranch, an equestrian facility in the 11700 block of Lopez Canyon Road. The horses there have been relocated, according to Padilla.

The fire was south of the Wildlife Waystation, a nonprofit animal sanctuary and rehabilitation facility that houses more than 400 animals, including lions, bears, and deer. Officials were loading up the animals in case the fire switched directions and they had to be evacuated.

The evacuation center for residents has been relocated to San Fernando High School, 11133 O'Melveny Ave.

Horses and pets are being cared for at Hansen Dam Recreation Center.

Little Tujunga Canyon Road is closed, and fire officials are asking people to stay away from Osborne and the 210 Freeway.

The cause of the fire is under investigation.

What I heard on this one was an access problem, apparently not near
any trails/roads.
They cancelled most of the responding units (CalFire, something from
Truckee, aircraft & a couple more I did not catch) & kept the 1 helo
coming with a bucket & just Forest Service crews.
They were talking about transporting the crews via helo to a LZ that
was very near the fire, otherwise it looked like at least a 2 hour hike in.
Heard something that it was near the old Cottonwood Fire area.

14254. Re: [NorCalFire] New Fire Loyalton (Sierraville area)

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-10-13 04:20:09 UTC
From: Heather Kantor
Topic: 14250 Message: 14254

The fire is about 2 miles NE of Babbit L/O. You are probably thinking of the road up Badenaugh Canyon, but everyone was flown in; it is nowhere near any road.

14255. Angel Island Vegetation fire

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-10-13 05:09:26 UTC
From: Pranay Manghirmalani
Topic: 14255 Message: 14255

Vegetation fire from MRN Unit. 5 to 6 acres
One engine is staffed on the island with MRN FF's , but MRN ferrying over 3 more type 3's.
Tiburon Fire is sending firefighters , also San Francisco is sending Fireboat 1 to Tiburon to shuttle firefighters to the island , request from coast guard.

OK, is MRN staffed by CAL FIRE or by someone else. It's not really part of the CAL FIRE system, at least not like the other units. Or is it closer than I think?

My mistake, not a child - it is a heart attack victim on the trail.
Mountain Life Flight is on scene, 205 will do the short haul to the LZ
where Life Flight will take him out.

Ops on Calcord 156.075 - not sure if I'll hear them once they drop
behind Bumpass Mtn. My last post on this one.

Dunno, but here's the article...The swarm of rumors of bees was definitely unfounded.. ;-)

http://www.chicoer.com/ci_10857769?source=rss

OROVILLE - Cal Fire-Butte County officials said they've received numerous emergency calls today about smoke in the valley, but advise it's coming from agricultural control burns that pose no danger.

14275. controlled burns

Yahoo group: norcalfire (2005 — 2016)
Date: 2008-10-31 01:11:27 UTC
From: grams46@aol.com
Topic: 14275 Message: 14275

Thursday, October 30, 2008

PLACERVILLE, Calif. -- Several controlled burns in the El Dorado National Forest are filling the skies with smoke in the Sierra and foothills.
About 9,000 acres of national forest lands are scheduled to be prescribed burned, in both pile and understory fire application, the U.S. Forest Service said.
"Making the national forest less susceptible to wildfires is a major emphasis in Forest Service land management activities," forest fuels specialist Jennifer Boyd said in a news release. "The timing of the actual ignition of a prescribed burn project depends on weather conditions, moisture in the fuels we intend to burn, our ability to control the fires, and permission from the local air pollution control district."
The Cat-Anderson burn on the Amador district in the Leek Springs area will center on reducing the heavy fuels in the area.
The Van Vleck Meadow restoration project on the Pacific District has progressed with the removal of encroaching trees that are filling in the meadows and will follow up with prescribed fire to clean up and rejuvenate the meadow systems.
The Henrys burn on the Placerville District will link numerous hazardous fuels projects already completed and in progress in and around the community of Grizzly Flats. This burn will treat fuels below the Grizzly Flats community along the north fork of the Consumes River.

Guess that gives an answer to how they can be allowed to do this.

So, when they do 'controlled burns', do they take into consideration the upcoming precipitation that will 'take it out of the air'?? And does it really?

I know that today, I had to cancel a whole set of plans based on being able to be out and about--I simply could not breathe. NOT what I would expect if the local air quality folks okay something!

Grrr....

Having done control burns for a number of years, it is pretty tightly regulated. Before anyone burns, they have to submit a Smoke Management Plan to the local Air Pollution Control District and get it approved. Additionally, they have to monitor smoke related forecast from ARB in Sacramento to be in compliance and only burn when the APCD gives them the OK to do so. Having said all that, weather being the exact science it is, sometimes the smoke goes up and comes right back down. From the smell of the smoke in Butte County today, I would say that it was mostly agricultural in nature. It is still too dry in the mountains to do any serious burning and be able to hold in it in the containment lines. It must be Fall in California, I can smell it in the air~

Here's the news from our local radio station, HTRadio, Jackson

Smoke
drifting in to counties from two prescribed burns in National
Forests

Even
though you may be smelling and seeing smoke in the area, there
are no fires currently burning in Amador or Calaveras counties.
According to CAL FIRE, the smoke is drifting in to both counties
from prescribed burns in both the Eldorado National Forest and
the Stanislaus National forest. In the Eldorado National Forest
9,000 acres near the Leaf Springs Lookout area in El Dorado
County is burning. The 212-acre prescribed burn in the
Stanislaus National forest began last Monday and is still
burning near the Cow Creek area.

Not CalFire...but our boys in green....

Dunno, but here's the article...The swarm of rumors of bees was definitely

unfounded.. ;-)

http://www.chicoer. com/ci_10857769? source=rss

OROVILLE - Cal Fire-Butte County officials said they've received numerous

emergency calls today about smoke in the valley, but advise it's coming from

agricultural control burns that pose no danger.

cal fire is reporting on a control burn that escaped that caused the 2 fires
more info on the www.calfirenews.com website'
also due to strong lightning in the area with isolated showers going on
also wildlandfire.com has some info on this also

To: norcalfire@yahoogroups.comFrom: apollosfyre@gmail.comDate: Thu, 30 Oct 2008 16:09:15 -0700Subject: Re: [NorCalFire] Okay, who let the smoke out???

In the news this afternoon, Calfire refuted numerous "Bee" rumors{ ;-p }and stated that the smoke was from agricultural burning being done. I wouldhave saved the article to post, but I figured it had been seen.On Thu, Oct 30, 2008 at 4:04 PM, <twobells2@...> wrote:> Bee keepers hearding there flocks for the winter!!!!>> Joe Lacey>> ---- Butte County Public Safety Scanner <thenet411@...<thenet411%40thenet411.net>>> wrote:> > I could be completely off here but I think it is drift smoke from the> > prescribed burn up in LNF. Control burns on the Eldorado National Forest are emitting large quantities of smoke that can be smelled over a wide area in Placer and Nevada counties. No uncontrolled fires are burning. The Cat-Anderson prescribed burn is ongoing.
CAL FIRE is conducting a 200-acre prescribed burn near Englebright Lake today and tomorrow.
